Educational Planning In A Frontier Zone:

Educational Planning in a Frontier Zone Adele M. E. Jones,1993 This book examines the factors affecting educational planning in a developing society especially in an area bound by strict tribal traditions and categorized as poorly developed and resourced North West Frontier Province of Pakistan International interests and internal power conflicts add to the difficulties and uniqueness of such planning The book is cross disciplinary although it focuses on planning for education It breaks new ground by proposing theories of change which are rarely considered in educational planning and questions the role of formal education in relation to development and suggests that various systems of education exist in the society under study It proposes that analysis and consideration of social structures such as Khanism and Maliki system Jirga and Hujra be built into planning rather than work against it or in isolation from it

The International Handbook of Educational Research in the Asia-Pacific Region J.P. Keeves,Ryo Watanabe,2013-11-11 The aim of the Handbook is to present readily accessible but scholarly sources of information about educational research in the Asia Pacific region The scale and scope of the Handbook is such that the articles included in it provide substantive contributions to knowledge and understanding of education in the Asia region In so doing the articles present the problems and issues facing education in the region and the findings of research conducted within the region that contribute to the resolution of these problems and issues Moreover since new problems and issues are constantly arising the articles in the Handbook also indicate the likely directions of future developments The different articles within the Handbook seek to conceptualize the problems in each specific content area under review provide an integration of the research conducted within that area the theoretical basis of the research the practical implications of the research and the contribution of the research towards the resolution of the problems identified Thus the articles do not involve the reporting of newly conducted research but rather require a synthesis of the research undertaken in a particular area with reference to the research methods employed and the theoretical frameworks on which the research is based In general the articles do not advocate a single point of view but rather present alternative points of view and comment on the debate and disagreements associated with the conduct and findings of the research Furthermore it should be noted that the Handbook is not concerned with research methodology and only considers the methods employed in inquiry in so far as the particular methods of research contribute to the effective investigation of problems and issues that have arisen in the conduct and provision of education at different levels within the region

Dependence, Domination and Legitimacy Adele Mavis Ellen Jones,1989

John Frith, Scholar and Martyr Brian Raynor,2000 John Frith was one of the outstanding academics of his time He had a clear logical mathematical mind was highly respected and influenced many Yet in 1553 at the age of 30 he was burnt at the stake for writing books supporting doctrines of Reformation This work discusses his life

Globalisation, Employment and Education in Sri Lanka Angela W. Little,Siri T. Hettige,2014-05-23 Since the late 1970s Sri Lanka has undergone a socio economic transformation from protectionism towards economic liberalisation and

increasing integration into the world economy Through a systematic comparison of these periods of economic change 1956 1977 and 1977 to the present Angela W Little and Siri T Hettige examine the impact of this transformation on education youth employment and equality of opportunity in Sri Lanka The book charts Sri Lanka s shift from a predominantly agricultural economy to one dominated by services and manufacturing a reduction in unemployment rising educational and occupational levels expectations and achievements and a reduction in poverty In turn it reveals a growing role for the private sector and foreign interests in post secondary education and a modest growth in private education at the primary and secondary levels as well as widening social disparities in access to qualifications training and skills The Sri Lankan experience of and engagement with globalisation has been tempered by a long running ethnic conflict that hindered economic and social development and diverted considerable public funds into defence and war Now that the war is won the challenge is how to invest in human resource development and the fulfilment of the expectations of youth from all ethnic and social groups This challenge requires serious policy analysis the generation of more state revenues the reallocation of existing public resources and a political commitment to the winning of a sustainable peace and stability This book makes an important contribution to the broader international literature on the implications of globalisation for education policy and practice and to the interaction of exogenous and endogenous forces for educational change It deals with the tension between the high social demand for education and the growing demand for specialised skills in a changing economy As such it has a wide interdisciplinary appeal across education policy and politics Asian education South Asian society youth policy sociology of education political economy of social change and globalisation *State and Nation in South Asia* Swarna Rajagopalan,2001 What makes a national community out of a state Addressing this fundamental question Rajagopalan studies national integration from the perspective of three South Asian communities Tamilians in India Sindhis in Pakistan and Tamils in Sri Lanka that have a history of secessionism in common but with vastly different outcomes Rajagopalan investigates why integration is relatively successful in some cases Tamil Nadu less so in others Sindh and disastrous in some Sri Lanka Broadly comparative and drawing together multiple aspects of political development and nation building her imaginative exploration of the tension between state and nation gives voice to relatively disenfranchised sections of society Pathways to Educational Transformation and Development Norrel A. London,2003 A significant turning point in education in developing nations took place as the designated countries acceded to political independence having crossed the border from centuries of colonial rule Education was ascribed human capital value and was considered a vital contribution to the planning and development process In *Pathways to Educational Transformation and Development* Dr London chronicles this transformation in education in one developing nation Trinidad and Tobago Strategies adopted as well as some triumphs and failures are highlighted but the lessons that the episodes impart to the educational development planner are the most enduring features of the book *Pathways* is a significant contribution to the international thrust of education development in

the aftermath of decolonization **The Journal of Land & Public Utility Economics** ,1929 **American Collegiate Populations** Colin Burke,1982-10 American Collegiate Populations is an exhaustive and definitive study of the membership of American colleges and universities in the nineteenth century Colin B Burke explores the questions of who went who stayed and where they came from presenting as answers to these questions a mass of new data put together in an original and interpretive manner The author offers a devastating critique of the two reference works which until now have commanded scholars attention Burke examines Bailey Burritt s Professional Distribution of College and University Undergraduates 1912 noting that Burritt s categories oversimplify the data of the 37 institutions he studies Donald G Tewksbury s American Colleges and Universities Before the Civil War 1932 the author explains presents a skewed interpretation of collegiate decline in the antebellum period Using a far larger data base and capitalizing on the advances in quantitative history made in the last decade Burke adopts appropriate analytic categories for college students and their subsequent careers American Collegiate Populations thus becomes the referent work to replace Burritt and Tewksbury and will likely have an equal longevity in print American Collegiate Populations systematically compares denominational colleges colleges by region and student groups from a host of angles age entering college geographical origins parental occupations subsequent careers and professional choices Burke shows the reach of American colleges back into the socio economic fabric of the culture a reach that carries implications for many subjects religious economic social and intellectual beyond the mere subject of college alone Few works force the re thinking of a whole field of historical inquiry particularly one that has important bearings on current policy as Burke s study does The findings and implications presented in American Collegiate Populations will profoundly affect the scholarly community for decades to come *Diversity and Unity in Education* Brian Holmes,2022-03-10 First published in 1980 Diversity and Unity in Education is the result of a conference set up to analyse criteria of diversity in education comment on the politics of decision making where diversity exists and review in comparative perspective policies within countries and regions which have been designed to achieve educational harmony Issues associated with the provision of separate education on the basis of sex and intelligence are identified and discussed The extent to which national and local government officials teachers and parents should and do participate in policy decisions is also analysed International organisations research workers and consultants will find the volume valuable for the direction it gives to research studies in education University teachers of comparative education and those involved in multicultural education will find topics on which further research can be developed and postgraduate teaching can be based The contributors are all distinguished international educationalists who have devoted their careers to the analysis of multicultural education in a world perspective They are drawn from east and west Europe North America Africa and Latin America [The Medieval Frontiers of Latin Christendom](#) Felipe Fernandez-Armesto,2017-05-15 The aim of this first volume in the series The Expansion of Latin Europe is to sketch the outlines of medieval expansion illustrating some of the major topics that historians

have examined in the course of demonstrating the links between medieval and modern experiences The articles reprinted here show that European expansion began not in 1492 following Columbus s voyages but earlier as European Christian society re arose from the ruins of the Carolingian Empire The two phases of expansion were linked but the second period did not simply replicate the medieval experience Medieval expansion occurred as farmers merchants and missionaries reduced forests to farmland and pasture created new towns and converted the peoples encountered along the frontiers to Christianity Later colonizers subsequently adapted the medieval experience to suit their new frontiers in the New World
