Ladefoged,1971 **Relevant Acoustic Phonetics of L2 English** Ettien Koffi,2021-04-20 Intelligibility is the ultimate goal of human communication However measuring it objectively remained elusive until the 1940s when physicist Harvey Fletcher pioneered a psychoacoustic methodology for doing so Another physicist von Békésy demonstrated clinically that Fletcher's theory of Critical Bands was anchored in anatomical and auditory reality Fletcher's and Békésy's approach to intelligibility has revolutionized contemporary understanding of the processes involved in encoding and decoding speech signals Their insights are applied in this book to account for the intelligibility of the pronunciation of 67 non native speakers from the following language backgrounds 10 Arabic 10 Japanese 10 Korean 10 Mandarin 11 Serbian and Croatian the Slavic Group 6 Somali and 10 Spanish speakers who read the Speech Accent Archive elicitation paragraph Their pronunciation is analyzed instrumentally and compared and contrasted with that of 10 native speakers of General American English GAE who read the same paragraph The data driven intelligibility analyses proposed in this book help answer the following questions Can L2 speakers of English whose native language lacks a segment segments or a suprasegment suprasegments manage to produce it them intelligibly If they cannot what segments or suprasegments do they use to substitute for it them Do the compensatory strategies used interfere with intelligibility The findings reported in this book are based on nearly 12 000 measured speech tokens produced by all the participants This includes some 2 000 vowels more than 500 stop consonants over 3 000 fricatives nearly 1 200 nasals about 1 500 approximants a over 1 200 syllables onsets as many as 800 syllable codas more than 1 600 measurement of F0 pitch and duration measurements of no fewer than 539 disyllabic words These measurements are in keeping with Baken and Orlikoff 2000 3 and in accordance with widely accepted Just Noticeable Difference thresholds and relative functional load calculations provided by Catforda 1987 **Sound** Patricia Kruth, Henry Stobart, 2007-02 Fascinating
