

Myth #1: "France's higher birth rate leads to higher potential growth."

Truth: France's fertility rate is higher than Germany's, but 2017 and 2018 potential growth for Germany is higher than that for France.

Myth #2: "French productivity is higher due to higher unemployment."

Truth: Even after adjusting for unemployment rate, France's labor productivity is 1.4 percent higher.

Myth #3: "Fiscal austerity is stronger in Germany than in France."

Truth: Since 2013, German public spending has increased at a pace more than twice that of France.

Myth #4: "France lost the competitiveness race to Germany."

Truth: Between 2012 and 2017, after France decided to tackle its lagging competitiveness, German labor costs rose thrice as fast as those in France.

Myth #5: "German SMEs perform better than French ones."

Truth: In terms of profit margins, France's small and medium enterprises outperform Germany's. In France, the profit margin is 3.1 percent; in Germany, it is only 2 percent.

Myth #6: "France is Germany's main trading partner."

Truth: Germany is France's leading bilateral trade partner. But China, and not France, is Germany's top bilateral trade partner.

Myth #7: "Because it is growing faster, Germany must be investing more than France."

Truth: Since 2002, France's total investment-to-GDP ratio - which indicates how much a country is investing in new equipment, technology and research - has been consistently above that of Germany.

Economic Development Of France Germany:

The Economic Development of France and Germany, 1815-1914 Sir John Harold Clapham, 1928 *The Economic Development of France and Germany 1815-1914* John Harold Clapham, 1955 Economic Development in the Nineteenth Century L.C.A. Knowles, 2013-11-05 Taken in conjunction the author's earlier *Industrial and Commercial Revolutions in Great Britain during the Nineteenth Century* this classic volume provides a thoroughly workmanlike study of the rise and progress of industrialism Here she surveys the main developments in the agricultural industrial mechanical transport and commercial policy of France Germany Russia and the United States It provides the handiest manual available of the comparative history of industrialism It is an absolute godsend to students This book was first published in 1932 *Economic Development in the Nineteenth Century* Lilian C. A. Knowles, 1952 The Economic Development of France J. H. Clapham, 2015-06-17 Excerpt from *The Economic Development of France And Germany 1815 1914* For some years now I have lectured at Cambridge over the ground covered by this book In 1907 I published in Vol x of the *Cambridge Modern History* a chapter part of which corresponds in matter and I daresay sometimes in words with the earlier chapters which follow I was urged by friends to put all my material into book form for the use of the growing body of those at Cambridge and elsewhere who now study European economic history and are handicapped by the lack of books in English and of comprehensive books in any language I have written with an eye to them but I hope what I have written may interest others At first I planned a history of West European economic development in the nineteenth century but I abandoned this notion after discussion for fear that such a book would be either outrageously long or overcrowded with dry and unexplained detail Even as it is in this attempt to put French and German economic history into a West European framework the references to several topics will I am sure seem deficient in analytical explanation to many readers Footnotes have been reduced to a minimum so some account of the sources on which I have drawn most may be given here For the earlier period there is a bibliography to my chapter in the *Modern History* About the Publisher *Forgotten Books* publishes hundreds of thousands of rare and classic books Find more at www.forgottenbooks.com This book is a reproduction of an important historical work *Forgotten Books* uses state of the art technology to digitally reconstruct the work preserving the original format whilst repairing imperfections present in the aged copy In rare cases an imperfection in the original such as a blemish or missing page may be replicated in our edition We do however repair the vast majority of imperfections successfully any imperfections that remain are intentionally left to preserve the state of such historical works **The Economic Development of France and Germany** John Harold Clapham, 1936 *The Economic Development of France and Germany, 1815-1914* Sir John Harold Clapham, 1921 Economic Development in the Nineteenth Century Lilian Charlotte Anne Knowles Tomn, 1964 The Economic Development of France and Germany, 1815-1914 J H Clapham, 2025-05-22 *The Economic Development of France and Germany 1815 1914* by J H Clapham offers a detailed examination of the economic trajectories of France and Germany during a pivotal period of

industrialization and modernization This historical analysis delves into the factors that shaped the economic landscapes of both nations exploring their distinct paths of development trade policies and industrial growth Clapham TM s study provides valuable insights into the economic policies technological advancements and social changes that influenced the rise of France and Germany as major economic powers in the 19th century It remains an essential resource for understanding the complex interplay of economic social and political forces that defined this transformative era in European history This work has been selected by scholars as being culturally important and is part of the knowledge base of civilization as we know it This work was reproduced from the original artifact and remains as true to the original work as possible Therefore you will see the original copyright references library stamps as most of these works have been housed in our most important libraries around the world and other notations in the work This work is in the public domain in the United States of America and possibly other nations Within the United States you may freely copy and distribute this work as no entity individual or corporate has a copyright on the body of the work As a reproduction of a historical artifact this work may contain missing or blurred pages poor pictures errant marks etc Scholars believe and we concur that this work is important enough to be preserved reproduced and made generally available to the public We appreciate your support of the preservation process and thank you for being an important part of keeping this knowledge alive and relevant

Maquito,2024-12-10 One feature

of this book is the clarification of the development mechanism of Asia as a regional economy for over half a century based on an Asian Economy Within the Global Economy approach that goes beyond the single country analytical framework. The development of emerging economies has caught the world's attention from the Newly Industrializing Countries or Newly Industrializing Economies of the 1980s to the BRICs entering this century. General economics cannot clarify the internal mechanism of the changing of newly industrialized economies led by Asia. This book clarifies such regional development structure by focusing on the direct investments of multinational firms and the importance of gradual changes of specific policies adopted by newly industrialized economies. Moreover, the book concretely deals with the US-China trade war and China's Belt and Road Initiative (BRI) as a problem of Asian economies. In so doing, the book not only perceives the structural change of the global economy as a structural change from a US-centric global economy of the twentieth century to a China-centric one but also focuses on the birthing of a new growth frontier in the world economy under a crisis brought about by a war for hegemony between the US and China. The investment initiative through China's BRI has prompted the investment competition between Japan and the US, which has made even stronger the possibility of giving birth to a new economic frontier in Afro-Eurasia. Another feature is the consideration of various issues that confront Asian countries in their search for economic development, using the Philippines as a case study. The analysis of the study points to the importance of a shared growth perspective which is based on an Asian development model and discusses the challenge of overcoming the issues of the economic development model within the region. At the same time, this book studies the significance and new issues as a region of the economy and overseas policies of attention-drawing China.

Economic Development in the 19th Century L.

C. A. Knowles, 1948 National Intellectual Capital and the Financial Crisis in France, Germany, Ireland, and the United Kingdom Carol Yeh-Yun Lin, Leif Edvinsson, Jeffrey Chen, Tord Beding, 2013-08-30 In the first decade of the twenty-first century, the biggest event of worldwide proportion was the 2008 global financial crisis, which was caused primarily by ineffective governance, failed surveillance systems, and implementation flaws. While fiscal and monetary policies succeeded in pulling many countries out of a financial freefall, most economies have performed beneath pre-recession levels as governments continued to struggle with their finances. Examining the financial crisis from the viewpoint of intangible assets provides a different perspective from traditional economic approaches. National Intellectual Capital (NIC) comprised mainly of human capital, market capital, process capital, renewal capital, and financial capital is a valuable intangible asset and a key source of national competitive advantage in today's knowledge economy. The authors, pioneers in the field, present extensive data and a rigorous conceptual framework to analyze the connections between the global financial crisis and NIC development. Covering the period from 2005 to 2010 across 48 countries, the authors establish a positive correlation between NIC and GDP per capita and consider the impact of NIC investment for short-term recovery and long-term risk control and strategy formulation. Each volume in a series of SpringerBriefs on NIC and the financial crisis provides in-depth coverage of

the impact of the crisis the aftermath future prospects and policy implications for a regional cluster This volume focuses on France Germany Ireland and the United Kingdom
