Displacing Human Rights Adam Branch,2011-06-01 Today Western intervention is a ubiquitous feature of violent conflict in Africa Humanitarian aid agencies community peacebuilders microcredit promoters children s rights activists the

World Bank the International Criminal Court the U S military and numerous others have involved themselves in African conflicts all claiming to bring peace and human rights to situations where they are desperately needed However according to Adam Branch Western intervention is not the solution to violence in Africa but instead can be a major part of the problem often undermining human rights and even prolonging war and intensifying anti civilian violence Based on an extended case study of Western intervention into northern Uganda s twenty year civil war and drawing on Branch s own extensive research and human rights activism there this book lays bare the reductive understandings motivating Western intervention in Africa the inadequate tools it insists on employing its refusal to be accountable to African citizenries and most important its counterproductive consequences for peace human rights and justice In short Branch demonstrates how Western interventions undermine the efforts Africans themselves are undertaking to end violence in their own communities The book does not end with critique however Motivated by a commitment to global justice it proposes concrete changes for Western humanitarian peacebuilding and justice interventions as well as a new normative framework for re orienting the Western approach to violent conflict in Africa around a practice of genuine solidarity A key strength of the book is its ability to analyse and reveal common patterns in seemingly disparate and complex empirical instances of counterproductive human rights interventions in Uganda This book should be required reading for all those working on various themes in Africa today The Journal of Modern African Studies This book provides a pessimistic but much needed critique of the history of foreign intervention in Northern Uganda Responsible discussions of foreign policy must consider the ways in which great power politics can hurt people in the name of protection this book is an excellent place to start that discussion The Christian Science Monitor *Living on the Boundaries* Carol Camp Yeakey, 2012-05-18 From the first chapter to the last this immensely insightful anthology richly details and informs us about the human condition from multidisciplinary perspectives about urban life in global contexts It examines the complex often controversial issues impacting those who live on the margins of society in our densely populated cities *Institutions and Investment in Sudan* Denu G. Berhanu, 2011 This book provides insights into the development of institutions during war and peace times in Sudan and presents an analysis of the impact of institutional variables on investment and economic growth The study combines a new institutional economics framework and a socioeconomic analysis of investment behavior with an analysis of the process of post conflict reconstruction and development in Sudan South Sudan The book contains a wealth of information for policymakers for the development aid community and for researchers based on the results of a cross country analysis of panel data for Sudan and the results of survey data on investment determinants in South Sudan An agenda for institutional reform is suggested for Sudan and South Sudan on the basis of the findings of the study It presents valuable discussions on policy relevant issues for Sudan and South Sudan and it also contains an agenda for economic cooperation between Sudan and independent South Sudan Series Institut fur Weltwirtschaft und Internationales Management Vol 18 The Administration of Debt Relief by the

Africa: Seminar papers Matthew Martin, J. T. Karugia, Margaret Crouch, 2004 Accelerating Africa's Integration Through Micro-Regionalism: The Case of Zambia-Malawi-Mozambique Growth Triangle and Its Impact Kojo B. Asiedu, Olubanke King-Akerele, 2015-06-10 This book is about accelerating Africa's integration through the application of the growth triangle concept. Filled with rich experiences backed by research, this book is also a powerful account of how African countries border areas many of which largely marginalized and clash points of conflicts can be transformed into vibrant socio-economic security zones through local regional development efforts. This book equally creates a necessary kind of working environment where micro-regionalism is given a significant role to play in addressing some of the protracted challenges associated with our continent's larger groupings. A valuable piece of work and absolutely required reading for all of us: politicians, academics, private sector development practitioners, NGOs.
