ethnography political theory linguistics and literary criticism all involve debates about discourse and representation By drawing from Plato's theory of discourse the lively analysis of speech presentation in this book provides a coherent and original contribution to these debates and highlights the problems involved when speech becomes both the object and the medium of narrative representation The opening chapters offer fresh insights on ideology intertextuality literary language and historiography and reveal important connections between them These insights are then applied in specific critical treatments of Virgil's Aeneid of Petronius Satyricon and of scenes involving messengers and angels in classical and European epic Throughout this study ancient texts are discussed in conjunction with examples from later traditions Overall this book uses Latin literature to demonstrate the theoretical and ideological importance of speech presentation for a number of contemporary disciplines

Tracing Family Lines Amy M. Smith, 2012-01-01 Family genealogy research has grown exponentially over the past decade making it an area worthy of scholarly inquest *Tracing Family Lines: The Impact of Genealogy Research on Family Communication* by Amy M. Smith explores the connection between women and genealogy by examining the ways inherited familial narratives and data work to position women within American culture Although studies of women's lives are on the rise the standpoint of women has historically been marginalized particularly as women continue to be relegated to domestic and family care Through researching these standpoints we are better able to see the political constructions of sexist oppression as well as the ways genealogy offers a possible site for resistance Interviewing women who are engaged in the act of researching their own family genealogy provides insight into their motivation for doing so In documenting the family communication that surrounds the genealogical data as well as studying the family organizational structure this study contributes to the existing research regarding family history and family narrative As many of these women are members of local genealogical societies they are also able to address aspects of community membership and the positioning of women within these organizations As women and genealogy are both under researched *Tracing Family Lines* illuminates the experiences of women genealogists to understand the impact of genealogical data upon family communication and to explore family genealogy as a site of feminist resistance to the socio-political marginalization of women Cultural
