Elements Of Deductive Inference An Interduction To Symbolic Logic:

Elements of Deductive Inference Joseph Bessie, Stuart Glennan, 2000 The text covers elementary logic from statement logic through relational logic with identity and function symbols The authors acquaint students with formal techniques at a level appropriate for undergraduates but extends far enough and deep enough into the subject that it is suitable for a brief first year graduate course The text covers full and brief truth tables and presents the method of truth consistency trees and natural deduction for the whole of elementary logic The text s organization allows instructors to cover just statement logic or statement logic combined with various extensions into predicate logic monadic logic with or without identity or the preceding plus relational logic with or without identity and with or without function symbols At each stage the instructor may elect to pursue truth trees and or natural deduction A final chapter provides a perspective for further study and applications of logic The text may be used with or without the accompanying software *The Primitivist Theory of Truth* Jamin Asay, 2013-10-03 Asay provides a fresh and daring perspective on the age old question What is truth **Elements of Deductive Inference** Joseph Bessie, 1999-09-01 *An Introduction to Symbolic Logic* Langer, 1967-01-01 Famous classic has introduced countless readers to symbolic logic with its thorough and precise exposition Starts with simple symbols and conventions and concludes with the Boole Schroeder and Russell Whitehead systems No special knowledge of mathematics necessary One of the clearest and simplest introductions to a subject which is very much alive Mathematics Gazette **Proceedings and Addresses of the American Philosophical Association** American Philosophical Association, 1999 List of members in v 1 **The British National Bibliography** Arthur James Wells, 2002 **Class A, Theology. Clarke, Richard Behling, 1998 Deductive Logic is designed as an intermediate level text directed at upper division students from philosophy and the humanities Its focus is exclusively on deductive logic avoiding altogether topics such as informal reasoning and scientific method normally included in introductory logic courses Its exposition of logical topics is informal with emphasis on explaining the basic concepts and procedures of modern symbolic logic in the simplest and most intuitive manner possible rather than on developing a rigorous formal system and providing proofs of its properties The fact that the text presupposes a course offered to philosophy students and serves to introduce them to logic as the language of philosophy has strongly influenced the selection of topics The topics here are controversial and the problems not easily resolved but this text strives to relate the formal logical structures introduced to
