Excerpt from Elements of Chemical Physics Physical and Chemical Changes If next we study the various changes to which all substances are liable we shall find that they also may be divided into two classes first those changes by which the specific properties are not altered and see only those by which the specific properties are essentially modified and the identity of the substance lost Thus a mass of copper may be transported to a distant part of the globe it may be divided into exceedingly small particles it may be melted and cast into nails it may be coined but yet although the position the size or the external shape is thus entirely changed those qualities which distinguish copper which make it to be copper are not altered Water may be frozen by cold or converted into steam by heat yet the water is not destroyed for if the ice be melted or the steam condensed and water reappears with all its characteristic properties A bar of iron when in contact with a magnet becomes itself magnetic and acquires the power of attracting small particles of iron So also a stick of sealing wax if rubbed with a silk handkerchief becomes electrified and endowed with the power of attracting light pieces of paper but the peculiar properties of iron and sealing wax are not essentially modified by these changes Such changes which do not destroy the identity of substance are called Physical Changes About the Publisher Forgotten Books publishes hundreds of thousands of rare and classic books Find more at www.forgottenbooks.com This book is a reproduction of an important historical work Forgotten Books uses state of the art technology to digitally reconstruct the work preserving the original format whilst repairing imperfections present in the aged copy In rare cases an imperfection in the original such as a blemish or missing page may be replicated in our edition We do however repair the vast majority of imperfections successfully any imperfections that remain are intentionally left to preserve the state of such historical works **Elements of Chemical Physics** Josiah Parsons Cooke (Jr.), 1886 Elements of Chemistry: Chemical physics William Allen Miller, 1867 **Elements of Chemistry** William Allen Miller, 1855 **Elements of Chemical Physics - Primary Source Edition** Josiah Parsons Cooke, 2013-10 This is a reproduction of a book published before 1923 This book may have occasional imperfections such as missing or blurred pages poor pictures errant marks etc that were either part of the original artifact or were introduced by the scanning process We believe this work is culturally important and despite the imperfections have elected to bring it back into print as part of our continuing commitment to the preservation of printed works worldwide We appreciate your understanding of the imperfections in the preservation process and hope you enjoy this valuable book Elements of chemistry: theoretical and practical William Allen Miller, 1860 **Elements of Chemistry** William Allen Miller, 1877 Elements Of Chemistry; Theoretical And Practical (Part I) Chemical Physics William Allen Miller, 2021-03-22 Elements Of
