Economic Sanctions Panacea Or Peacebuilding In A Post Cold War World:

Economic Sanctions David Cortright, 2018-03-05 As the challenge of preventing military conflict has become increasingly complex in the post Cold War era economic sanctions are being applied with growing frequency Sanctions are also being used to enforce international law to deter aggression and terrorism to defend democracy and human rights and to prevent nuclear proliferation This study addresses questions about the utility appropriateness and success or failure of sanctions as well as their impact on the poor and innocent Specific case studies focusing on recent conflicts such as those in Haiti Iraq South Africa and the former Yugoslavia demonstrate the principal aspects of economic sanctions *Economic Sanctions*

David Cortright, 1995 This study critically addresses questions about the utility appropriateness and success or failure of economic sanctions Specific case studies focusing on recent conflicts such as Haiti Iraq South Africa and former Yugoslavia demonstrate the principal aspects of economic sanctions *Smart Sanctions* David Cortright, George A. Lopez, 2002 Smart Sanctions explores the emerging concept of targeted sanctions and provides a comprehensive framework for new sanctions strategies for the 21st century It includes essays by experts and analysts from the United Nations community the European Union the United States Government and the academic community Visit our website for sample chapters **Protection**

Against Genocide Neal Riemer, 2000-03-30 Without succumbing to utopian fantasies or realistic pessimism Riemer and his contributors call for strengthening the key institutions of a global human rights regime developing an effective policy of prudent prevention of genocide working out a sagacious strategy of keenly targeted sanctions political economic military judicial and adopting a guiding philosophy of just humanitarian intervention They underscore significant changes in the international system the end of the Cold War economic globalization the communications revolution that hold open the opportunity for significant if modest movement toward strengthening key institutions The essays explore key problems in working toward prevention of genocide They highlight the existence of considerable early warning of genocide and emphasize that the real problem is a lack of political will in key global institutions Sanctions especially economic sanctions may punish a genocidal regime but at the expense of innocent civilians Thus more clearly targeted sanctions are seen as essential The argument on behalf of a standing police force to deal with the crime of genocide as they show is powerful and controversial powerful because the need is persuasive controversial because political realists question its cost and political feasibility Implementing a philosophy of just humanitarian intervention requires an appreciation of the difficulties of interpreting those principles in difficult concrete situations A permanent international criminal tribunal to deter and punish genocide they argue will put into place a much needed component of a global human rights regime A thoughtful analysis for scholars and students of international politics and law and human rights in general **Political Gain and Civilian Pain**

Thomas George Weiss, 1997 The use of sanctions is increasing in the post Cold War world Along with this increase the international community must ask itself whether sanctions work in the sense that they incite citizens to change or overthrow

an offending government and whether sanctions are really less damaging than the alternative of war. Here for the first time sanctions and humanitarian aid experts converge on these questions and consider the humanitarian impacts of sanctions along with their potential political benefits. The results show that often the most vulnerable members of targeted societies pay the price of sanctions and that in addition the international system is called upon to compensate the victims for the undeniable pain they have suffered. Well chosen case studies of South Africa, Iraq, the former Yugoslavia and Haiti illustrate how much pain the community of states is willing to inflict upon civilians in the quest for political gains. Together with an analytical framework and policy conclusions, this important book seeks to clarify the range of options and strategies to policymakers who impose sanctions and to humanitarian officials who operate in sanctioned environments.

States, Firms, and Power George E. Shambaugh, George E. Shambaugh, IV, 1999-08-17. Analyses the effectiveness of economic sanctions as instruments of statecraft.

Delaying Doomsday Rupal N. Mehta, 2020. In 1960 President Kennedy warned of a dangerous future rife with nuclear armed states and a widespread penchant for conflict by the end of the century. Thankfully his prediction failed to pass in fact roughly three times as many countries have since opted to give up their nuclear pursuit or relinquish existing weapons than have maintained their arsenals. Nevertheless clandestine acquisition of nuclear materials and technology by states such as Iraq, Syria and Iran and a nuclear North Korea has reaffirmed the need for United States commitment to pursuing aggressive counterproliferation strategies particularly with rogue states. This book looks at the experiences of countries that ventured down the path of nuclear proliferation but were stopped short and examines how the international community bargains with proliferators to encourage nuclear reversal. It asks why so many states have relented to pressure to abandon their nuclear weapons programs and which counterproliferation policies have been successful. Rupal N. Mehta argues that the international community can persuade countries to reverse their weapons programs with rewards and sanctions especially when the threat to use military force remains on the table. Specifically nuclear reversal is most likely when states are threatened with sanctions and offered face saving rewards that help them withstand domestic political opposition. Historically the United States has relied on a variety of policy levers including economic and civilian nuclear assistance and sometimes security guarantees as well as economic sanctions to achieve nuclear reversal. Underlying these negotiations is the possibility of military intervention which incentivizes states to accept the agreement often spearheaded by the United States and end their nuclear pursuit. The book draws on interviews with current and former policymakers as well as in depth case studies of India, Iran and North Korea to provide policy recommendations on how best to manage nuclear proliferation challenges from rogue states. It also outlines the proliferation horizon or the set of state and non state actors that are likely to have interest in acquiring nuclear

technology for civilian military or unknown purposes The book concludes with implications and recommendations for U S and global nuclear counterproliferation policy **The Price of Peace** David Cortright,1997 Carrots and sticks have always been used in combination in diplomatic affairs but scholars and policymakers have focused more on the sticks than the carrots In this provocative study policy savvy scholars examine a wide range of cases from North Korea to South Africa to El Salvador and Bosnia to demonstrate the power of incentives to deter nuclear proliferation prevent armed conflict defend civil and human rights and rebuild war torn societies The book addresses the moral hazard of incentives the danger that they can be construed as bribes concessions or appeasement Incentives can take many forms economic and political as palpable as fuel oil and as intangible yet powerful as diplomatic recognition and constructive engagement The cases demonstrate that incentives can sometimes succeed when traditional methods threats sanctions or force fail or are too dangerous to apply

Rethinking the 21st Century Doctor Amy Eckert,Laura Sjöberg,2009-10-15 Rethinking the 21st Century brings much needed context and perspective to the security problems we face today In recent years the Bush Doctrine that the security threats we now face are entirely unprecedented has echoed around the world Global security and stability is now challenged not only by states and nuclear war but by insurgency disease environmental degradation and military privatisation Yet this creates a deep sense of disconnect in the way we perceive politics and can be dangerously stark and ahistorical The chapters here show that far from being a clean break the new problems faced today might actually have old solutions What can Locke tell us about terrorists What does Bentham have

to say about sanctions What are the ethics of outsourcing war to private companies By looking back to decades and even centuries of ethical analysis and political theory this book provides fascinating insight into all these questions **United Nations Reform and the New Collective Security** Peter G. Danchin, Horst Fischer, 2010-01-28 In 2004 the Report of the Secretary General's High Level Panel on Threats Challenges and Change emphasised the linkages between economic development security and human rights and the imperative in the twenty first century of collective action and cooperation between States In a world deeply divided by differences of power wealth culture and ideology central questions today in international law and organisation are whether reaffirmation of the concept of collective security and a workable consensus on the means of its realisation are possible In addressing these questions this book considers the three key documents in the recent UN reform process the High Level Panel report the Secretary General's In Larger Freedom report and the 2005 World Summit Outcome document The chapters examine the responsibilities commitments strategies and institutions necessary for collective security to function both in practice and as a normative ideal in international law and relations between state and non state actors alike **European Security** Professor Bjørn Møller, 2012-12-28 Europe has undergone quite profound changes since the end of the Cold War Having been a highly militarised conflict ridden and war ridden region the core of Europe today constitutes a security community where armed conflicts among the constituent states has become inconceivable This comprehensive book offers a theoretically founded and thoroughly documented analysis of European security with a special emphasis on the role played by the United Nations and the various regional and sub regional organisations especially the North Atlantic Treaty Organisation the Organisation for Security and Cooperation in Europe the Council of Europe and the European Union When it comes to explaining peace in Europe opinions differ widely Some argue that it was only because the West refused to give in to Soviet threats that the latter eventually gave up or that the long peace in Europe was due to the combination of a bipolar alliance structure pitting the North Atlantic Treaty Organisation NATO against the Warsaw Pact with the presence of nuclear weapons on both sides Others point instead to the extraordinarily dense network of international institutions and organisations in Europe offering a wide panoply of fora in which to handle disputes peacefully or to the web of interdependence in economic and other affairs tying together all states in Europe in relations which militate strongly against war Still others believe that the external peace between the states in Europe is simply a reflection of a convergence of cultures democracies with marked economies that are open towards the world market These questions are the focal point of this book which concentrates on security albeit not in the sense of being a treatise on military matters but security obtainable by much more indirect and non military means It will be required reading for all students and scholars of European security and the organisations which underpin it
