Economic Reforms in Latin America Daniel Morrow,1998 *Economic Reform in Latin America* Till Heyde,Carleton University. Dissertation. International Affairs,1995 *Labor and Economic Reforms in Latin America and the Caribbean* ,1995-01-01 Over the past decade most countries in the Latin America and Caribbean Region have stabilized their economies and lowered barriers to international trade Many of the policies aimed at reducing poverty and tackling inequality in the 1960 1980 period were well intentioned but the region made little or no progress in improving income distribution With the recent shift toward market orientation and openness to international trade these countries will need a new approach to labor policy as well as different instruments for addressing income distribution goals This report gives special attention to four areas of labor policy 1 change from direct government intervention in wage determination and strict seniority rules to a system that rewards effort high productivity and good management within a framework that relies on voluntary negotiation of working conditions between workers and firms 2 replacement of job security legislation by a more effective mechanism that protects workers when they change jobs 3 careful design of mandatory contributions to social security and other programs in order to minimize the distortionary effect of labor taxes and 4 redirecting of government subsidies for training and education to the demand side and targeting to those who cannot afford to pay **Growth, Employment, and Equity** Barbara Stallings,Wilson Peres,2010-12-01 A Brookings Institution Press and Economic Commission for Latin America and the Caribbean ECLAC publication In the last ten to fifteen years the Latin American and Caribbean region has undergone the most significant transformation of economic policy since World War II Through a series of structural reforms an increasing number of countries have moved from closed state dominated economies to ones that are more market oriented and open to the rest of the world Policymakers expected that these changes in conjunction with lower rates of inflation and increased spending in the social area would speed up economic growth increase productivity and lead to the creation of more jobs and greater equality Have those expectations been fulfilled Analyzing the impact of the reforms in nine countries Argentina Bolivia Brazil Chile Colombia Costa Rica Jamaica Mexico Peru this study provides a detailed picture of progress to date At the overall regional level the book suggests the reforms have had a surprisingly small impact a small positive impact on investment and growth and a small negative impact on employment and income distribution But at the country sectoral and microeconomic levels it finds evidence of strong effects with some units doing very well and others falling behind

Guardians of the Nation? Glen Biglaiser,2002 Central to the question of how to promote economic growth in Latin America is the role different types of regimes play in determining economic performance *Guardians of the Nation* challenges conventional wisdom regarding the expected advantages of military rule for economic growth Glen Biglaiser explains why many military regimes in Latin America have not performed noticeably better than their democratic counterparts Biglaiser argues that economic policy making under military regimes is essentially an unintended by product of the military s strategy to retain power Using this premise he examines the economic performance of regimes in Argentina Chile and Uruguay

Biglaiser shows that the appointment of neoliberal economists occurred not because military rulers possessed inherent interest in following market oriented policies but because they saw the appointments as a way to solidify their power. Biglaiser's study also depicts Pinochet's one man rule as unique vis vis the military regimes in Argentina and Uruguay. He concludes by demonstrating that his study is also applicable for understanding economic policy choice under democratic rule and by comparing the similarities and differences between presidential and parliamentary governments.
