Cooperation Alasdair R. Young (internationale betrekkingen.), 2001 **Constructing European Union Trade Policy** Gabriel Siles-Brügge, 2014-02-18 With the stagnation of the Doha Round of multilateral talks trade liberalisation is increasingly undertaken through free trade agreements Gabriel Siles Brügge examines the EU's decision following the 2006 Global Europe strategy to negotiate such agreements with emerging economies Eschewing the purely materialist explanations prominent in the field he develops a novel constructivist argument to highlight the role of language and ideas in shaping EU trade policy Drawing on extensive interviews and documentary analysis Siles Brügge shows how EU trade policymakers have privileged the interests of exporters to the detriment of import competing groups creating an ideational imperative for market opening Even during the on going economic crisis the overriding mantra has been that the EU's future well being depends on its ability to compete in global markets The increasingly neoliberal orientation of EU trade policy has also had important consequences for its economic diplomacy with the developing economies of the African Caribbean and Pacific group of states Understanding the European Union's External Relations Michèle Knodt, Sebastiaan

Princen, 2003-09-02 The European Union is one of the world's biggest economies However its role as an international actor is ambiguous and it's not always able to transform its political power into effective external policies The development of an assertive European Union challenges the image of an internal project aimed at economic integration and international relations theories based on unitary state actors This book systematically links the EU's external relations to existing political theories showing how existing theories need to be modified in order to deal with specific characteristics of the EU as an international actor **The EU in the Global Investment Regime** Johann Robert Basedow, 2017-11-07 The European Union EU has emerged as a key actor in the global investment regime since the 1980s At the same time international investment policy and agreements which govern international investment liberalisation treatment and protection through investor to state dispute settlement have become increasingly contentious in the European public debate This book provides

an accessible introduction to international investment policy and seeks to explain how the EU became an actor in the global investment regime It offers a detailed analysis of the EU's participation in all major trade and investment negotiations since the 1980s and EU internal competence debates to identify the causes behind the EU's growing role in this policy domain Building on principal agent and historical institutionalist models of incremental institutional change the book shows that Commission entrepreneurship was instrumental in the emergence of the EU as a key actor in the global investment regime It refutes business centred liberal intergovernmental explanations which suggest that business lobbying made the Member States accept the EU's growing role and competence in this domain The book lends support to supranational and challenges intergovernmental thinking on European Integration This text will be of key interest to scholars students and practitioners of European and regional integration EU foreign relations EU trade and international investment law business lobbying and more broadly of international political economy

Costa, K. Jørgensen, 2012-04-05. An exploration of how the EU is influenced by multilateral institutions. There has recently been a dramatic increase in interaction between the EU and multilateral institutions. McNamara, 2007. The contributors to this volume, all leading specialists in the field of EU studies, examine the trajectory of the EU and draw on the theoretical tools of historical institutionalism to assess the central political challenges facing the EU.

The Oxford Handbook of the European Union Erik Jones, Anand Menon, 2012-08-30. This is an authoritative one volume and independent treatment of the history, functioning and nature of the European integration. Written by a selection of leading scholars, it covers the major institutions, policies and events in the history of integration whilst also providing a guide to the major theoretical approaches that have been used to study it over time. By bringing together such a distinguished cast covering such a wide array of themes, the Handbook is intended as a one stop shop for all those interested in the European Union and its predecessors. Written in an accessible style, the volume is intended to shape the discipline of EU studies and to establish itself as the essential point of reference for all those interested in European integration, both in universities and more broadly. It represents a timely guide to an institution that is much discussed but often only imperfectly understood. *Europe, Canada and the Comprehensive Economic and Trade Agreement* Kurt Hübner, 2011-04-01. The Great Recession and the turn towards all forms of protectionism stress the relevance of international trade policy. With the global economy undergoing deep structural changes, the negotiations between Canada and the EU on a Comprehensive Economic and Trade Agreement (CETA) present a real time experiment that sheds light on the direction that the relationships between two economic units of the G8 will take. For Canada, an agreement with the EU would end its current dependency on the US; for the EU, an agreement with Canada would be a first with a G8 economy and indicate how its new trade strategy, Global Europe, will look like. This book is the first to simultaneously analyze the undercurrents of this project and introduce the main topics at hand. CETA is much more than a simple free trade agreement; its breadth covers regulatory aspects in goods

services and finance the opening of public procurement markets attitudes and policies of Canadian provinces towards liberalization climate policies and international leadership claims of the EU in comparison to Canadian policy attempts the challenges of the Euro project and the reform efforts and the challenges of the Euro as a international reserve currency CETA is a challenging project that will kick start enormous changes in trade policy making as well as in market openness in Canada It will mark the EU s efforts to re make the Atlantic Economy This book provides deep insights into the ambiguity of the project and addresses the implications of a rapidly changing global economy for trade policy Offering analysis of the financial industry banking trade policy climate change strategy and the Euro exchange rate this book should be of interest to students and policy makers alike The European Union at the United Nations K. Laatikainen,K. Smith,2006-04-13 This is the first book to examine in depth the EU s relationship with the UN and to analyze critically the EU s contribution to effective multilateralism The contributors show that the EU most often fails to make the UN as effective as it should be in addressing global challenges European Foreign and Security Policy Catherine Gegout,2010-05-08 The European Union s EU Common Foreign and Security Policy CFSP stipulates that all member states must unanimously ratify policy proposals through their representatives on the EU Council Intergovernmentalism or the need for equal agreement from all member nations is used by many political scientists and policy analysts to study how the EU achieves its CFSP However in European Foreign and Security Policy Catherine Gegout modifies this theory arguing instead for analyses based on what she terms constrained intergovernmentalism Gegout s theory of constrained intergovernmentalism allows for member states in particular France Germany and the United Kingdom to bargain with one another and to make rational decisions but also takes into account the constraints imposed by the United States the European Commission and the precedents set by past decisions Three in depth case studies of CFSP decision making support her argument as she examines the EU position on China s human rights record EU sanctions against Serbia and EU relations with NATO Europe's Global Role Jan Orbie,2016-12-05 First published in 2008 and based on an innovative framework for analysing the EU s external politics this paperback edition provides a historical overview of and theoretical conclusions about the EU s global role Taking an original approach the volume highlights the expanding political science literature on Europe s international role in a range of external policy domains It focuses in particular on the soft dimension of Europe s international action which has previously been much neglected Carefully structured to make this ideal supplementary reading for students and scholars of European politics and foreign policy the book will equally appeal to a wider audience in political economy security policy and international relations more generally Deadlocks in Multilateral Negotiations Amrita Narlikar,2010-05-06 Deadlocks are a feature of everyday life as well as high politics This volume focuses on the concept causes and consequences of deadlocks in multilateral settings and analyses the types of strategies that could be used to break them It commences with a definition of deadlock hypothesises about its occurrence and proposes solutions Each chapter then makes an original contribution to the issue of

deadlock theoretical methodological or empirical and further tests the original concepts and hypotheses either theoretically or through case study analysis developing or altering them accordingly This is a unique volume which provides an in depth examination of the problem of deadlock and a more thorough understanding of specific negotiation problems than has ever been done before It will be directly relevant to students researchers teachers and scholars of negotiation and will also be of interest to practitioners involved in negotiation and diplomacy
