Economics And World History Myths And Paradoxes:

Economics and World History Paul Bairoch, 1995-09 Paul Bairoch deflates twenty commonly held myths about economic history Among these myths are that free trade and population growth have historically led to periods of economic growth and that colonial powers in the nineteenth and early twentieth centuries became rich through the exploitation of the Third World Bairoch shows that these beliefs are based on insufficient knowledge and wrong interpretations of the history of economies of the United States Europe and the Third World and he re examines the facts to set the record straight Bairoch argues that until the early 1960s the history of international trade of the developed countries was almost entirely one of protectionism rather than a Golden Era of free trade and he reveals that in fact past periods of economic growth in the Western World correlated strongly with protectionist policy He also demonstrates that developed countries did not exploit the Third World for raw materials during the nineteenth and early twentieth centuries as some economists and many politicians have held Among the many other myths that Bairoch debunks are beliefs about whether colonization triggered the Industrial Revolution the effects of the economic development of the West on the Third World and beliefs about the 1929 crash and the Great Depression Bairoch's lucid prose makes the book equally accessible to economists of every stripe as well as to historians political scientists and other social scientists

Trade and Poverty Jeffrey G. Williamson, 2013-01-11 How the rise of globalization over the past two

centuries helps explain the income gap between rich and poor countries today Today's wide economic gap between the postindustrial countries of the West and the poorer countries of the third world is not new Fifty years ago the world economic order two hundred years in the making was already characterized by a vast difference in per capita income between rich and poor countries and by the fact that poor countries exported commodities agricultural or mineral products while rich countries exported manufactured products In *Trade and Poverty* leading economic historian Jeffrey G Williamson traces the great divergence between the third world and the West to this nexus of trade commodity specialization and poverty Analyzing the role of specialization de industrialization and commodity price volatility with econometrics and case studies of India Ottoman Turkey and Mexico Williamson demonstrates why the close correlation between trade and poverty emerged Globalization and the great divergence were causally related and thus the rise of globalization over the past two centuries helps account for the income gap between rich and poor countries today

Sreenivasan, 2004-06-24 The Peasants of Ottobeuren offers an interesting perspective on one of the enduring problems of early modern European history the possibilities for economic growth and social change in rural society Based on the voluminous records of the Swabian Benedictine monastery of Ottobeuren this study underscores the limitations of the traditional narrative of a sixteenth century boom which foundered on the productive rigidities of the peasant economy and then degenerated into social crisis in the seventeenth century Population growth did strain resources at Ottobeuren but the peasantry continued to produce substantial agricultural surplus More importantly peasants reacted to demographic pressure by deepening their involvement in land and credit markets and more widely and aggressively marketing the fruits of their labour Marriage and inheritance underwent a similar process of commercialization which made heavy demands on the peasantry but which maintained a degree of social stability through the devastations of war plague and famine
