its impact on the rest of the world China's Economic Development Strategies: Transformation And Innovation Rui Liu, 2020-04-28 China is a powerful engine of the global economy and the country's rise is undoubtedly the outcome of its protracted campaign of designing and implementing national development strategies since the founding of the People's Republic of China in 1949. This book reviews the transformation and innovation of China's economic development strategies, especially Deng Xiaoping's Three Step strategy and Xi Jinping's internal and external strategies. By introducing the concept of strategic paradigm, it analyzes the theoretical basis of myriads of economic development strategies and predicts China's choice. With the evolutionary process and the outstanding problems in national development planning as the main thread, it discusses the improvement of the national planning system, specifically of the national overall planning system, the regional planning system, the interplay and conflict between regional planning. It also studies the reform of city county planning system, major function oriented zones (MFOZs) and planning legislation and institutionalization. It also attempts to put forward proposals to coordinate the interests of planning departments and make different types of planning at different administrative levels compatible.

China's Economic Development and Democratization Yanlai Wang, 2017-03-02 China's Economic Development and Democratization examines China's transformation from an institutional perspective. It proposes an analytical framework comprising six macro institutional environments: international, ideological, political, economic, constitutional, and civil social, to analyze the Chinese transition. Through an institutional analysis of the ruling elite's policy institutionalization, it tries to answer three main questions: Will China's economic reforms lead to a meaningful political reform? Will economic freedom lead to political freedom? Will economic development lead to political democratization? The major findings from the institutional analysis of the dynamic interactions between political actors and institutions suggest that China is moving closer towards democracy. Students and scholars who are studying or conducting researches on the Chinese economy, society, or politics will find this book of particular interest.

China's Economic Development Cai Fang, 2022-10-20 Cai Fang is one of China's most distinguished economists. This book elucidates the worldwide significance of China's economic development over the past 70 years from the perspectives of economic history and growth theory. The Chinese economy has undergone an unprecedented period of growth and development since the reform and opening up in the late 1970s, a process which the hallmarks of neoclassic economic theory have often proved inadequate to explain. Examining the Chinese economy in the light of Chinese history and the development of the world economy as a whole, the book charts the milestones and critical reforms of China's economic development, providing insights into unique attributes as well as more generic patterns. The discussion covers multiple hot topics in the field, including the so-called Great Divergence, dual sector economic development, real world experience of the reform and opening up, rural reform, urbanization, economic reform, poverty reduction, the latter day slowdown of China's economic growth, and China's role in and response to globalization, global supply domination, and other headwinds. The book will be a must read for students, scholars, and general
