It draws extensively on up to date theories of second language development and on multiple examples of the practices of real teachers and students. Hunt starts with a detailed look at deductive, inductive and active teaching methods which support teachers in making the best choices for their students' needs and for their own personal preferences but goes on to organise the book around the principles of listening, reading, speaking and writing Latin. It is designed to be informative, experimental and occasionally provocative. The book closes with two chapters of particular contemporary interest: *Access, Diversity and Inclusion* investigates how the subject community is meeting the challenge of teaching Latin more equitably in today's schools and *The Future* offers some thoughts on lessons that have been learnt from the experiences of online teaching practices during the Covid 19 lockdowns.
