Extra-Anatomic Bypass For Lower Limb Vascular Disease (single Surgical Procedures) Chamberlain, *National Library of Medicine Current Catalog* National Library of Medicine (U.S.),1989 Diagnosis, Screening and Treatment of Abdominal, Thoracoabdominal and Thoracic Aortic Aneurysms Reinhart Grundmann,2011-09-12 This book considers mainly diagnosis screening surveillance and treatment of abdominal thoracoabdominal and thoracic aortic aneurysms It addresses vascular and cardiothoracic surgeons and interventional radiologists but also anyone engaged in vascular medicine The high mortality of ruptured aneurysms certainly favors the recommendation of prophylactic repair of asymptomatic aortic aneurysms AA and therewith a generous screening However the comorbidities of these patients and their age have to be kept in mind if the efficacy and cost effectiveness of screening and prophylactic surgery should not be overestimated The treatment recommendations which will be outlined here have to regard on the one hand the natural course of the disease the risk of rupture and the life expectancy of the patient and on the other hand the morbidity and mortality of the prophylactic surgical intervention The book describes perioperative mortality after endovascular and open repair of AA long term outcome after repair and the cost effectiveness of treatment *Current Catalog* National Library of Medicine (U.S.), First multi year
