Education For Action 4e:

The Evaluative Study of Action Research Eileen Piggot-Irvine, Lesley Ferkins, Wendy Rowe, Shankar Sankaran, 2021-02-15
The Evaluative Study of Action Research presents all eight published papers as part of the six year global Evaluative Study of Action Research ESAR in one volume. The study sought to enhance the academic rigour of Action Research AR and provide greater evidence of its impact. This research contained in this book shows in a cohesive way how the ESAR exemplifies original research incorporating new methodologies to create new knowledge. An Evaluative AR framework and indicators were created for initial qualitative data collection with six initial case studies using interviews, survey, documentary analysis and Goal Attainment Scaling methods. The initial study was followed by a large scale mixed method survey with 174 projects from across the globe. Almost all projects exhibited positive elements linked to AR precursors: focus, clarification, stakeholder engagement, funding, processes, phased, planned yet flexible, activity, data collection and analysis, ongoing collaboration and leadership, and outcomes. Impacts: change, knowledge mobilisation and continuing action. The results of the ESAR elaborated in this volume offer important indications for how to create the sort of respectful engagement that is required for collective strength in solution based innovative change. This book will be a valuable resource for action researchers throughout the world: postgraduate research students, academics and libraries, evaluators and anyone in communities who wishes to know how to create sustainable change. **The Wiley Handbook of Action Research in Education** Craig A.

Mertler, 2019-02-06 Comprehensive overview of the theoretical, conceptual and applied practical presentations of action research as it is found and conducted solely in educational settings. The Wiley Handbook of Action Research in Education is the first book to offer theoretical, conceptual and applied practical presentations of action research as it is found and conducted solely in educational settings. Covering primarily PK-12 educational settings, the book utilizes a cross section of international authors and presentations to provide global perspectives on action research in education. Part I of The Wiley Handbook of Action Research in Education focuses on various foundational aspects and issues related to action research. Part II is centered on chapters that present theories and principles that help to guide the use of action research in educational contexts. Part III focuses on specific applications of educational action research in practice. Part IV provides an outlet for seven educational practitioners to share their experiences in conducting action research. Each of these authors also discusses the importance and value that action research has had on him or her, both professionally and personally. Discuss action research in PK-12 as well as in higher education settings. The first book to focus on the importance and application of action research exclusively in educational settings. Offers world perspectives on action research in education. Written by a team of international scholars. The Wiley Handbook of Action Research in Education is an excellent book for advanced undergraduate students, graduate students and scholars studying and/or researching educational action research. Educational Curricula Jennifer N. Casey, 2008 In formal education a curriculum plural curricula is the set of courses and their content offered at a

school or university As an idea curriculum stems from the Latin word for race course referring to the course of deeds and experiences through which children grow and mature in becoming adults Crucial to the curriculum is the definition of the course objectives that usually are expressed as learning outcomes and normally include the program s assessment strategy These outcomes and assessments are grouped as units or modules and therefore the curriculum comprises a collection of such units each in turn comprising a specialised specific part of the curriculum So a typical curriculum includes communications numeracy information technology and social skills units with specific specialised teaching of each This book presents research on educational curricula from around the world

Fanon, Education, Action Erica Burman, 2018-07-23 Bridging childhood studies pedagogy and educational theory critical psychology and postcolonial studies this unique book reads the role and functions of the child and childhood as both cultural motif and as embodied life condition through the work of Frantz Fanon Based on innovative readings of Fanon and postcolonial cultural studies the book offers new insights for critical pedagogical and transformative practice in forging crucial links not only between the political and the psychological but between distress therapy and personal and political learning and transformation Structured around four indicative and distinct forms of child read from Fanon s texts Idiotic Traumatogenic Therapeutic Extemic the author discusses both educational and therapeutic practices The pedagogical links the political with the personal and Fanon s revolutionary psychoaffective account offers vital resources to inform these Finally the book presents child as method as a new analytical approach by which to read the geopolitical which shows childhood education and critical psychological studies to be key to these at the level of theory method and practice By interrogating contemporary modalities of childhood as modern economic and political tropes the author offers conceptual and methodological resources for practically engaging with and transforming these This book will be vital and fascinating reading for students and scholars in psychology psychoanalysis education and childhood studies gender studies postcolonial studies and mental health

Values and Virtues in Higher Education Research. Jean McNiff, 2016-06-10 Values and Virtues in Higher Education Research centres on practitioners studying and researching their practices in higher education settings in order to improve those practices for the benefit of others and themselves Making research public is a

key aspect of ensuring the quality of educational research and educational practices

Values and Virtues in Higher Education

Research raises questions and develops conversations about why higher education practitioners should study and improve their work how this may be done and what might be some of the benefits of doing so What we do as practitioners is influenced by and linked with what we value what we believe is good Improving practices therefore involves becoming aware of and interrogating the values that enter into and inform those practices a study of practices becomes a study of the relationships between the practices in question and their values base From an international group of contributors in this growing field this book provides strong theoretical resources and case study material that shows how this transformation may be achieved including topics such as Theorising practices to show personal and organisational accountability Developing inter professional and inter disciplinary dialogues for social transformation Establishing communities of inquiry in higher education and other workplace settings Reconceptualising professional education as research informed practice Locating educational theory in the real world for human and environmental wellbeing Showing the evolution of theory through critical engagement this text will be a valuable companion for lecturers students and professional developers in higher education This book will form core reading for those who are interested in engaging in practice based research and as additional reading for those whose aim is to broaden their thinking in relation to the role of values and virtues in educational research

Jean McNiff is an independent researcher and writer Professor of Educational Research at York St John University and Visiting Professor at Oslo and Akershus University College Beijing Normal University and Ningxia Teachers University She is also the author of key texts *Action Research Principles and Practice* *You and Your Action Research Project* and *Writing Up Your Action Research Project*

Reviewing Qualitative Research in the Social Sciences Audrey Trainor, Elizabeth Graue, 2013 Foundational characteristics of qualitative research include flexibility variation in application critique and innovation all of which derive from its subjective roots in interpretivism and constructivism While the scholars who design qualitative research projects envision these qualities as strengths such a breadth of practices and the assumptions that undergird them may present challenges during the peer review process As a result those who review and consume qualitative research often have important and difficult to answer questions about the project s design strategies tools and analysis with few guidelines for gauging the merit of the work The mission of this book is to provide a useful guide for researchers reviewers and consumers who are charged with judging the quality of qualitative studies In order to embrace the challenges and controversies that accompany this goal the editors have solicited experts representing multiple disciplines and methods of qualitative inquiry Their contributions represent the rich diversity in the field while simultaneously producing a pragmatic and useful guide While it is neither possible nor desirable to compartmentalize qualitative approaches and issues into neatly organized categories the construct of method has been chosen as a common organizing device The introductory chapter explains the need for such a book and underscores the foundational strengths of qualitative research flexibility variation critique and innovation The remaining chapters review the principal approaches to qualitative research with care taken not to standardize rigidly define or oversimplify any approach For ease of use all methodological chapters are organized around the following
