Spring,2014-04-08 In this book Joel Spring explores three major international educational ideologies that are shaping global society neo liberal educational ideology human rights education and environmentalism Neo liberal ideology reflects a rethinking of nationalist forms of education as the nation state slowly erodes under the power of a growing global civil society Traditional nationalist education attempts to mold loyal and patriotic citizens who are emotionally attached to symbols of the state whereas the goal of neo liberal educational ideology is to change nationalist education to serve the needs of the global economy These changes are fueling a clash between the ideas of free market and consumer based neo liberals and those of human rights and environmental educators Human rights education is concerned with creating activist global citizens It is rooted in the idea that inherent in human rights doctrines is a collective responsibility to ensure the rights of all

people Environmentalism is the most radical of the ideologies because it rejects the industrial and consumerist paradigm that has dominated most economic thought including capitalism and communism Spring synthesizes and analyzes the effect of these educational ideologies on shaping the future of the global society In the concluding section he compares the effect of these ideologies on global society with the possibility of a world divided between conflicting civilizations How Educational Ideologies Are Shaping Global Society Intergovernmental Organizations NGOs and the Decline of the Nation State features a critical exploration of the transition of schooling from a function of the nation state to a globalized economic and political system a discussion of the major organizations and trading blocs shaping the future globalization of educational policies an analysis of the major competing global ideologies of education including national and corporate models that emphasize training workers for a competitive global free market the worldwide network of human rights and peace educators who are teaching a global set of ethics and the environmental movement s efforts to create a common set of educational standards for sustainable development and sustainable consumption and an exploration of the possible future of global educational policy and school organizations By integrating a wide range of previously scattered information within a bold new framework for understanding educational ideologies and their impact on the global society Spring raises important questions for researchers professionals and students in history and philosophy of education educational policy educational studies comparative education multicultural education curriculum studies critical media studies global studies human rights education and related areas

*Educating for Humanity* Neil Tucker,2025-03-11 This book explores the international landscape of educational scholarship policy and practice Tucker argues there is a fundamental aim for world education It is to educate complete human beings in all their dimensions such that they become the best persons they can be and participate fully in

the human story Tucker asks What is the world of education for What is it that early childhood centers schools and local communities are meant to do for children and their learning Representing a decade of research the text examines the most common concepts of the purposes of education human nature and learning offered by scholars international authorities and pedagogies nations education organizations neuroscience early childhood educators and individual schools To educate for humanity Tucker provides a complete concept of holistic education of whole child and holistic learning for a whole world The book is an essential resource for those involved in the world of education teachers university administrators school authorities policy makers and educational organizations Parents and community members with a strong interest in the education of all children will also find much that is informative and challenging to think about *Human Trafficking Around the World* Stephanie Hepburn, Rita J. Simon, 2013-04-09 An overview of sex trafficking forced labor organ trafficking and sex tourism across twenty four nations providing detailed accounts of the victims experiences and discussing anti trafficking measures and the conflicting policies that make trafficking so pervasive **The Gifts of Community** Anne Marie Durham, 2012-11-29 We all feel the pull that innate knowing that we were put here on this earth for some important purpose greater than ourselves But how can we realize that calling in a world that seems so utterly broken and in perpetual turmoil How can one person make a difference How do we help others when overcoming our own personal problems seems so overwhelming It is simply by rediscovering our connectedness through community participation that both our inner and outer worlds begin to transform The Gifts of Community reveals the mutual path to personal and community development a path that has been well hidden behind cultural messages of competition and self preservation By sharing your gifts with others you are gifted with all that you have felt has been missing in your life You grow as a person realize your dreams develop your talents and meet your soul partners And as you realize this potential and begin to think in the mindset of community the world around you will change for the better as well Community is a grand scale gift exchange As you give good to others good comes back to you **Human Rights Education and the Politics of Knowledge** Joanne Coysh, 2017-02-24 Around the world there are a myriad of NGOs using human rights education HRE as a tool of community empowerment with the firm belief that it will help people improve their lives One way of understanding these processes is that they translate universal human rights speak using messages and symbols which make them relevant to people s daily lives and culturally resonant However an alternative more radical perspective is that these processes should engage individuals in modes of critical inquiry into the ways that that existing power structures maintain the status quo and control not only how we understand and speak about social inequality and injustice but also act on it This book is a critical inquiry into the production distribution and consumption of HRE and how the discourse is constructed historically socially and politically through global institutions and local NGO practice The book begins with the premise that HRE is composed of theories of human rights and education both of which are complex and multifaceted However the book demonstrates how over time a dominant discourse of HRE

constructed by the United Nations institutional framework has come to prominence and the ways it is reproduced and reinforced through the practice of intermediary NGOs engaged in HRE activities with community groups Drawing on socio legal scholarship it offers a new theoretical and political framework for addressing how human rights pedagogy knowledge and power can be analysed between the global and local by connecting the critical but well trodden theories of human rights to insights on critical pedagogy It uses critical discourse analysis and ethnographic research to investigate the practice of NGOs engaged in HRE using contextual evidence and findings from fieldwork with NGOs and communities in Tanzania
