**Biblical Economic Policy: Ten Scriptural Truths for Fiscal and Monetary**

**Decision-Making** David Arnott PhD, Sergiy Saydometov PhD , 2021-09-06 What does the Bible say about economics A lot What about socialism which is becoming an increasingly common concern in US economic policy discussions In Biblical Economic Policy Arnott and Saydometov build a biblical framework for analyzing national economic policy that takes on everything from taxes to spending to tariffs to minimum wage The Bible has something to say about all these critical present day issues and this book explains how to apply it to 21st century policies Authors Dave Arnott and Sergiy Saydometov hold up the mirror of the Bible and ask their fellow Christians Is this the way we re supposed to run a biblical economy What the book is not It is NOT a financial advice book It is NOT about how to apply business principles at work It is NOT about stewardship or giving It is NOT about how to run your business for the glory of God Biblical Economic Policy takes the macroeconomic view and analyzes how well America s economic policies align with biblical principles This book tackles difficult present day economic policies including taxes spending national debt interest rates and money supply Written with sound biblical grounding in accessible language Biblical Economic Policy will turn the common reader into a biblical economic analyst **Decision making behaviour and its influence on social and economic performance of farm**

**households in Hyderabad-Karnataka region** Nagesh N. S, Amrutha T. Joshi , Prem Jose Vazhacharickal, Farmers in developing countries are frequently exposed to the uncertainties of weather prices and disease Thus decision making

behaviour plays a crucial role every day affecting farming operations The study was carried out in Raichur Kalaburagi and Koppal districts From each district two taluks were selected and from each taluk two gram panchayats were selected randomly and from each panchayat a village was selected randomly From each selected village 15 farmers were randomly selected and the total sample size constituted 180 respondents The attitude of farmers towards farming in irrigated situation was better than the attitude of farmers in rainfed situation The overall decision making behaviour was better in irrigated situation compared to rainfed situation Achievement motivation and decision making behaviour were found to be significantly influencing the annual agricultural income As the decision making behaviour score increased by one unit the annual agricultural income increased by 9231 28 Irrigated rainfed dummy number of years of schooling achievement motivation risk orientation and mass media participation were found to be significantly influencing the institutional participation In irrigated situation as evident from the experiment there were 38 per cent of the respondents in the risk averse category In the case of rainfed situation it is alarming to note that as high as 52 per cent of the respondents were in the risk averse group on loss of toss The irrigated farmers were more likely to take up loan in comparison to rainfed farmers Number of family members had a positive influence on migration while the decision making behaviour score had a negative influence on migration There is evidence of framing bias and anchoring bias among the sample respondents The farmers were willing to pay more for weather information compared to market and plant protection information

**Behavioral and neuroscientific analysis of economic decision making in animals** Tobias Kalenscher, Marijn Van Wingerden, The experimental analysis of animal behavior has a rich tradition in psychology behavioral ecology and many other scientific branches dedicated to the study of decision making However it has never enjoyed a similar popularity in economics This has recently changed with the dawn of neuroeconomics a discipline combining the analytic and experimental tools of psychology and economics with the technologies available in neuroscience to unravel the neurobiological mechanisms underlying economic behavior Since many of the sophisticated neuroscientific techniques can only be used on animals neuroeconomists have come up with a large and ever growing repertoire of animal models to probe economic decision making Besides the value of using animals as model systems to emulate human economic behavior the discipline of animal economic decision making exists in its very own right an abundance of animal species at various evolutionary stages show behavior that complies with many of the predictions of economic theory whilst at the same time demonstrating violations of optimal choice models that are reminiscent of similar anomalies found in human behavior Hence the analysis of animal choice does not only offer insights into the evolutionary origins of economic decision making it also testifies that the analysis of animal behavior is a convenient economical and sound way to test competing economic decision models in optimally controlled experimental environments to probe their neural implementation and to yield common denominators in choice behavior In short economic theory provides more than just an alternative language to describe animal psychology its combination with biology psychology and neuroscience gives
