Expressions of Identity Dr Kevin Hetherington,1998-09-14 This innovative book sets out to question what we understand by the term new social movements By examining a range of issues associated with identity politics and alternative lifestyles the author challenges those who treat new social movements as instances of wider social change while often ignoring their more local and dispersed importance This book questions what it means to adopt an identity that is organised around issues of expressivism and offers a series of non reductionist ways of looking at identity politics Hetherington analyzes expressive identities through issues of performance spaces of identity and the occasion This important work shows how the significance of identity politics are at once local plural situated and topologically complex **Bulletin of the United States Geological Survey**,1902 **Topographic Development of the Klamath Mountains**, Joseph Silas Diller,1902 *Bulletin* ,1905

Kloppenborg,Stephen G. Wilson,2002-09-11 Based upon a series of detailed case studies of associations such as early synagogues and churches philosophical schools and pagan mystery cults this collection addresses the question of what can legitimately be termed a voluntary association Employing modern sociological concepts the essays show how the various associations were constituted the extent of their membership why people joined them and what they

contributed to the social fabric of urban life For many those groups were the most significant feature of social life beyond family and work All of them provided an outlet of religious as well as social commitments Also included are studies of the way in which early Jewish and Christian groups adopted and adapted the models of private association available to them and how this affected their social status and role Finally the situation of women is discussed as some of the voluntary associations offered them a more significant recognition than they received in society at large

The Badlands of Modernity Kevin Hetherington,2002-11

The Badlands of Modernity offers a wide ranging and original interpretation of modernity as it emerged during the eighteenth century through an analysis of some of the most important social spaces Drawing on Foucault s analysis of heterotopia or spaces of alternate ordering the book argues that modernity originates through an interplay between ideas of utopia and heterotopia and heterotopic spatial practice The Palais Royal during the French Revolution the masonic lodge and in its relationship to civil society and the public sphere and the early factories of the Industrial Revolution are all seen as heterotopia in which modern social ordering is developed Rather than seeing modernity as being defined by a social order the book argues that we need to take account of the processes and the ambiguous spaces in which they emerge if we are to understand the character of modern societies The book uses these historical examples to analyse contemporary questions about modernity and postmodernity the character of social order and the significance of marginal space in relation to issues of order transgression and resistance It will be important reading for sociologists geographers and social historians as well as anyone who has an interest in modern societies
