**Central Europe** Virag Molnar, 2013-10-08 The built environment of former socialist countries is often deemed uniform and drab an apt reflection of a repressive regime Building the State peeks behind the grey facade to reveal a colourful struggle over competing meanings of the nation Europe modernity and the past in a divided continent Examining how social change is closely intertwined with transformations of the built environment this volume focuses on the relationship between architecture and state politics in postwar Central Europe using examples from Hungary and Germany Built around four case studies the book traces how architecture was politically mobilized in the service of social change first in socialist modernization programs and then in the postsocialist transition Building the State does not only offer a comprehensive survey of the diverse political uses of architecture in postwar Central Europe but is the first book to explore how

transformations of the built environment can offer a lens into broader processes of state formation and social change **The Limits Of Globalization** Alan Scott,2013-01-11 Both the force and the limitations of the globalizing forces operating in the world today can best be understood through an analysis of their concrete manifestations Using examples from the people s art of Potsdammer Platz to the ways in which Western cultural icons are reinterpreted in Asian magazines this collection of essays unpicks the rhetoric of globalization in political analysis cultural theory and urban and economic sociology and exposes the myth of the global society as in many cases a dangerous exaggeration Staging the New Berlin Claire Colomb,2013-06-17 This book explores the politics of place marketing and the process of urban reinvention in Berlin between 1989 and 2011 In the context of the dramatic socio economic restructuring processes changes in urban governance and physical transformation of the city following the Fall of the Wall the new Berlin was not only being built physically but staged for visitors and Berliners and marketed to the world through events and image campaigns which featured the iconic architecture of large scale urban redevelopment sites Public private partnerships were set up specifically to market the new Berlin to potential investors tourists Germans and the Berliners themselves The book analyzes the images of the city and the narrative of urban change which were produced over two decades In the 1990s three key sites were turned into icons of the new Berlin the new Postdammer Platz the new government quarter and the redeveloped historical core of the Friedrichstadt Eventually the entire inner city was staged through a series of events which turned construction sites into tourist attractions New sites and spaces gradually became part of the 2000s place marketing imagery and narrative as urban leaders sought to promote the creative city By combining urban political economy and cultural approaches from the disciplines of urban politics geography sociology and planning the book contributes to a better understanding of the interplay between the symbolic politics of representation through place marketing and the politics of urban development and place making in contemporary urban governance **Historical Dictionary of Berlin** Ulrike Zitzlsperger,2021-01-21 After World War II Berlin became one of the playgrounds of the Cold War the Berlin Wall made the division between East and West between capitalism and communism in 1961 highly visible though it did remove Berlin from front line politics East and West Berlin had turned into shop windows of ideologies West Berlin representing the lure of a market economy East Berlin the promise of socialism It is then fitting that the fall of the Wall in 1989 awarded Berlin such a prominent role It was here that the development after Reunification of East and West became a closely observed event and well beyond Germany Berlin appeared to represent fundamental developments throughout Europe at the time Today Berlin is the capital of reunified Germany and therefore one of the key political players in the European Union EU and it s now a desirable destination for young entrepreneurs The Historical Dictionary of Berlin contains a chronology an introduction and an extensive bibliography The dictionary section has more than 300 cross referenced entries on important personalities places institutions and events This book is an excellent resource for students researchers and anyone wanting to know more about Berlin *Avery Index*

**Constructing New Berlin** Phoenix Art Museum, 2006

Berlin is poised to emerge as one of the world's most exciting centers of contemporary art. As artists from different countries flock to the new capital of reunified Germany, its major museums are undergoing a massive renovation while grant programmes and inexpensive studio space are giving new talents the chance to create and display their art. Published in conjunction with a major exhibition at the Phoenix Museum of Art, this catalogue is the first comprehensive survey of the artistic renaissance of post-wall Berlin. Many of the works, which include paintings, sculpture, photography, film, installation, sound and performance art, were completed in this century. In addition to colour illustrations of each of the works, this volume includes essays on the Berlin art scene, the city's recent architecture and what the future may hold for this exciting nexus of creativity.

**Der Potsdamer Platz** Yamin von Rauch, 2000

Der Potsdamer Platz in den 20er Jahren lebendiges Zentrum der Metropole Berlin ist nach Kriegszerstörung und Mauerbrüche zu neuem Leben erwacht. Architekten aus aller Welt wie Renzo Piano, Helmut Jahn, Rafael Moneo und Arata Isozaki haben ein aufregendes Stadtquartier im Herzen Berlins geschaffen. Der vorliegende zweisprachige Band (dt./engl.) erzählt seine Geschichte von den Anfängen bis zum Mauerbau (1961) bis zur jüngsten Gegenwart zusammen und versucht eine kritische Annäherung an das städtebauliche Phänomen Potsdamer Platz. Die Fotografien von Alexander Schippel präsentieren den Platz erstmalig nicht mehr als Baustelle, sondern als beeindruckend inszeniertes Experimentierfeld urbaner Architektur in Berlin. Mit Beiträgen von Roland Enke, Werner Sewing und Hans Wilderotter.
