Economy Of Death:

The Economy of Death Richard J. Barnett, 1969 **Economy of Death** Richard J. Barnett, 1969-06 Studies today's military budget and the priorities of the military industrial complex and suggests the economy should be geared to life not death

The Death of Economics Paul Ormerod, 1995 This text questions the abilities of the economists who influence political decisions on the economy Ormerod aims to show that traditional economists view the world in a way which ensures they will never be able to understand it He suggests that economies are not machines but dynamic organisms **Economies of Death** Patricia J. Lopez, Kathryn A. Gillespie, 2015-04-24 Economies of Death Economic Logics of Killable Life and Grievable Death examines the economic logic involved in determining whose lives and deaths come to matter and why Drawing from eight distinct case studies focused on the killability and grievability of certain humans animals and environmental systems this book advances an intersectional theory of economies of death A key feature of late modern capitalism is its tendency to economically order certain human and nonhuman lives and environments while appropriating and commodifying certain bodies and spaces in the process Spanning the social sciences and humanities in its contributions and scope each chapter shows how living beings and places are stripped down to the calculus of their end with profound ethical and political implications for these entities and the world around them From the genocide in Cambodia to the way some animals are considered pets and others food from September 11 2001 and Afghanistan to the politics of redemption for prisoners and ex racehorses in Kentucky these case studies draw from and develop an enriched understanding of bio and necropolitics posthumanism killability and grievability In drawing together the objectification of humans animals and environments and the power laden hierarchies that maintain this objectification this volume highlights how death across these subjects informs and responds to broader geo economic processes This book aims to examine the reach of economies of death across such diverse subjects challenging readers to consider the every day calculus they make in determining whose lives mean more and why The Politics of Death in Anti-colonial Praxis Gregory Maxaulane, 2024-12-16 The Politics of Death in Anti colonial Praxis by Gregory Maxaulane explores the political conditions necessary for revolution and freedom Located at the intersection of continental philosophy and Black studies this book examines the political economy of death within the Black experience in South Africa by theorizing death as a productive and generative process Maxaulane provides a deeper understanding of the politics of death by focusing on how continental philosophy and Black studies treat the problem of praxis as well as the parallels and convergences between the models of praxis they sustain This book is a comprehensive exploration of these fields providing critical engagements with the evolution of ideology and the anti colonial praxis in South African history Challenging liberal democratic doctrines that have undermined the claims of Black radical imagination Maxaulane argues that the political economy of death allows us to break from tradition through a concept of freedom not grounded in transcendentalism **Futures of Life Death on Earth** Philippe Lynes, 2018-11-19 Life on earth is currently

approaching what has been called the sixth mass extinction also known as the Holocene or anthropocene extinction Unlike the previous five this extinction is due to the destructive practices of a single species our own Up to 50% of plant and animal species face extinction by the year 2100 as well as 90% of the world s languages Biocultural diversity is a recent appellation for thinking together the earth s biological cultural and linguistic diversity the related causes of their extinctions and the related steps that need to be taken to ensure their sustainability This book turns to the work of Jacques Derrida to propose a notion of general ecology as a way to respond to this loss to think the ethics ontology and epistemology at stake in biocultural sustainability and the life and death we differentially share on earth with its others It articulates an appreciation of the ecological and biocultural stakes of deconstruction and provokes new ways of thinking about a more just sharing of the earth

Nietzsche's Death of God and Italian Philosophy Emilio Carlo Corriero, 2016-08-31 This book describes the reception of the Nietzschean Death of God within the Italian philosophical debate an ambit traditionally concerned with emphasising the practical political meaning of philosophical thinking Nietzsche's abyssal announcement of the Death of God *mein Wort für Ideale* highlights the necessity to rethink the connection between theory and praxis This is particularly evident in the works of Italian thinkers such as Vattimo Cacciari Colli Masini e Severino who in large part have read Nietzsche's philosophy through the philosophical filter of Marxian culture trying to show the emancipatory charge present in Nietzsche's work and the necessity to rethink the boundaries of the political over the limits of political theology Emilio Carlo Corriero demonstrates how the reception of Nietzsche's pronouncement with its theoretical consequences reveals the specific character of Italian philosophy its eclectic attitude and its attention to the practical political meaning of philosophical thought but also its constant reflection on the concept of history and the origin of Being **The Death Penalty, Volume I** Jacques

Derrida, 2013-12-04 In this newest installment in Chicago's series of Jacques Derrida's seminars the renowned philosopher attempts one of his most ambitious goals the first truly philosophical argument against the death penalty While much has been written against the death penalty Derrida contends that Western philosophy is massively if not always overtly complicit with a logic in which a sovereign state has the right to take a life Haunted by this notion he turns to the key places where such logic has been established and to the place it has been most effectively challenged literature With his signature genius and patient yet dazzling readings of an impressive breadth of texts Derrida examines everything from the Bible to Plato to Camus to Jean Genet with special attention to Kant and post World War II juridical texts to draw the landscape of death penalty discourses Keeping clearly in view the death rows and execution chambers of the United States he shows how arguments surrounding cruel and unusual punishment depend on what he calls an anesthesial logic which has also driven the development of death penalty technology from the French guillotine to lethal injection Confronting a demand for philosophical rigor he pursues provocative analyses of the shortcomings of abolitionist discourse Above all he argues that the death penalty and its attendant technologies are products of a desire to put an end to one of the most fundamental qualities

of our finite existence the radical uncertainty of when we will die Arriving at a critical juncture in history especially in the United States one of the last Christian inspired democracies to resist abolition The Death Penalty is both a timely response to an important ethical debate and a timeless addition to Derrida s esteemed body of work Death Valley National Park, Reconstruction of the Furnace Creek Water Collection System ,2005 **Sporting Realities** Samantha N. Sheppard, Travis Vogan, 2020-09-01 Despite the increasing number of popular and celebrated sports documentaries in contemporary culture such as ESPN s 30 for 30 series there has been little scholarly engagement with this genre Sports documentaries like all films do not merely showcase objective reality but rather construct specific versions of sporting culture that serve distinct economic industrial institutional historical and sociopolitical ends ripe for criticism contextualization and exploration *Sporting Realities* brings together a diverse group of scholars to probe the sports documentary s cultural meanings aesthetic practices industrial and commercial dimensions and political contours across historical social medium specific and geographic contexts It considers and critiques the sports documentary s visible and powerful position in contemporary culture and forges novel connections between the study of nonfiction media and sport *Slavery and Social Death* Orlando Patterson, 2018-10-15 Patterson discusses the internal dynamics of slavery in 66 societies over time These include Greece and Rome medieval Europe China Korea the Islamic kingdoms Africa the Caribbean islands and the American South Slavery he argues is a single process of recruitment incorporation on the margin of society and eventual manumission or death

Agriculture and Rural Society After the Black Death Ben Dodds, R. H. Britnell, 2008 With special emphasis on the period following the Black Death this new collection of essays explores agriculture and rural society during the late Middle Ages Combining a broad perspective on agrarian problems such as depopulation and social conflict with illustrative material from detailed local and regional research this compilation demonstrates how these general problems were solved within specific contexts The contributors supply detailed studies relating to the use of the land the movement of prices the distribution of property the organization of trade and the cohesion of village society among other issues New research on regional development in medieval England and other European countries is also discussed **America's Death Penalty** David Garland, Randall McGowen, Michael Meranze, 2011-01-25 Over the past three decades the United States has embraced the death penalty with tenacious enthusiasm While most of those countries whose legal systems and cultures are normally compared to the United States have abolished capital punishment the United States continues to employ this ultimate tool of punishment The death penalty has achieved an unparalleled prominence in our public life and left an indelible imprint on our politics and culture It has also provoked intense scholarly debate much of it devoted to explaining the roots of American exceptionalism America s Death Penalty takes a different approach to the issue by examining the historical and theoretical assumptions that have underpinned the discussion of capital punishment in the United States today At various times the death penalty has been portrayed as an anachronism an inheritance or an innovation with little reflection on the

consequences that flow from the choice of words This volume represents an effort to restore the sense of capital punishment as a question caught up in history Edited by leading scholars of crime and justice these original essays pursue different strategies for unsettling the usual terms of the debate In particular the authors use comparative and historical investigations of both Europe and America in order to cast fresh light on familiar questions about the meaning of capital punishment This volume is essential reading for understanding the death penalty in America Contributors David Garland Douglas Hay Randall McGowen Michael Meranze Rebecca McLennan and Jonathan Simon **Life Against Death** Norman O. Brown, 2014-10-16 A shocking and extreme interpretation of culture history and the father of psychoanalysis In Life Against Death The Psychoanalytical Meaning of History social philosopher Norman O Brown radically analyzes and critiques the work of Sigmund Freud Brown attempts to define a non repressive civilization draws parallels between psychoanalysis and the theology of Martin Luther and also examines the revolutionary themes present in western religious thought such as ideas found in the work of William Blake and Jakob B hme Life Against Death cannot fail to shock if it is taken personally for it is a book which does not aim at eventual reconciliation with the views of common sense The highest praise one can give to Brown s book is that apart from its all important attempt to penetrate and further the insights of Freud it is the first major attempt to formulate an eschatology of immanence in the seventy years since Nietzsche Susan Sontag One of the most interesting and valuable works of our time Brown s contribution to moral thought cannot be overestimated His book is far ranging thoroughgoing extreme and shocking It gives the best interpretation of Freud I know Lionel Trilling The Shadow of a Dream : Economic Life and Death in the South Carolina Low Country, 1670-1920 Chapel Hill Peter A. Coclanis Professor of History University of North Carolina, 1989-02-23 This important new book charts the economic and social rise and fall of a small but intriguing part of the American South Charleston and the surrounding South Carolina low country Spanning 250 years Coclanis s study analyzes the interaction of both external and internal forces on the city and countryside examining the effects of various factors the environment the market economic and political ideology and social institutions on the region s economy from its colonial beginnings to its collapse in the 19th and early 20th centuries **Dictionary of Political Economy** Robert Harry Inglis Palgrave, 1894
