Economic Incentives And Environmental Policies Principles And Practice:

Economic Incentives and Environmental Policies Johannes Baptist Opschoor,R. Kerry Turner,1994 This text contains a collection of papers on economic incentives and environmental policies which result from the authors joint research work in the program Environment Science and Society conducted under the auspices of the European Science Foundation

Economic Incentives and Environmental Policies J.B. Opschoor,R. K. Turner,2012-12-06 This book contains a collection of papers on economic incentives and environmental policies which result from the authors joint research work in the program Environment Science and Society conducted under the auspices of the European Science Foundation with whose cooperation the book has been published The work concentrates on the scientific and methodological aspects of the development implementation and evaluation of economic instruments at a national level The research is both theoretical and empirical At a theoretical level attention is given to the dynamics of instrument choice in various political and economic contexts and to the means for evaluating economic instruments in terms of their effectiveness and efficiency At an empirical level the research seeks to investigate the performance of economic instruments in reality and to explore options for new approaches on the interface between technology economy and the environment A subject index complements this first volume in the ESF Environment Science and Society series

Handbook of Environmental and Resource Economics Jeroen C. J. M. Van den Bergh,2002-01-01 This major reference book comprises specially commissioned surveys in environmental and resource economics written by an international team of experts Authoritative yet accessible each entry provides a state of the art summary of key areas that will be invaluable to researchers practitioners and advanced students

Economic Instruments for Air Pollution Control Ger Klaassen,Finn R. Førsund,2012-12-06 Economic theory and empirical models suggest that economic instruments should help us to meet environmental goals at lower cost Practical experience however shows that the cost savings of emission trading are smaller than expected and charges usually have had small incentive impacts This book gives the first comprehensive review of economic theory simulation models and practical experience with the use of economic instruments The book focuses on air pollution control Part I examines theoretical aspects and simulation modeling in a national context Part II surveys the practical experience in a variety of countries Part III explores international issues such as joint implementation Because of its unique blend of theoretical and empirical research the book will prove interesting for both economists and those interested in environmental policy

A Handbook of Globalisation and Environmental Policy, Second Edition Frank Wijen,K. Zoeteman,J. Pieters,Paul van Seters,2012-01-01 Acclaim for the first edition This is undoubtedly a useful collection of essays for environmental policy makers and anyone interested in the relationship between national government and transnational forces the collection brings together some interesting perspectives and should prove a useful complement to the existing political sociology of the environment International Sociology Review of Books The Handbook of Globalisation and Environmental Policy is a very important book

More than 40 experienced authors including some of the most important international thought leaders of our time have confronted a crucial question How can and should national governments come to grips with the need for global action on a wide range of increasingly urgent environmental challenges that exceed their authority and capability Through close examination of numerous case studies a balanced perspective that takes government business and civil society into account and fresh interdisciplinary thinking about a range of policy tools the Handbook offers a treasure trove of new concepts and new perspectives The authors conclude that by acknowledging the ongoing erosion of national sovereignty and accepting the growing need to work together in supranational forums national governments can in fact increase their capacity to shape their own destiny Lawrence Susskind Massachusetts Institute of Technology US In an increasingly interdependent world global forces affect both the design and effectiveness of environmental policy This Handbook provides an unusually creative and comprehensive guide not only to the nature of these forces and their impacts but also to how a better understanding of these forces can provide a foundation for improving the effectiveness of environmental policy Tom Tietenberg Colby College US In the current era of globalisation national governments are increasingly exposed to international influences that present new constraints and opportunities for domestic environmental policies This comprehensive revised Handbook pushes the frontiers of theoretical and empirical knowledge and provides a state of the art examination of the multifaceted effects of globalisation on environmental governance Including substantially revised as well as new contributions from leading authorities the Handbook offers an insightful overview of recent developments at the intersection of globalisation and national environmental policy It covers themes including national regimes trade rules types of goods federalism innovation standards citizen consumers developing countries policy networks partnerships and carbon trading The Handbook s depth and scope will appeal to a broad and varied readership across academics students and policy makers interested in public and private governance environmental economics international relations environmental politics and law sociology and political science

European Law and New Health Technologies Mark L Flear, Anne-Maree Farrell, Tamara K Hervey, Thérèse Murphy, 2013-03-14 Health is a matter of fundamental importance in European societies both as a human right in itself and as a factor in a productive workforce and therefore a healthy economy New health technologies promise improved quality of life for patients suffering from a range of diseases and the potential for the prevention of incidence of disease in the future At the same time new health technologies pose significant challenges for governments particularly in relation to ensuring the technologies are safe effective and provide appropriate value for public money To guard against the possible dangers arising from new health technologies and to maximize the benefits all European governments regulate their development marketing and public financing In addition several international institutions operating at European level in particular the European Union the Council of Europe and the European Patent Office have become involved in the regulation of new health technologies They have done so both through traditional command and control legal measures and through other regulatory mechanisms including guidelines soft law steering through redistribution of resources and private or quasi private regulation This collection analyses European law and its relationships with new health technologies It uses interdisciplinary insights particularly from law but also drawing on

regulation theory and science and technology studies to shed new light on some of the key defining features of the relationships and especially the roles of risk rights ethics and markets The collection explores the way in which European law s engagement with new health technologies is to be legitimized and discusses the implications for biological or biomedical citizenship *Improving Recycling Markets* OECD,2006-11-13 Markets for many classes of recyclable materials are growing but market failures and barriers are constraining some markets This report presents the case for the use of industrial policies which address such market failures and barriers

The Fiscal System and the Polluter Pays Principle Alan Barrett,John Lawlor,Sue Scott,2019-05-23 First published in 1997 this volume describes the theoretical underpinning of the Polluter Pays Principle as a means to deliver environmental benefits and reduce perverse incentives By systematically examining each major sector of the economy to identify environmental issues it considers how the principle can be applied to the Irish fiscal system and then proposes alterations to the system in an environmentally friendly and socially sensitive direction Sectors explored include agriculture and forestry environmental services for wastewater treatment water supply and for waste disposal energy transport tourism and construction

Embedding New Technologies into Society Diana M. Bowman,Elen Stokes,Arie Rip,2017-09-01 The embedding of any new technologies in society is challenging The evolving state of the scientific art often unquantifiable risks and ill defined developmental trajectories have the potential to hinder innovation and or the commercial success of a technology The are however a number of tools that can now be utilized by stakeholders to bridge the chasm that exists between the science and innovation dimensions on the one hand and the societal dimensions on the other This edited volume will draw together leading researchers from the domains of law philosophy political science public administration and the natural sciences in order to demonstrate how tools such as for example constructive technology assessment regulatory governance and societal scenarios may be employed by stakeholders to assist in successfully embedding new technologies into society This volume will focus primarily on the embedding of two emergent and emerging technologies nanotechnologies and synthetic biology Government industry and the epistemic community continue to struggle with how best to balance the promised benefits of an emerging technology with concerns about its potential impacts There is a growing body of literature that has examined these challenges from various cultural scientific and jurisdictional dimensions There is however much work that still needs to be done this includes articulating the successes and failures of attempts to the societal embedding of technologies and their associated products This edited volume is significant and timely as unlike other books currently on the market it shall draw from real work experiences and experiments designed anticipate the societal embedding of emerging technologies This empirical work shall be supported by robust theoretical underpinnings

Politicnica Madrid The Fifth Environmental Action Programme forms the background of a bunch of reports studying pesticide problems in the European Union This publication the central policy report is mainly focused on future plant protection policy and integrates the results Twenty two instruments all additional to present policy have been elaborated in detail The challenge of the book was to come up with a mix of economically efficient and environmentally effective policy instruments The large variation in conditions and problems within the European Union justifies different regional approaches Future plant protection will be characterised by advanced technology and crop management with care for the environment and food safety Contents Introduction Categorization of instruments Selection of risk management activities Regulation Information persuasion and awareness Technological and institutional change Arrangements covenants Economic instruments Private law instruments Integrating the available information and selecting a mix of instruments Conclusions and recommendations

Sustainability: Sustainable development Michael Redclift,2005 Introducing the reader to sustainability as a concept a contested idea and a political goal this book brings together a range of articles and published papers that have influenced the course of thinking in social science It examines the links between the natural and social sciences as well as the public policies

Environmental Taxes Kalle Määttä,2006-01-01 Environmental taxes differ from each other according to the functions they serve and the manner in which they are implemented This study highlights the appropriateness of different kinds of environmental taxes against a rigorous framework of theory and case study evidence The purpose of this book is to analyse the way in which environmental taxes are categorized and which factors affect the effectiveness and efficiency of the different kinds of environmental taxes in practice This pragmatic approach is emphasized along with the multiplicity of regulatory problems such as At what level should the environmental tax rate be set What is the proper time schedule for introducing an environmental tax What are the most appropriate taxable characteristics and how should they be determined What activities should be exempt from environmental taxation How can tax relief be implemented These are only some of the regulatory problems explored in this study which also encompasses an examination of the theory of regulation The author argues that economists have often paid too little attention to the administrative and legal issues concerning the implementation of legislation such as environmental tax laws which are of course vital to the success of any potential policy Lawyers too have in turn neglected the theory of regulation which would assist in analysing problems in a future oriented way Environmental taxes will therefore be of great interest to a wide audience of environmental economists law and economics scholars as well as policymakers Back cover *Better Governance and Public Policy* Dele Olowu,Soumana Sako,2002 Written by prominent scholars and practitioners of African development policy Describes recent governance changes in Africa Analyzes consequences of these changes for institutional reform Highlights challenges of capacity building for economic liberalization and democratization This is an ideal volume for both students and scholars of African development as well as anyone interested in the current issues of African governance Published in association with the

African Capacity Building Foundation this book answers such questions as What is the relationship between governance and institutional reforms What is the impact of these reforms on public policy processes And what is the link between economic governance and policy research **Encyclopedia of Political Economy** Phillip O'Hara,1999-02-04 Content Description Includes bibliographical references and index *The Theory of Environmental Agreements and Taxes* Martin Enevoldsen,2005-01-01 Martin Enevoldsen s book is a pioneering work that compares the impacts of various non regulatory environmental strategies in achieving measurable pollution reductions Much has been written on the theoretical virtues and drawbacks of green taxation versus the adoption of voluntary agreements when it comes to effective implementation of environmental goals In convincing detail this book makes the case for the effectiveness of environmental taxation its barriers being primarily political in nature rather than economic Green taxes are highly controversial even in the most environmentally conscious nations particularly when they are regarded as a purely fiscal instrument The successful Danish CO2 taxation on industry which this study proves to be much more effective than the Dutch system of voluntary agreements or the Austrian laissez faire policies relied not only on the inducement of the CO2 tax itself all of the tax revenue was ploughed back into industry as subsidies for investments in advanced energy saving technologies Martin Enevoldsen s book is simply a must for political scientists environmental economists and environment policymakers Svend Auken M P and former Danish Minister for Environment and Energy Although there is a huge demand for accurate analysis of environmental policy outcomes in both the academic and policy making communities there is currently very little theoretical research on this issue This ambitious book redresses the balance by constructing a new theoretical framework at the crossroads between economics and political science to account for the effectiveness of environmental governance Drawing on insights from new institutional economics environmental economics collective action theory and social capital theory the author analyses how policy outcomes are influenced by institutional factors that constrain and empower the target groups of environmental regulation
