macro analytic questions What are the conditions in which educational policy is successfully formulated How is this educational policy implemented What are the consequences of this policy From the start West Germany demanded a complete dismantling of the educational system in the former German Democratic Republic West German political leaders insisted as a condition of unification that all important agreements concerning education made by the GDR states be accepted by the new states The authors research shows that even before the unification East Germans had already opted for a system consistent with West German education law However the West Germans disregarded these changes and imposed their own version of reform on East Germany The study reveals that in this period of confusion the East Germans did not fully analyze the implications of the imposed conditions which now have unforeseen negative consequences The German situation is of great interest to all educators particularly students of educational policy making as well as researchers in political science economics and sociology

Quality

Education for All Dean H. Nielson, William K. Cummings, 2014-04-08 Modern education conceived in the late 18th century and expanded in the early 19th century to promote enlightenment and social equality may finally be nearing its institutional limit Over the past decade following nearly a century of steady gains there has been little further advancement in modern education The modern system has proved effective in serving the interests of the established core of contemporary society but ineffective in reaching for the periphery The contributors to this volume offer various corrective approaches to correct this state of affairs Educational Restructuring in the Context of Globalization and National Policy Holger Daun, 2002 This study posits that global change is being driven mainly by financial forces new patterns of economic growth and market ideology It then goes on to examine the forces opposing such globalizing processes such as religious and ethnic social movements throughout Africa Asia and Latin America **Third World Education** Anthony R. Welch, 2002-05-03 This book debunks the argument that quality in education can only be achieved by limiting or trading off equality The quality of schooling is a major issue for Third World nations across the globe However there is no single measure which is universally accepted Whether it is as some economists might argue an issue of the number of desks per classroom or one of national sovereignty is widely disputed Defining equality in education becomes increasingly difficult in an era of globalization in which there exists a wide gap between rich and poor both within and between nations In the context of an international move towards New Right politics and neo liberal economic ideologies both the quality and equality of education are imperiled This book argues that any worthy definition of quality education must include the interests and participation of the underprivileged *Social Justice and Third World Education* Timothy J. Scrase, 2014-05-01 First Published in 1997 The impact of international social change is already having a marked effect on the Third World in their internal policies budgets and development programs This collection of original articles addresses the importance of education in the creation of social and developmental policies the effect of international changes on education investment of limited resources in Third World nations the control of third world elites over education and its continuation the place of women and ethnic minorities in the educational schemes of the Third World nations examined and country regional case studies Africa India China South America *Politics of Classroom Life* Nobuo Shimahara, 1998 First Published in 1998 Routledge is an imprint of Taylor Francis an informa company British Further Education A.
