

Problem 16

- Solve.

$$\frac{3}{5} - \frac{5}{6}x = 2x + \frac{4}{3}$$

LCM: 30

$$30 \cdot \frac{3}{5} = \frac{90}{5} = 18$$

$$\frac{6}{1} \cdot \frac{1}{1} = 6$$

$$18 - 25x = 60x + 40$$

Elementary Algebra W/ Mathzone Mark Dugopolski, 2004-12-10 Elementary Algebra 5th Edition is designed to provide students with the algebra background needed for further college level mathematics courses The unifying theme of the text is the development of the skills necessary for solving equations and inequalities followed by the application of those skills to solving applied problems **Mp** Mark Dugopolski, 2004-08-01 Intermediate Algebra is designed to provide your students with the algebra background needed for further college level mathematics courses The unifying theme of this text is the development of the skills necessary for solving equations and inequalities followed by the application of those skills to solving applied problems The primary goal in writing the fourth edition of Intermediate Algebra has been to retain the features that made the third edition so successful while incorporating the comments and suggestions of third edition users As always the author endeavors to write texts that students can read understand and enjoy while gaining confidence in their ability to use mathematics **Mp** Mark Dugopolski, 2004-03 This text provides students with the algebra background needed for further college level mathematics The unifying theme is the development of the skills necessary for solving equations and inequalities followed by the application of those skills to solving applied problems Elementary and Intermediate Algebra with Mathzone Mark Dugopolski, 2004-12-10 With a strong emphasis on skill building applications in the real world and preparation for further math courses this text unites the concepts of Elementary Algebra and Intermediate Algebra in one convenient and economical volume Elementary and Intermediate Algebra Donald Hutchison, Barry Bergman, Louis Hoelzle, 2004-03 A Unified Text That Serves Your Needs Most colleges offering elementary and intermediate algebra use two different texts one for each course As a result students may be required to purchase two texts this can result in a considerable amount of topic overlap Over the last few years several publishers have issued combined texts that take chapters from two texts and merge them into a single book This has allowed students to purchase a single text but it has done little to reduce the overlap The goal of this author team has been to produce a text that was more than a combined text They wanted to unify the topics and themes of beginning and intermediate algebra in a fluid non repetitive text We also wanted to produce a text that will prepare students from different mathematical backgrounds for college algebra We believe we have accomplished our goals For students entering directly from an arithmetic or pre algebra course this is a text that contains all of the material needed to prepare for college algebra It can be offered in two quarters or in two semesters The new Review Chapter found between chapters 6 and 7 serves as a mid book review for students preparing to take a final exam that covers the first seven chapters Finally we have produced a text that will accommodate those students placing into the second term of a two term sequence Here is where the Review Chapter is most valuable It gives the students an opportunity to check that they have all of the background required to begin in Chapter 7 If the students struggle with any of the material in the Review Chapter they are referred to the appropriate section for further review Beginning Algebra (Hardcover) with

Mathzone Julie Miller, Molly O'Neill, 2004-03 Miller O'Neill Beginning Algebra is an insightful text written by instructors who have first hand experience with students of developmental mathematics The authors have placed an emphasis on graphing by including special sections called Connections to Graphing at the end of Chapters 1-5 before the formal presentation of Graphing appears in Chapter 6 The Connections to Graphing sections may be considered optional for those instructors who do not prefer an early introduction to graphing For those who do prefer graphing early instructors can use the Connections to Graphing sections together where they prefer to introduce graphing A section on geometry appears in Chapter R for instructors who look for such content in Beginning Algebra Applications that incorporate geometric concepts may also be found throughout the text Chapter R also contains a section on study skills This section provides easy to digest tips in list format for course success The authors have crafted the exercise sets with the idea of infusing review In each set of practice exercises instructors will find a set of exercises that help students to review concepts previously learned and in this way students will retain more of what they have learned The exercise sets also contain translation exercises which provide students with an opportunity to convert from English phrases to mathematical symbols and from mathematical symbols to English phrases thus helping students to strengthen their command of mathematical language Moreover the applications found in the exercise sets are based on real world data which helps to promote students interest in mathematics and in turn may serve to motivate and engage them more effectively Other features include mid chapter reviews and classroom activities The classroom activities are of special value in that through their use students may begin to take greater ownership over their learning The classroom activities were designed to be quick activities students could perform in class either individually or collaboratively in groups In short the Miller O'Neill Beginning Algebra text offers enriching applications a high level of readability and excellent opportunities for students to become actively engaged in their exploration of mathematics
