

The background of the book cover is a painting of a tropical landscape. It features a body of water in the foreground, with several palm trees and a large, spreading acacia tree on the right. The sky is a mix of blue and white, suggesting a hazy or overcast day. The overall style is impressionistic, with visible brushstrokes and a soft color palette.

Nature Conservation in Islamic Tradition Mohd Zuhdi Marsuki, 2024-11-04 This book will discuss the practice of Islamic nature conservation by focusing on Harim and Hima The practice of Harim and Hima is a good model practised by Muslims tradition combining the theory and practice of environmental ethics Such practice should be a new focus in the study of Islamic environmental ethics beyond the theoretical discourse

Confronting the Nation's Water Problems National Research Council, Division on Earth and Life Studies, Water Science and Technology Board, Committee on Assessment of Water Resources Research, 2004-10-14 In order to confront the increasingly severe water problems faced by all parts of the country the United States needs to make a new commitment to research on water resources A new mechanism is needed to coordinate water research currently fragmented among nearly 20 federal agencies Given the competition for water among farmers communities aquatic ecosystems and other users as well as emerging challenges such as climate change and the threat of waterborne diseases Confronting the Nation's Water Problems concludes that an additional 70 million in federal funding should go annually to water research Funding should go specifically to the areas of water demand and use water supply augmentation and other institutional research topics The book notes that overall federal funding for water research has been stagnant in real terms for the past 30 years and that the portion dedicated to research on water use and social science topics has declined considerably

Carbon Accounting and Savanna Fire Management Jeremy Russell-Smith, Brett Murphy, Andrew Edwards, CP (Mick) Meyer, 2015-06-15 In the context of Australia's developing carbon economy fire management helps to abate emissions of greenhouse gases and is an important means of generating carbon

credits The vast high rainfall savannas of northern Australia are one of the world's most flammable landscapes Management of fires in this region has the potential to assist with meeting emissions reduction targets as well as conserving biodiversity and providing employment for Indigenous people in remote parts of Australia's north This comprehensive volume brings together recent research from northern Australian savannas to provide an internationally relevant case study for applying greenhouse gas accounting methodologies to the practice of fire management It provides scientific arguments for enlarging the area of fire prone land managed for emissions abatement The book also charts the progress towards development of a savanna fire bio sequestration methodology The future of integrated approaches to emissions abatement and bio sequestration is also discussed [Sustainable Land Sector Development in Northern Australia](#) Jeremy Russell-Smith, Glenn James, Howard Pedersen, Kamaljit K. Sangha, 2018-09-03 Key Features Provides clear and authoritative recommendations for managing fire in ecological and social contexts Authors are all international leaders in their fields and include not only academics but also leaders of Indigenous communities Explains Indigenous cultural and knowledge systems to a degree that has rarely been accessible to lay and academic readers outside specialized disciplines like Anthropology Responds to growing need for new approaches to managing human ecological systems that are in greater sympathy with Australia's natural environments climate and value the knowledge of Indigenous people Timely for scholarly and interest groups intervention as the Australian government is again looking to develop the north Sustainable Land Sector Development in Northern Australia sets out a vision for developing North Australia based on a culturally appropriate and ecologically sustainable land sector economy This vision supports both Indigenous cultural responsibilities and aspirations as well as enhancing enterprise opportunities for society as a whole In the past well meaning if often misguided policy agendas have failed and continue to fail North Australians This book helps breach that gap by acknowledging and harnessing Indigenous cultural strengths and knowledge systems for looking after the country and its people as part of a smart novel and diversified ecosystem services economy *At Risk* Piers Blaikie, Terry Cannon, Ian Davis, Ben Wisner, 2014-01-21 The term natural disaster is often used to refer to natural events such as earthquakes hurricanes or floods However the phrase natural disaster suggests an uncritical acceptance of a deeply engrained ideological and cultural myth *At Risk* questions this myth and argues that extreme natural events are not disasters until a vulnerable group of people is exposed The updated new edition confronts a further ten years of ever more expensive and deadly disasters and discusses disaster not as an aberration but as a signal failure of mainstream development Two analytical models are provided as tools for understanding vulnerability One links remote and distant root causes to unsafe conditions in a progression of vulnerability The other uses the concepts of access and livelihood to understand why some households are more vulnerable than others Examining key natural events and incorporating strategies to create a safer world this revised edition is an important resource for those involved in the fields of environment and development studies **Planning in an Uncanny World** Nicholas A. Phelps, Judy Bush, Anna Hurlimann, 2022-12-23

This book places Australian conditions and urban planning centrally within comparative analysis of planning systems and cultures around the world to address issues including urban governance climate change transportation planning regional development and migration planning Australian urban conditions and their associated planning responses can and often have been seen as unique or exceptional They are seldom discussed in the same breath as conditions and associated planning systems internationally Yet as well as being somewhat different from those elsewhere in the world Australian urban conditions and planning responses are also somewhat similar They are uncanny strangely familiar yet unfamiliar In this book Australian urban conditions and their planning policies and practices are informally compared and contrasted with those existing internationally If Australian urban planning policy and practice have had limited influence internationally the partial familiarity of challenges posed by its urban conditions ensure that Australia is a more important global reference point for scholarship and practice than commonly is appreciated In this book the authors assert the potential and actual originality of urban planning scholarship arising from the Australian context It will be useful for students and faculty planners working in Australia as well as anyone interested in international planning debates

Wild Rangelands Johan T. du Toit, Richard Kock, James Deutsch, 2012-11-06 Rangeland ecosystems which include unimproved grasslands shrublands savannas and semi deserts support half of the world's livestock while also providing habitats for some of the most charismatic of wildlife species This book examines the pressures on rangeland ecosystems worldwide from human land use over hunting and subsistence and commercial farming of livestock and crops Leading experts have pooled their experiences from all continents to cover the ecological sociological political veterinary and economic aspects of rangeland management today This book provides practitioners and students of rangeland management and wildland conservation with a diversity of perspectives on a central question can rangelands be wildlands The first book to examine rangelands from a conservation perspective Emphasizes the balance between the needs of people and livestock and wildlife Written by an international team of experts covering all geographical regions Examines ecological sociological political veterinary and economic aspects of rangeland management and wildland conservation providing a diversity of perspectives not seen before in a single volume

Forests People and Power Oliver Springate-Baginski, Piers Blaikie, 2013-06-17 With tens of millions of hectares and hundreds of millions of lives in the balance the debate over who should control South Asia's forests is of tremendous political significance This book provides an insightful and thorough assessment of important forest management transitions currently underway MARK POFFENBERGER EXECUTIVE DIRECTOR OF COMMUNITY FORESTRY INTERNATIONAL The contributions in this volume not only breathe life into the field of writing and analysis related to forests they do so on the strength of extraordinarily insightful research Kudos to Springate Baginski and Blaikie for providing us with a set of thoroughly researched provocative studies that should be required reading not only for those interested in community forestry in south Asia but in resource governance anywhere ARUN AGRAWAL ASSOCIATE PROFESSOR OF NATURAL RESOURCES it challenges our assumptions

of the benefits of participatory forest management and the role of forestry in poverty reduction It should be of interest to policy makers and to all those who have been involved with the struggle of transforming forestry over the decades DR MARY HOBLEY HOBLEY SHIELDS ASSOCIATES NATURAL RESOURCE MANAGEMENT AND PLANNING CONSULTANCY A rare combination of extensive field study social science insights and policy studies will be of immense value DR N C SAXENA MEMBER OF NATIONAL ADVISORY COUNCIL GOVERNMENT OF INDIA In recent decades participatory approaches to forest management have been introduced around the world This book assesses their implementation in the highly politicized environments of India and Nepal The authors critically examine the policy implementation processes and causal factors affecting livelihood impacts Considering narratives and field practice with data from over 60 study villages and over 1000 household interviews the book demonstrates why particular field outcomes have occurred and why policy reform often proves so difficult Research findings on which the book is based are already influencing policy in India and Nepal and the research and analysis have great relevance to forestry management in a wide range of countries Published with DFID

Protecting the Oceans Beyond National Jurisdiction Robin Warner, 2009 Knowledge of the marine environment beyond national jurisdiction and its unique biodiversity is still developing Simultaneously traditional uses of these areas including fishing and shipping are intensifying and new uses are emerging such as bio prospecting for marine genetic resources and climate change mitigation activities This volume examines the threats to the marine environment beyond national jurisdiction from existing and emerging human uses and the adequacy of current international law provisions to protect this major part of the global environment An analysis of key provisions in the 1982 United Nations Law of the Sea Convention and complementary principles of international environmental law reveals significant tensions between the concept of high seas freedoms and the international law obligation to protect and preserve the marine environment beyond national jurisdiction The book compares the lack of comprehensive environmental regulation for marine resource exploitation and shipping activities beyond national jurisdiction with the best practice standards for environmental protection being developed by the International Seabed Authority for deep seabed mining exploration Recent initiatives by the international community to study issues relating to conservation of high seas biodiversity are discussed and a range of soft and hard law options to strengthen the international law framework for protection of the marine environment beyond national jurisdiction are considered

Ten Commitments David Lindenmayer, Stephen Dovers, Molly Harriss Olson, Steve Morton, 2008-10-01 In *Ten Commitments* Reshaping the Lucky Country's Environment leading environmental thinkers in Australia have written provocative chapters on environmental issues facing the nation Each chapter includes 10 key issues that must be urgently addressed to improve Australia's environment The book is organised by ecosystem by sector and by cross cutting themes Topics include deserts rangelands woodlands tropical savannas urban settlements forestry tropical and temperate marine ecosystems tropical rainforest alpine and aquatic ecosystems coasts fisheries agriculture mining grazing tourism climate change earth systems water biodiversity

policy and institutional reforms the private sector human population health fire emergency management Indigenous land management and energy With over 40 experts weighing in on Australia's most pressing issues this is a must read for anyone interested in the environment *Environmental Law and the Ecosystem Approach* Froukje Maria Platjouw, 2016-05-05 The ecosystem approach embodies a concept of the environment which emphasizes the integrated components of nature as complex adaptive systems This book examines the relationship between the architecture and design of environmental law and the implementation of the ecosystem approach as a means to maintain ecological integrity The main issue addressed is in which manner and to what extent does fragmentation and administrative discretion in environmental law impede the implementation of an ecosystem approach This is explored through analysis of several questions what is an ecosystem approach and how could it be implemented how can economic evaluation of ecosystem services contribute to the debate to what extent is environmental law fragmented and how does this affect the implementation of the ecosystem approach to what extent does environmental law contain administrative discretion and how does this affect the implementation of the ecosystem approach is there a need for greater consistency coherence and a stronger rule of law in environmental law in light of the ecosystem approach The main focus is on Europe with additional international comparisons where appropriate The book concludes by providing a normative portrayal of future environmental law as protective systemic and predictable
