passenger pigeon It then investigates two major philosophical questions such projects throw up These are the Authenticity Question will the products of de extinction be authentic members of the original species and the Ethical Question is de extinction something that should be done The book surveys and critically evaluates a raft of arguments for and against the authenticity of de extinct organisms and for and against the ethical legitimacy of de extinction It concludes first that authentic de extinctions are actually possible and second that de extinction can potentially be ethically legitimate especially when deployed as part of a freeze now and resurrect later conservation strategy
