## **Educational Administration:**

*Educational Administration* Robert Palestini, 2005-08-17 Educational Administration Leading with Mind and Heart 2nd edition takes an organization development approach to producing effective leadership Picture yourself standing in the middle of a dense forest Suppose you were asked to describe the characteristics of the forest what types of trees are growing in the forest how many acres of trees are there where are the trees thriving where are they not Faced with this proposition most people would not know where to start and would not be able to see the forest for the trees Newly appointed school administrators often have these same feelings of confusion when faced with the prospect of having to assume a leadership role in a complex organization like a school or school system Where does one start An effective way to start would be to systematically examine the components that make up an organization Such a system of organizational diagnosis and prescription will lead to a comprehensive and integrated analysis of the organization s strengths and weaknesses and point the way toward possible improvement This book suggests such a sequential and systematic approach Utilizing it effectively can produce dramatic and useful results Education, Management, and Participation Sherry Keith, Robert Henriques

**The Knowledge Base in Educational Administration** Robert Donmoyer, Michael Imber, James Joseph Scheurich, 1995-07-01 For scholars and practitioners who are interested in or are concerned about knowledge based issues this book provides a needed antidote to narrow discussions of foundational issues The editors of this book maintain that discussions of a knowledge base in educational administration have typically been limited to a fairly traditional range of scholarly commentary reflective of the status quo within departments of educational administration over the past several decades Other views such as feminist views race ethnic based orientations those that dispute the very idea of a knowledge base and those that simply expand the traditional range have been given little attention within the knowledge base discourse The purpose of this book is thus to open up this discourse by broadening the range of viewpoints being considered

**Educational Administration** M.s.khan, 1980 **Approaches to Administrative Training in Education** Joseph Murphy, Philip Hallinger, 1987-01-01 The book addresses a long felt need to describe and investigate the education and training of school administrators The topic is especially timely with the current emphasis on educational reform and reports from the effective schools research which puts emphasis on the quality of leadership especially principals Patricia A Schmuck Lewis and Clark College In this important new collection Murphy and Hallinger bring together descriptions of a wide range of the new models

in use in educational administrative training Most of these eleven models have developed in response to contemporary criticism of the educational administrative theory movement and each in its own way strives to bridge the chasm between educational theory and practice The approaches represented here stress the importance of the administrators engagement in the daily life of the school and encourage administrators to learn from one another While some models have come from leadership academies others have been developed and tested in state departments of education professional associations and educational institutions The book represents an important resource for those working with pre and inservice administrators as they learn ways in which their involvement can improve the nation s schools
