**Behavioural Foundations of Economics** J. Baxter,2016-07-27 In recent years work on what may broadly be described as behavioural economics has expanded rapidly and is now attracting the attention of leading figures in economics such as Kenneth Arrow Much of the work however has concentrated on particular aspects of individual and aggregate behaviour The book attempts to construct a unified framework showing both how behavioural variables form the basis of economic activity and how behavioural and economic variables interact to determine individual and aggregate behaviour

**International Trade, Capital Flows and Economic Development in East Asia** Anthony Bende-Nabende,2017-03-02 The book provides an understanding of how international trade and capital flows have engineered the development process in East Asia and examines the real and potential challenges that the region is expect to encounter in the twenty first century It integrates four topics i e capital flows East Asia globalization and economic development that are at the centre of the social political and economic debate The text highlights the region s growing strategic importance in the twenty first century globalizing world where transnational corporations are playing an increasingly decisive role in the global distribution of production and trade It blends generalised regional analyses with country specific case studies in the world s most dynamic region It is so well designed that each of the seventeen countries that comprise the region gets some space for discussion Thus the text is a valuable contribution to the social science and business literature with a special focus on the now strategic region of East Asia
