Economic Logistics The Optimization Of Spatial And Sectoral Resource Production And Distribution Systems:

Economic Logistics Sten A. Thore, 1991-10-18 This work uses techniques of optimization and operations research to develop the first comprehensive survey of the entire field of the optimization of resource production and distribution systems Sten Thore proposes an economic logistics that is similar to the well known concept of military logistics but which is expanded to include such features as the optimal location of plants inventories and retail outlets and the management of hierarchical multi echelon production inventory and distribution systems The study of individual features of this supply process is familiar from operations research but Thore joins these elements together into larger analytic structures encompassing the production and distribution system in an entire industry Following an introductory chapter and a review of the saddle point theory coauthored with W W Cooper Thore explores the three dimensions of the supply process synthesis the spatial dimension as in simple transportation systems the vertical dimension extending from resources to finished consumer goods as in activity analysis and the time dimension as in inventory accumulation and investment The combination of these then leads to models of such diverse subjects as regional warehouse systems activity analysis and activity networks multi stage warehouse systems of intermediate goods distribution networks and spatial equilibrium Each chapter contains its own exercises which are solved numerically and discussed in great detail and illustrate such optimization techniques as linear and nonlinear programming goal programming and goal focusing chance constrained programming and infinite games This work is designed for use in graduate courses in economics and mathematics modeling and will also be a useful addition to college and university library collections

Technology Commercialization DEA and Related Analytical Methods for Evaluating The Use and Implementation of Technical Innovation examines both general Research Development commercialization and targeted new product innovation New product development is a major occupation of the technical sector of the global economy and is viewed in many ways as a means of economic stability for a business an industry and a country The heart of the book is a detailing of the analytical methods with special but not exclusive emphasis on DEA methods for evaluating and ranking the most promising R D and technical innovation being developed The sponsors of the research and development may involve universities countries

industries and corporations all of these sources are covered in the book In addition the trade off of environmental problems vis vis new product development is discussed in a section of the book Sten Thore editor and author has woven together the chapter contributions by a strong group of international researchers into a book that has characteristics of both a monograph and a unified edited volume of well written papers in DEA technology evaluation R D and environmental economics Finally the use of DEA as an evaluation method for product innovation is an important new development in the field of R D

commercialization **Operations Research** Jay E. Aronson, Stanley Zionts, 2009-04-01 Drawn from a conference honoring Gerald L Thompson the pioneer of operations research this volume brings together some of the latest writings of major figures in the field The volume is divided into four parts the first part reviews the career and significance of Thompson the second concentrates on linear and nonlinear optimization the third looks at network and integer programming and the fourth provides examples of applications oriented research in manufacturing This volume will be an invaluable resource for all scholars and researchers involved in theory and methodology in operations research and management science *The Diversity, Complexity, and Evolution of High Tech Capitalism* Sten A. Thore, 2012-12-06 In his book Jurassic Park and in the movie based on the book Michael Crichton describes a crazed professor who through techniques of genetic engineering manages to recreate the dinosaurs and giant ferns of 65 million years past Once the giant Tyrannosaurus Rex is brought to life a powerful dynamics sets in evolution The prehistoric world embarks on a collision course with man Researching his book Crichton had been reading up on paleontology and on the mathematical theory of evolution catastrophes and chaos Crichton explains some of the twists of nonlinear mathematics that are rewriting not only thermodynamics physics and chemistry that all grapple with evolving and turbulent processes but also paleontology genetics medicine and even anthropology Collapse and chaos is not limited to prehistoric animal kingdoms and ancient civilizations The collapse of the Soviet Union and the political and economic chaos in its aftermath demonstrate that modern civilizations are just as vulnerable This book aims at reexamining some main portions of the discipline of economics from the point of view of economic change and creativity There are two aspects to this perspective First diversity and complexity The range of different kinds of high technology products available to consumers and producers increases rapidly Each product is the result of a long and complex production hierarchy As these hierarchies grow they deliver ever more diversified and complex high tech goods Other hierarchies fall by the wayside Diagnostics For A Globalized World Sten Thore, Ruzanna Tarverdyan, 2015-03-09 How do you gauge the accomplishments of policy and its failures While a number of nations are successful in optimizing a socio economic welfare function others are woefully falling short of the optimal frontier Diagnostics for a Globalized World proposes a reformulation of the inherited theory of economic and social policy codified in the 1950s by Jan Tinbergen to find a diagnostic tool in measuring the effectiveness of economic and social policy Using a logarithmic adaptation of data envelopment analysis the authors explain how to rank the attainment of nations of multidimensional goals such as those expressed by the UN

Millennium Development Goals MDGs and upcoming Sustainable Development Goals SDGs *Measuring Sustainable Development Goals Performance* Sten Thore, Ruzanna Tarverdyan, 2021-11-27 *Measuring Sustainable Development Goals Performance* provides a quantitative and analytical framework for evaluating social economic and environmental policies aiming at the UN sustainable development goals SDGs Continuing their earlier work on multidimensional analysis the authors demonstrate how nations can be ranked in terms of their performance in meeting a given set of SDGs providing numerical calculation of SDGs deficit Their calculations show that even before the arrival of the COVID 19 virus there existed in several large Western nations undetected pockets of SDG deficits such as in the care for the elderly personal safety and hygiene Extending the calculations to cover COVID 19 data for 2020 it turns out that the same deficit nations also suffered excess death rates caused by the virus This book offers a balanced and holistic paradigm for evaluating progress of the SDGs assisting the convergence of national and international efforts toward economic development social progress and environmental protection 2023 PROSE Awards Winner Category Single and Multivolume Reference and Textbooks in Social Sciences Association of American Publishers Includes novel tools procedures diagnostics and metrics for evaluating the entire spectrum of SDGs in a wide variety of settings Ranks nations according to their social and economic performance based on each nation s unique resource and output indicators Examines international efforts toward shaping a new Social Contract between global partners Delivers a new Calculus of Consent Logical foundation for forging Geneva Consensus for Sustainable Development *A Spatial Equilibrium Analysis of Free Trade Liberalization and the U.S. Dairy Sector* Yong Zhu, Tom Cox, Jean-Paul Chavas, 1998 Journal of Economic Literature , 1993 *Food Processing and Distribution in Transition Countries* Monika Hartmann, 1999 **The American Economic Review** , 1991 **Primal-dual Spatial Equilibrium Model with Intermediate Products** Paulo D.
