Understanding Leadership in Complex Systems Terje Andreas Tonsberg,Jeffrey Shawn Henderson,2016-07-20 This work proposes that Carl Menger s Subjective Theory of Value STV and its subsequent elaboration by Ludwig von Mises as Praxeology provides a useful alternative to more common methods in the study of action and social phenomena and more

specifically to leadership in complex social systems Rather than being based on rationality assumptions and algorithmic predictability the STV emphasizes transient subjectivity shaped by a complex world of lacking information mistakes disequilibrium uncertainty and attempted error correction that defy mathematization and exact prediction As such it is a framework to make sense of human action systems in terms of subjective understanding learning and uncertainty rather than quantitative predictability Accordingly the aim of this work is to explain the STV as a general theory of action and to demonstrate its capability in developing adequate qualitative theory and to elaborate on some of the major topics that its implications raise with regard to leadership The power of the method can be seen in that its procedure naturally branches out to facilitate an understanding of a broad selection of processes and may provide the basis for a universal theory of leadership
