entry point for any scholar wishing to explore the queer spiritual spaces of the twenty first century *Spatial Boundaries, Abounding Spaces* Mohit Chandna, 2021-06-30 Colonialism advanced its project of territorial expansion by changing the very meaning of borders and space The colonial project scripted a unipolar spatial discourse that saw the colonies as an extension of European borders In his monograph Mohit Chandna engages with narrations of spatial conflicts in French and Francophone literature and film from the nineteenth to the early twenty first century In literary works by Jules Verne Ananda Devi and Patrick Chamoiseau and film by Michael Haneke Chandna analyzes the depiction of ever changing borders and spatial grammar within the colonial project In so doing he also examines the ongoing resistance to the spatial legacies of colonial practices that act as omnipresent enforcers of colonial borders Literature and film become sites that register colonial spatial paradigms and advance competing narratives that fracture the dominance of these borders Through its analyses *Spatial Boundaries Abounding Spaces* shows that colonialism is not a finished project relegated to our past Colonialism is present in the here and now and exercises its power through the borders that define us *Constitutional Mythologies* Alain Marciano, 2011-08-02 Our societies obviously rest on common beliefs These myths are tools that help us to develop and build common identities they form the structure around which societies function This does not imply that these beliefs are true in the sense that they would be supported by empirical facts In social matters myths have undoubtedly important functions to play even if no empirical facts support them On the other hand and precisely because they are not discussed myths may be problematic they may create illusions conserve structures that are inefficient and unable to improve the situation of citizens This is particularly true with constitutions Constitutions are very important for societies a constitution is a document even in societies based on unwritten constitutions which binds citizens together creating unity among them and which forms the framework within which our activities take place As Nobel Prize laureate James Buchanan used to say constitutions contain the rules of the social game we play in our everyday life However constitutions are not frequently debated by citizens This is why we end up with common beliefs about these constitutions they are above our heads around us We take them their role function and nature as given The purpose of this volume to investigate and challenge common constitutional myths Featuring contributions from prominent economists political scientists and legal scholars the chapters in this volume address such myths as constitutions are binding social contracts constitutions are economic documents and constitutions are legal documents Illustrating their analyses with historical and contemporary examples from the United States Canada and Europe the authors build a multi layered approach to understanding constitutions and their implications for social and political influence *The Identity Dilemma* Aidan McGarry, James Jasper, 2015-06-19 Collective identities are politically necessary or at least useful as banners for recruiting others and engaging opponents and the state However not every member fits or accepts the label in the same way or to the same degree *The Identity Dilemma* provides eight diverse case studies of social movements to show the benefits risks and tradeoffs when a group develops a strong sense of collective identity The editors

and contributors to this pathbreaking volume examine how collective identities can provide powerful advantages but also generate conflicts. The various chapters help to develop our understanding of collective identity from how strategic identities are developed for protest groups to how stigmatized groups negotiate identity dilemmas. Ultimately, *The Identity Dilemma* contributes a new strategic approach to understanding social movements that highlights the choices and tensions that groups inevitably face in articulating their ideas and interests. Contributors include Marian Barnes, Cristina Flesher Fominaya, Umut Korkut, Elzbieta Korolczuk, John Nagle, Clare Saunders, Neil Stammers, Marisa Tramontano, Huub Van Baar, and the editors.

American Heathens Jennifer Snook, 2015-06-12 *American Heathens* is the first in-depth ethnographic study about the largely misunderstood practice of American Heathenry. Germanic Paganism, Jennifer Snook, who has been Pagan since her early teens and a Heathen since eighteen, traces the development and trajectory of Heathenry as a new religious movement in America, one in which all identities are political and all politics matter. Snook explores the complexities of pagan reconstruction and racial, ethnic, and gender identity in today's divisive political climate. She considers the impact of social media on Heathen collectivities and offers a glimpse of the world of Heathen meanings, rituals, and philosophy. In *American Heathens*, Snook presents the stories and perspectives of modern practitioners in engaging detail. She treats Heathens as members of a religious movement rather than simply a subculture reenacting myths and stories of enchantment. Her book shrewdly addresses how people construct ethnicity in a reconstructionist, historically minded faith system with no central authority.

Victor Turner and Contemporary Cultural Performance Graham St John, 2008-04-01 Upon the 25th anniversary of his passing, this collection addresses the wide application of Victor Turner's thought to cultural performance in the early 21st century. Examining his relevance in studies of performance and popular culture, media, and religion, along with the role of Edith Turner in the Turnerian project, contributors explore how these ideas have been re-engaged, renovated, and repurposed in studies of contemporary cultural performance.

Identity and Capitalism Marie Moran, 2014-11-13 This is a splendid book that dispels myths about identity and presents a cultural materialist case for the study of such keywords and their preoccupations under the hegemony of neoliberal capitalism. Professor Jim McGuigan, Loughborough University, elaborates on the associated categories of personal and social identity, which is a relatively novel concept in western thought, politics, and culture. The explosion of interest in the notion of identity across popular, political, and academic domains of practice since the 1960s does not represent the simple popularisation of an older term, as is widely assumed, but rather the invention of an idea. *Identity and Capitalism* explores the emergence and evolution of the idea of identity in the cultural, political, and social contexts of contemporary capitalist societies. Against the common supposition that identity always mattered, this book shows that what we now think of routinely as personal identity actually only emerged with the explosion of consumption in the late twentieth century. It also makes the case that what we now think

of as different social and political identities only came to be framed as such with the emergence of identity politics and new social movements in the political landscapes of capitalist societies in the 60s and 70s Marie Moran provides an important new exploration of the articulation of the idea of identity to the social logic of capitalism from the organised capitalism of the mid twentieth century up to and including the neoliberal capitalism that prevails today Drawing on the work of Raymond Williams the cultural materialist approach developed here provides an original means of addressing the political debates about the value of identity in contemporary capitalist societies Tourism and Social Change in Post-Socialist Zanzibar

Akbar Keshodkar,2013-10-22 Notions of ustaarabu a word expressing civilization and questions of identities in Zanzibar have historically been shaped by the development of Islam and association with littoral societies around the Indian Ocean The 1964 Revolution marked a break in that history and imposed new notions of African civilization and belonging in Zanzibar The revolutionary state subsequently introduced tourism and the market economy to maintain its hegemony over Zanzibar In light of these developments and with locals facing growing socio economic marginalization and political uncertainty Tourism and Social Change in Post Socialist Zanzibar Struggles for Identity Movement and Civilization examines how Zanzibaris are struggling to move through the local landscape in the post socialist era and articulate their ideas of belonging in Zanzibar This book further investigates how movements of Zanzibaris within the emerging and contending social discourses are reconstituting meanings for conceptualizing ustaarabu to define their roots in Zanzibar **Routledge Handbook of Youth Sport**

Cultures of Post-War British Fascism Nigel Copsey,John E. Richardson,2015-04-10 In Post War Britain cultural interventions were a feature of fascist parties and movements just as they were in Europe This book makes a new major contribution to existing scholarship which begins to discuss British fascism as a cultural phenomenon A collection of essays

from leading academics this book uncovers how a cultural struggle lay at the heart of the hegemonic projects of all varieties of British fascism. Such a cultural struggle is enacted and reflected in the text and talk, music and literature of British fascism. Where other published works have examined the cultural visions of British fascism during the inter-war period, this book is the first to dedicate itself to detailed critical analysis of the post-war cultural landscapes of British fascism. Through discussions of cultural phenomena such as folk music, fashion and neo-Nazi fiction among others, *Cultures of Post War British Fascism* builds a picture of Post War Britain which emphasises the importance of understanding these politics with reference to their corresponding cultural output. This book is essential reading for undergraduates and postgraduates studying far-right politics and British history.
