Economic Choices in a Warming World Christian de Perthuis,2011-03-10 A provocative work that urges governments and policymakers to concentrate on existing policies and tools for combating climate change      *The Rise Of The New Economic Powers And The Changing Global Landscape* Haico Ebbers,2022-12-19 This book explores the catching up process of a group of large emerging markets the New Economic Powers This process is extremely robust and should be considered as the defining trend of our age resulting in a pivotal change in world economics and politics The outcome is that the West cannot dominate the world as it did in the previous 200 years Today s world is pluralistic and the larger emerging markets are becoming increasingly influential That is the new reality which at times caused and will cause further discomfort and uncertainty in the West In the eight chapters the viewpoints on globalization of nine New Economic Powers are discussed Each chapter is an essential element in understanding the process of globalization and the role the New Economic Powers play in it Essentially their views are guided by a fundamental different look about the role of the market and the government in society compared to what we see in the West The New Economic Powers understand the power of the market to create prosperity but at the same time emphasize the need for government interference This delicate balance is particularly visible with respect to their international trade and investment policies which bring them in conflict with Western countries and multilateral institutions such as the WTO and the IMF The book helps the reader to understand the fundamental choices made by policymakers in the New Economic Powers      *Economics for the IB Diploma* Paul Hoang,2020-12-14 Developed in cooperation with the International Baccalaureate Ensure full coverage of the new syllabus with this comprehensive guide written by highly experienced authors that explores all topics through inquiry concepts content and contexts and their interrelationships with each other Explore economics through the nine key concepts in the new course with our newly developed acronym for a deeper and more integrated understanding of the subject Includes new integrated subtopics of Economics of the environment and Economics of inequality and poverty which helps bring to light the global challenges facing the planet today and how these can be addressed using an Economics lens Apply new skills and knowledge to everyday life with examples and case studies Foster the attributes of the IB learner profile with explicit reference made throughout as well as TOK links for every topic Prepare for the new assessment model with exam style questions and review questions Avoid common mistakes and aim for the best grades with expert tips and hints      *Engineering Economics* Tahir Hussain,2010      *Environmental Science for a Changing World (Canadian Edition)* Karen Ing,Susan Karr,Marnie Brankreun,2013-09-02 Environmental Science for a Changing World captivates students with real world stories while exploring the science concepts in context Engaging stories plus vivid photos and infographics make the content relevant and visually enticing The result is a text that emphasizes environmental scientific and information literacies in a way that engages
