Extending The Territory:

Territorial Sea Extension United States. Congress. House. Committee on Merchant Marine and Fisheries. Subcommittee on Oceanography and the Great Lakes, 1989 *Beyond Sovereign Territory* Thom Kuehls, 1996 How should we think about politics in a world where ecological problems from the deforestation of the Amazon to acid rain transcend national boundaries This is the timely and important question addressed by Thom Kuehls in *Beyond Sovereign Territory* Contending that the sovereign territorial state is not adequate to contain or describe the boundaries of ecopolitics the author reorients our thinking about government nature and politics Kuehls argues that changes in technology and the scope of governmental aims have rendered conventional ecological and internationalist aims anachronistic and ultimately ineffective in the face of impending environmental collapse He questions the process by which land is transformed into an object of sovereignty into territory demonstrating how representations of political space that are premised on territorial sovereignty fail to come to terms with much of what is involved in ecopolitics Ultimately Kuehls critiques an orientation that privileges a certain utilitarian relationship between humans and nonhuman nature one in which the earth is largely interpreted as given to humans Deeply humanistic and challenging conventional wisdom *Beyond Sovereign Territory* will be of interest to readers of environmental politics geography international politics and political theory **The American Foreign Service** United States.
