

New Economic Policy 1991

- The New Economic Policy includes diverse policy measures and changes introduced from the year 1991". All these measures have the same spirit. The purpose is simple and it is to improve the efficiency of the mechanism involving multiple controls, reduce competition in the private sector and improve the scattered capacity.
- The new economic policy tried to bring a more competitive environment to the economy so that the efficiency and productivity of the system should be improved. Therefore, to achieve the goals of the new economic policy, necessary reforms were made in trade policy, industrial policy, monetary policy and fiscal policy.

EDUCATION AND THE NEW ECONOMY: A POLICY PLANNING EXERCISE... ED414644... U.S. DEPARTMENT OF EDUCATION. United States. Office of Educational Research and Improvement,1998* **Education and the New Economy** Cathleen Stasz,1998 While policymakers and scholars may argue over the extent to which our education and training system fails to prepare individuals to participate fully in the new economy few disagree that improvements are needed The National Center for Research in Vocational Education NCRVE sponsored The Policy Planning Exercise on Education and the New Economy in 1997 so that vocational education researchers federal and state vocational education officials leaders of nonprofit organizations with an interest in this area and representatives of the business community could discuss options relevant for education and training This report highlights participant discussions *New Economy* Hans Dietrich von Loeffelholz,Roland Döhrn,Michael Rothgang,Klaus Löbbe,Jochen Dehio,Rainer Graskamp,Waike Moos,2003-11-07 For many observers the beginning of a dynamic economic and stock market upswing in the U S in the mid 1990s marked the start of a new era the times of the new economy This phenomenon has been under intense discussion ever since both in the political arena as well as among scientists Thereby the somewhat glamorous term new economy reflects the conviction held by its proponents that the use of new technologies will lead to a never ending acceleration of technological progress and economic welfare The origins of this development date back a long time More than 30 years ago the starting point was the basic innovation digitilization Production as well as application of information and communications technologies ICT are based on this principle At the beginning of the seventies the first microprocessor was produced Some ten years later the first personal computer was brought onto the market The commercial use of the Internet has begun in the mid nineties In view of the economic boom in the U S accompanying the introduction of the Internet the question arises as to what extent the new economy actually has exerted lasting positive effects on productivity not only in the United States but also worldwide Inspired by these developments the Federal Ministry of Economics and Technology commissioned RWI Essen to study the driving forces of the new economy In this report the trends of the ICT sector and of the use of ICT products are analyzed with respect to the overall economic effects in Germany in comparison to the U S Further analyses were carried out regarding the intensity and effects of e business Finally the influence of different methods of price measurement on productivity was analysed since this is important for international comparisons of total factor productivity The study culminates in a growth accounting calculation separating the contributions to economic growth by capital labor and technological progress Resources in Education ,2001-10 Education And The New Economy: Views From A Policy Planning Exercise.
