## **Education In The Middle East:**

*Aspects of Education in the Middle East and Africa* Colin Brock, Lila Zia Levers, 2007-05-07 The chapters in this volume do not represent the whole of the Middle East and North Africa as such a collection would have been too large for one volume. Rather the selection here is intended to present different perspectives on a range of educational issues relevant to a particular focus or country or common to a number of countries in the area. There is no overarching theme beyond that which is common to most of the countries in this area such as modernity versus tradition, the spread of education effecting sociological changes most pronounced in the rural and tribal areas, the changing fortunes and roles of women, the aspiration and expectation of youth and the state having become the major player in providing education. These are all shared by most of the countries represented here. *Going to School in the Middle East and North Africa* Kwabena D.

Ofori-Attah, 2008-07-30 The Middle East and North Africa are constantly in the news due to political turmoil and it is difficult for students in those countries to attend school and live the life of a child or teenager. What is it really like? This volume traces the history of education in countries of the Middle East and North African region, identifying the types of education available for different genders and social classes and how race, ethnicity and gender affect education for those students. Primary, Secondary and Post Secondary educational opportunities are examined along with curriculum and teaching methods. Major reforms and philosophies are also presented. Countries included are Algeria, Morocco, Tunisia, Egypt, Libya, Saudi Arabia, Iran, Iraq, Israel, Jordan, Syria, Lebanon. **Higher Education in the Middle East and North Africa** Yew Meng Lai, Abdul Razak Ahmad, Chang Da Wan, 2016-06-07 This book explores the prospects for higher education development in the Middle East and North African MENA region. Adopting a South-South perspective from the viewpoint of a developing country, it seeks to promote a deeper understanding of this colourful and highly diverse yet volatile region. As such, it examines six selected MENA countries that serve as case studies for identifying the gaps and challenges as well as their potentials in terms of higher education development. Based on expert interviews and focus group discussions with more than 85 individuals across the six countries and complemented by related facts and figures from both international and national documents, it presents an in-depth discussion and analysis of the countries' respective political, security and economic situations. These serve as preconditions for the cultivation of an environment conducive to facilitating the advancement of higher education. It also provides a critical overview of higher education in these countries, notably in terms of the current national system, legislative framework, accreditation, quality assurance, recognition concerns and other critical issues that enable and/or constrain the development of their respective higher education sectors and that of the region as a whole. *At the Crossroads* Adnan

**Shadow Education in the Middle East** Mark Bray,Anas Hajar,2022-08-08 This volume offers insights into the role of private supplementary tutoring in the Middle East and its far reaching implications for social structures and mainstream education Around the world increasing numbers of children receive private tutoring to supplement their schooling In much of the academic literature this is called shadow education because the content of tutoring commonly mimics that of schooling as the curriculum changes in the schools so it changes in the shadow While much research and policy attention has focused on private tutoring in East Asia and some other world regions less attention has been given to the topic in the Middle East Drawing on both Arabic language and English language literature this study commences with the global picture before comparing patterns within and among 12 Arabic speaking countries of the Middle East It presents the educational and cultural commonalities amongst these countries examines the drivers of demand and supply of shadow education and considers the dynamics of tutoring and how it impacts on education in schools In addition to its pertinence within the Middle East itself the book will be of considerable interest to academics and education policy

makers broadly concerned with changing roles of the state and private sectors in education The Open Access version of this book available at [www.taylorfrancis.com](http://www.taylorfrancis.com) has been made available under a Creative Commons Attribution Non Commercial No Derivatives 4.0 license

**Education and Society in the Middle East and North Africa** Milton George, S. Sergio Saleem Scatolini, 2020-01-17 In the past the Middle East and the so called Muslim world used to be beacons of learning and critical thought Although historical variables such as conquest internal conflict and colonization demoted their position on the global stage changes are now in the offing In these interesting times a growing number of educators thinkers and visionaries are trying both to find and to generate new approaches to the past present and future of the region This book is a collection of articles which reflect on various aspects related to education and society in the Middle East and North Africa also known as the MENA region their peoples and educational processes It provides a platform for people to join the global conversation and to contribute to it with data which are relevant to regional concerns research and practices This is necessary because many of the theories and research findings which are still being used to understand the region were generated elsewhere and despite their lack of regional representativeness were generalized as the most trustworthy interpretive tools across the world Hence there is a need for the world to open up to the voices from the MENA region

**Education in the Broader Middle East** Gari Donn, Yahya Al Manthri, 2013-05-13 This book brings together academics and postgraduate students practitioners and Ministry officials all of whom are wedded to developing an understanding of what is happening to education in the broader Middle East They cover many countries whilst recognising that many more could have been included In drawing attention to education in Pakistan Palestine Oman Turkey and Qatar they indicate the wide range of education policy borrowing and most importantly the effects of this exchange The contributors know that the countries of the broader Middle East are not alone in having purchased glitzy

glossy and tantalisingly wonderful educational reforms only to find how quickly they became outdated In other words they became a baroque arsenal of educational goods services and models of practice which having been discussed designed and generated many years before in countries elsewhere have then been sold and delivered to the unsuspecting countries of the broader Middle East It is argued that many of the countries of the region did not suspect that their purchases were more frequently than not the off loading of failed educational experiments in countries of the centre This book discusses what this means not only for educational reform projects but also for the impact upon regional political stability The two final chapters discuss the underlying key concerns of gender and of cross border education      **Comparative Education** Robert F.

Arno, Carlos Alberto Torres, 2007 *Comparative Education* examines the common problems facing education systems around the world as the result of global economic social and cultural forces Issues related to the governance financing provision processes and outcomes of education systems for differently situated social groups are described and analyzed in specific regional national and local contexts      *Youth and Education in the Middle East* Daniele Cantini, 2016

The uprisings that were seen throughout the Middle East during 2010 and 2011 make it difficult to over state the role of educated youth in the region s politics Daniele Cantini combines an analysis of young people in Jordan of its relevance and of its perceived crisis with one which looks at education and the pursuit of knowledge He thereby highlights the unprecedented rise in youth population and the growth in institutions of higher learning as a way to explore and explain the challenges Arab majority societies are currently facing It proposes an understanding of the university as an institution integral to the survival of the regime discusses its fragile reforms and crucial in the formation of young people s social and political identities *Youth and Education in the Middle East* offers vital first hand accounts of the role of educational institutions and the impact they have in shaping transnational and local constituencies as well as in the micropolitics of everyday life Bloomsbury Publishing

*Education Technology Policies in the Middle East* Michael Lightfoot, 2016-09-14 This book explores the potential educational technologies have for transforming education in the Middle East Although technology has increasingly become a part of classrooms around the globe over recent decades its application in classrooms in the MENA region remains underused and this book draws on a case study from the Arabian Gulf to examine the beneficial impact technologies have on teaching and learning The book identifies the many social and cultural pressures that prevent government technology policies to be implemented in the way that the international community would find recognisable and acceptable and how education policy from the Global North is transplanted into a separate context without considering the different requirements The study seeks to address the ways in which educational technology policy in government schools plays a part in the enactment of education reforms and how government policy aspirations are played out in practice diviv
