Investing in People Tony White, 2001 *Self-Identity Narratives of Chinese Students in the United States* Sarah Y. Köksal, 2023-01-31 While previous research has explored the academic adaptation or acculturation processes of Chinese students studying abroad limited attention has been paid to students own perspectives and narrations of their experience To contribute to a more nuanced understanding of this highly mobile group this study takes a closer look at the students self identity narratives How do they make sense of their foreign adventure How do they position themselves among their peers and their family members as well as within the greater transnational context Based on 29 in depth biographical interviews with Chinese students in the United States the findings show the participants continuously interpreting and revising their individual academic and cultural identities In the familial context a recurring narrative of the high potential only child could be observed Many students and their family members felt that their unique talents and personalities were not appreciated within the Chinese educational system and thus sought more holistic environments abroad **Korea and the Knowledge-based Economy** Carl J. Dahlman, Thomas Andersson, 2000 Korea is a country with limited natural resources

which has developed through a strategy of industrialisation and the economies of scale However this is being challenged by the rise of knowledge as a principal driver of competitiveness This book is the result of a joint study by the OECD and the World Bank to develop a comprehensive set of national policy responses to the knowledge revolution It concentrates on four areas 1 an institutional and economic regime that provides incentives for the creation of new knowledge and its efficient use 2 an educated and entrepreneurial population 3 a dynamic information infrastructure 4 an efficient system of innovation

The Education Systems of Europe Wolfgang Hörner,Hans Döbert,Botho von Kopp,Wolfgang Mitter,2007-05-03

Education is a paradoxical phenomenon On the one hand it is universal as since the period of Enlightenment it has been declared universal good for everybody Moreover we learnt by historical research following the ideas of world system theory that since this time as far as its main structures are concerned compulsory state education given by professional teachers in classrooms it took even universal traits However on the other hand the fact that education became state education organised or at least controlled by the state was the beginning of another tradition line education in the form of state organised educational institutions became a means of creating national identity Universal inclusion as for the light of reason shining for everybody is opposed to more or less nationalist exclusion of all the others shaping the feature of a particular nation state with a particular educational system This fundamental dialectical tension between the universal and the particular was one to the important motives to make this handbook One of the central issues of the country studies is precisely to display the relationship between universal values and the search for national identity Another motive is given by the European dimension of the handbook

The Age of Knowledge James Dzisah, Henry Etzkowitz, 2011-10-14 The Age of Knowledge emphasizes that the ongoing transformations of knowledge both within universities and for society more generally must be understood as a reflection of the larger changes in the constitutive social structures within which they are invariably produced translated and reproduced

intervention The centrepiece is dialogic teaching a proven tool for advancing students speaking thinking learning and arguing and an essential response to the corrosion of democracy and the nihilism of post truth Part 4 goes global It investigates governments PISA fuelled flirtations with what they think can be adapted or copied from education elsewhere examines the benefits and pitfalls of international comparison and ends with the ultimate policy initiative the United Nations mission to ensure inclusive and equitable quality education for all the world s children Education in Spite of Policy is for all those teachers students school leaders and researchers who value the conversation of policy evidence and practice and who wish to explore the parts of education that policy cannot reach
