For Another Europe Guglielmo Carchedi, 2001 In this innovative work Guglielmo Carchedi argues that only an analysis centered on class as the basic unit of social life with production and distribution of value understood as the bedrock of the economy can throw light on the internal contradictions of European economic integration Two specific themes emerge from this radical approach First familiar topics such as competition and social policy economic and monetary union the Common Agricultural Policy and immigration are treated in an original manner Second subjects usually ignored in the standard textbooks for instance the role of interest groups in the Union s decision making process are shown to be of crucial importance in understanding the economics of the European Union This work therefore provides both an introduction to and a critique of the European project The book s central message however is that another sort of Europe is possible one based on the erosion of economic polarization on the abolition of Europe s imperialist relations with the Third World and on the creation of truly democratic institutions of self determination

Public Procurement and the EU Competition Rules Albert Sánchez Graells, 2011-01-29 Shortlisted for the 2012 Prix Vogel in Economic Law Public procurement and competition law are both important fields of EU law and policy intimately intertwined in the creation of the internal market. Hitherto their close connection has been noted but not closely examined. This new work is the most comprehensive attempt to date to explain the many ways in which these fields often considered independent of one another interact and overlap in the creation of the internal market. In this process of convergence between competition and public procurement law the need for this joint study is clearly apparent. As such the book asks whether competition law principles inform or condition public procurement rules and whether they are adequate to ensure that competition is not distorted in markets where public procurement is particularly significant. The book moves away from the classical focus of public procurement on the activities of private actors developing instead an analytical framework for the appraisal of the market behaviour of the public buyer from a competition perspective. The analysis is both legal and economic. Proceeding through a careful assessment of the general rules of competition and public procurement the book constantly tests the efficacy of the rules in competition and public procurement against a standard of the proper functioning of undistorted competition in the market for public procurement.

The European Union, the World Bank and the Policymaking of Aid Eugenia Baroncelli, 2019-01-03 Based on the experience of the author an IPE scholar and former trade policy consultant at the World Bank WB the book offers an in depth exploration of the EU WB relations conceptualized as hybrid delegation. Coupling cross time analyses of their interaction in the regions of the Middle East and North Africa Europe and Central Asia and Sub Saharan Africa with an original investigation on the coordination among the EU member states at the Executive Board of the International Bank for Reconstruction and Development over the voice and participation reform of 2008-2010 the book advances an innovative theoretical framework to assess the EU WB joint institutional and field policy performances. Augmented PA models of delegation role theory and performance analyses are engaged and selectively recombined to investigate the nature evolution and impact of the interactions of the two organizations both in their everyday and constituent politics. Hybrid delegation in motion is reconstructed against the background of post Washington Consensus and post Lisbon EU to unveil the changing division of labour between the two largest development multilaterals of the new global context. The book will be of interest to scholars, students and practitioners in European Politics, Development, International Relations, International Political Economy and Global Economic Governance.

Law and Economics in Europe and the U.S. Alain Marciano, Giovanni Battista Ramello, 2016-11-30 This volume traces the evolution of the field of law and economics from its European roots to its neoclassical Chicagoan period to its current identity as a more fluid transatlantic discipline. Paying special attention to the work of German economist Juergen Backhaus who was instrumental in the reintroduction of the European perspective to the

field this book analyzes this gradual shift in the law and economics debate and provides a state of the art of the literature currently being produced by the field's most active scholars Beginning with a discussion of the history of the field and Backhaus role in its development the volume provides a survey of issues central to the current debate such as legal processes in both Europe and the U S constitutional political economy regulatory law and the ongoing evolution of the European Union The importance of this volume is two fold as it firmly grounds the discipline in history while establishing a future research agenda This book will be of use to researchers studying law and economics as well as those interested in institutional analysis
