Extracellular Matrix Factsbook:

The Extracellular Matrix Factsbook Shirley Ayad, Ray Boot-Handford, Martin Humphries, Karl Kadler, Adrian Shuttleworth, 1998-03-27 The Second Edition of The Extracellular Matrix FactsBook has been completely revised updated and expanded by over 50 percent It contains over 85 entries on the diverse group of macromolecules that assemble to form the extracellular matrix Entries provide information on molecular structure isolation primary structure structural and functional sites gene structure database accession numbers and key references Key Features Compiled by members of one of the foremost centers of matrix biochemistry in the world Contains over 30 new entries with all previous entries being revised and updated Includes new entries on proteinases involved in the deposition of the extracellular matrix Presents 3D ribbon diagrams in cases where the protein structure is now known **The Extracellular Matrix Factsbook** Shirley Ayad, 1998 The Second Edition of The Extracellular Matrix FactsBook has been completely revised updated and expanded by over 50 percent It contains over 85 entries on the diverse group of macromolecules that assemble to form the extracellular matrix Entries provide information on molecular structure isolation primary structure structural and functional sites gene structure database accession numbers and key references Key Features Compiled by members of one of the foremost centers of matrix biochemistry in the world Contains over 30 new entries with all previous entries being revised and updated Includes new entries on proteinases involved in the deposition of the extracellular matrix Presents 3D ribbon diagrams in cases where the protein structure is now known *Composition and Function of the Extracellular Matrix in the Human Body* Francesco Travascio, 2016-06-15 The extracellular matrix ECM is an ensemble of non cellular components present within all tissues and organs of the human body The ECM provides structural support for scaffolding cellular constituents and biochemical and biomechanical support for those events leading to tissue morphogenesis differentiation and homeostasis Essential components of all ECMs are water proteins and polysaccharides However their composition architecture and bioactivity greatly vary from tissue to tissue in relation to the specific role the ECM is required to assume This book overviews the role of the ECM in different tissues and organs of the human body The Adhesion Molecule FactsBook, 2000-08-24 This updated and expanded Second Edition of The Adhesion Molecule FactsBook has nearly double the number of entries of the First Edition and provides a compendium of the major cell surface adhesion molecules The introductory chapters detail the organization of the data in the entries section provide a background to the main adhesion molecule families and inform the reader how to access information on adhesion molecules on the Internet The entries have been designed to allow the reader to quickly establish the main structure and functional features of each molecule and where to find information Alternative nomenclature Tissue distribution and regulation of expression Ligands Gene organization and chromosomal location Protein structure and molecular weights Amino acid sequence of the most commonly studied organisms PIR SWISSPROT and EMBL GenBank accession numbers Biological function Key references *The Immunoglobulin FactsBook* Marie-Paule

Lefranc, Gerard Lefranc, 2001-05-29 The FactsBook series has established itself as the best source of easily accessible and accurate facts about protein groups Books in the series use an easy to follow format and are meticulously researched and compiled by experts in the field The Immunoglobulin FactsBook is the first published reference for all 203 human functional and ORF immunoglobulin genes It is complete and standardized and employs nomenclature approved by the HUGO Nomenclature Committee

The Oncogene and Tumour Suppressor Gene Factsbook Robin Hesketh, 1997-07-11 The Second Edition of The Oncogene and Tumour Suppressor Gene FactsBook has been completely revised updated and expanded by 60% The book contains more than 80 entries on oncogenes including JUN MYC and RAS as well as DNA tumour viruses tumour suppressor genes including p53 retinoblastoma BRCA1 BRCA2 VHL F2FL and essential material on angiogenesis and metastasis apoptosis cell cycle control and gene therapy Includes much new data on this fast moving field including newly discovered oncogenes Summarizes the clinical association and molecular properties of all known oncogenes and tumor suppression genes Contains more than 2000 terms for reference and further research Revised to included signaling pathways apoptosis and metastasis

The Chemokine Factsbook Krishna Vaddi, Margaret Keller, Matthew Newton, 1997-04-01 How do you keep track of basic information on the proteins you work with Where do you find details of their physicochemical properties amino acid sequences gene organization Are you tired of scanning review articles primary papers and databases to locate that elusive fact The Academic Press FactsBook series will satisfy scientists and clinical researchers suffering from information overload Each volume provides a catalog of the essential properties of families of molecules Gene organization amino acid sequences physicochemical properties and biological activity are presented using a common easy to follow format Taken together they compile everything you want to know about proteins but are too busy to look for The Chemokine FactsBook contains more than 40 entries on chemokines and chemokine receptors from human or other origin including IL 8 MCP 1 C5 a RANTES Lymphotactin and CC CKR 1 The text provides information on tissue sources target cells physicochemical properties transcription factors regulation of expression in disease receptor binding characteristics gene structure and location amino acid sequences and accession numbers and references Contains over 40 entries on chemokines and chemokine receptors from human or other origin including IL 8 MCP 1 C5 a RANTES Lymphotactin CC CKR 1 Entries provide information on Tissue sources Target cells Physicochemical properties Transcription factors Regulation of expression Expression in disease Receptor binding characteristics Gene structure and location Amino acid sequences Database accession numbers References

The Complement FactsBook Scott R. Barnum, 1999-10-28 The Complement FactsBook contains entries on all components of the Complement System including C1q and Lectins C3 Family Serine Proteases Serum Regulators of Complement Activation Cell Surface Proteins and Terminal Pathway Proteins Domain Structure diagrams are incorporated to clearly illustrate the relationships between all the complement proteins both within families and between families The FactsBook also includes the cDNA sequences marked with intron exon boundaries which will facilitate genetic

studies Includes the cDNA sequences marked with intron exon boundaries facilitating genetic studies Presents detailed structural information including cDNA and gene structure for all proteins Introduces complement function simply described for each function Data is as up to date as possible including unpublished work from many contributors Incorporates domain structures diagrams which beautifully illustrate the relationship between all the complement proteins both within and between families Each chapter has been written by an expert in the field Data is as up to date as possible including unpublished work from many contributors Entries provide information on Alternative nomenclature Physiochemical properties Structure and function Tissue distribution and regulation expression Protein sequence modules Chromosomal location Genomic structure Database accession numbers Deficiency and polymorphic variants Key references **The**

Cytokine Factsbook and Webfacts Katherine A. Fitzgerald, Luke A.J. O'Neill, Andy J.H. Gearing, Robin E.

Callard, 2001-09-03 Completely revised and expanded this second edition of The Cytokine FactsBook is the most up to date reference manual available for all current well characterized interleukins cytokines and their receptors An additional 52 cytokines are included doubling the number of entries from the previous edition The key properties of each cytokine are described and presented in a very accessible format with diagrams for each of the receptors The Cytokine FactsBook includes free online access to the regularly updated Cytokine Webfacts Cytokine Webfacts is a web based comprehensive compendium of facts about cytokines and their receptors that includes a variety of data representations such as text signal pathway diagrams and 3D images This exciting resource is integrated into other databases via hypertext links to provide a unique network and contains a web enabled version of RasMol for viewing structures **The HLA FactsBook** Steven G.E. Marsh, Peter Parham, Linda D. Barber, 1999-12-13 The HLA FactsBook presents up to date and comprehensive information on the HLA genes in a manner that is accessible to both beginner and expert alike The focus of the book is on the polymorphic HLA genes HLA A B C DP DQ and DR that are typed for in clinical HLA laboratories Each gene has a dedicated section in which individual entries describe the structure functions and population distribution of groups of related allotypes Fourteen introductory chapters provide a beginner's guide to the basic structure function and genetics of the HLA genes as well as to the nomenclature and methods used for HLA typing This book will be an invaluable reference for researchers studying the human immune response for clinicians and laboratory personnel involved in clinical and forensic HLA typing and for human geneticists population biologists and evolutionary biologists interested in HLA genes as markers of human diversity Introductory chapters provide good general overview of HLA field for novice immunologists and geneticists Up to date complete listing of HLA alleles Invaluable reference resource for immunologists geneticists and cell biologists Combines both structural and functional information which has never been compiled in a single reference book previously Serological specificity of allotypes Identity of material sequenced including ethnic origin Database accession numbers Population distribution Peptide binding specificities T cell epitopes Amino acid sequences of allotypes Key references **The T Cell**

Receptor FactsBook Marie-Paule Lefranc, Gerard Lefranc, 2001-07-13 The T Cell Receptor FactsBook contains entries on all the 176 functional variable diversity joining and constant regions of the human T cell receptor including alpha beta gamma and delta loci Introductory chapters summarize information of T cell receptor chain synthesis chromosomal location and an overview of the human T cell receptor loci The Nuclear Receptor FactsBook Vincent Laudet, Hinrich Gronemeyer, 2002 The FactsBook Series has established itself as the best source of easily accessible and accurate facts about protein groups They use an easy to follow format and are researched and compiled by experts in the field This Factsbook is devoted to nuclear receptors The first section presents an introduction and describes the mode of action of the receptors in general The second section of the book contains detailed entries covering each type of receptor Entries provide information on Nomenclature and structure Isolation DNA binding properties Ligands Expression Target genes Knockouts Disease association Gene structure promoter and isoforms Chromosomal location Amino acid sequences Key references *The Gene Knockout Factsbook, Two-Volume Set*, 1998-10-26 The FactsBooks Series has established itself as the best source of easily accessible and accurate facts about protein groups Described as a growing series of excellent manuals by Molecular Medicine Today and essential works of reference by Trends in Biochemical Sciences the FactsBooks have become the most popular comprehensive data resources available Using an easy to follow format and drawing from meticulous research the Factsbooks will keep you up to date with the latest advances in structure amino acid sequences physicochemical properties and biological activity The Gene Knockout FactsBook contains entries grouped into subject disciplines covering immunology neurobiology development cancer and other knockouts It describes more than 600 gene knockouts described and listed in alphabetical order for easy reference Key Features Entries provide information on general description of the protein and its function gene symbol and database accession number knockout construct mouse phenotype key references The Leucocyte Antigen Factsbook A. Neil Barclay, Marion H. Brown, S. K. Alex K. Alex Law, Andrew J. McKnight, Michael G. Tomlinson, P. Anton van der Merwe, 1997-06-22 A volume in the popular FactsBook Series the First Edition of The Leucocyte Antigen FactsBook was hugely successful The new Second Edition has been completely revised updated and expanded by 65% to include new findings and up to date key references The introductory chapters have also been updated especially in terms of nomenclature the role of the World Wide Web and new structural data The Leucocyte Antigen FactsBook Second Edition contains more than 200 entries with approximately 70 new entries on all the molecules specifically expressed in the surface of cells of the haematopoietic system including all characterized CD antigens antigen receptors MHC antigens adhesion molecules and cytokine receptors This FactsBook will be of enormous value to immunologists cell biologists biochemists and endocrinologists Key Features Completely up to date Revised and expanded to include over 70 new entries More than 200 entries in total plus additional introductory material New structural data New nomenclature for CD and related molecules covered **The Leukemia-Lymphoma Cell Line Factsbook** Hans G. Drexler, 2000-09-04 The Leukemia

Lymphoma Cell Line Factsbook represents an essential reference manual for all of the well characterized leukemia lymphoma cell lines currently available It provides the most important facts using the succinct and user friendly format that has made the FactsBooks so popular with scientists and clinical researchers Introductory chapters provide background and perspective for culturing malignant hematopoietic blood forming cell lines These chapters are followed by over 400 comprehensive individual entries Each cell line entry highlights essential clinical immunological genetic and functional features and includes a comprehensive listing of references The full spectrum of malignant cell lines from all hematopoietic cell lineages Sister cell lines and relevant subclones Clinical data patient diagnosis treatment status and specimen source Authentication of derivation and availability Immunophenotype Cytogenetic karyotype Translocations and fusion genes Receptor gene rearrangements and genetic alterations Cell cultures aspects establishment medium doubling time growth Cytochemical profile Cytokine production and response to cytokines Proto oncogene and transcription factor expression alteration Functional features differentiation induction heterotransplantability Special unique features Key references

Ion Channel Factsbook William J. Brammar,1998-10-16 The Academic Press FactsBooks series has established itself as the best source of easily accessible and accurate facts about protein groups Described as a growing series of excellent manuals by Molecular Medicine Today and essential works of reference by Trends in Biochemical Sciences the FactsBooks have become the most popular comprehensive data resources available As they are meticulously researched and use an easy to follow format the FactsBooks will keep you up to date with the latest advances in structure amino acid sequences physicochemical properties and biological activity In a set of four interrelated volumes The Ion Channel FactsBook provides a comprehensive framework of facts about channel molecules central to electrical signaling phenomena in living cells The fourth volume is devoted to Voltage gated Channel Families including those molecular complexes activated or modulated by calcium potassium and chloride Nomenclature Expression Sequence Analyses Structure and function Electrophysiology Pharmacology Information retrieval

The Transporter Factsbook Jeffrey Griffith,Clare Sansom,1997-12-22 How do you keep track of basic information on the proteins you work with Where do you find details of their physicochemical properties amino acid sequences and structure Are you tired of scanning review articles primary papers and databases to locate that elusive fact The Academic Press FactsBook Series has established itself as the best source of easily accessible and accurate facts about protein groups Described as a growing series of excellent manuals by Molecular Medicine Today and essential works of reference by Trends in Biochemical Sciences the FactsBooks have become the most popular comprehensive data resources available Using an easy to follow format the FactsBooks will keep you up to date with the latest advances in structure amino acid sequences physicochemical properties and biological activity Meticulously researched and compiled by experts in the field keeping abreast of developments has never been so easy The Transporter FactsBook contains entries covering almost 800 transporters Organized into 55 families of structurally related transporters this volume includes

ATPases ABC transporters H dependent antiporters and symporters Na dependent antiporters and symporters and other transporters such as mitochondrial transporters Nomenclature biological sources and substrates Phylogenetic relationships Predicted structures Physical and genetic characteristics Multiple amino acid sequence alignments Database accession numbers Key references

Asthma and COPD Peter J. Barnes, Jeffrey M. Drazen, Stephen I. Rennard, Neil C. Thomson, 2002-04-22 Chronic obstructive pulmonary disease COPD which encompasses both chronic bronchitis and emphysema is one of the most common respiratory conditions of adults in the developed world Asthma and COPD Basic Mechanisms and Clinical Management provides a unique authoritative comparison of asthma and COPD Written and edited by the world's leading experts it is a comprehensive review of the most recent understanding of the basic mechanisms of both conditions specifically comparing their etiology pathogenesis and treatments Highlights distinguishing features between asthma and COPD Reviews benefits and limitations of current therapies Summarises key information in two colour artwork Extensively referenced to primary literature

Biomedical Materials Roger Narayan, 2009-06-20 Biomedical Materials provides a comprehensive discussion of contemporary biomaterials research and development Highlighting important topics associated with Engineering Medicine and Surgery this volume reaches a wide scope of professionals researchers and graduate students involved with biomaterials A pedagogical writing style and structure provides readers with an understanding of the fundamental concepts necessary to pursue research and industrial work on biomaterials including characteristics of biomaterials biological processes biocompatibility and applications of biomaterials in implants and medical instruments Written by leading researchers in the field this text book takes readers to the forefront of biomedical materials development providing them with a taste of how the field is changing while also serving as a useful reference to physicians and engineers

Pediatric Orthopedic Deformities, Volume 1 Frederic Shapiro, 2015-12-20 Developmental biology of normal bone and cartilage including histogenesis molecular gene and biomechanical aspects is updated and expanded The book outlines the biology of bone repair with differing mechanical environments cartilage repair at articular and physeal sites and distraction osteogenesis The generously illustrated text provides an in depth presentation of the interplay between normal developmental biology abnormal pathologic states and the influence of operative and non operative orthopedic interventions on childhood orthopedic deformity Thirty four principles underlying the development progression and management of skeletal deformity in the growing child are defined Orthopedic management including surgical treatment is discussed for skeletal dysplasias epiphyseal growth plate fracture separations lower extremity length discrepancies and deformities of joints and epiphyses due to metabolic inflammatory infectious hematologic and neoplastic disorders Treatments are related to extent of deformity remodeling post surgery and possible recurrence This 2nd edition of Pediatric Orthopedic Deformities has been expanded to cover more regions and disorders and is being presented in 3 volumes

Decoding **Extracellular Matrix Factsbook**: Revealing the Captivating Potential of Verbal Expression

In an era characterized by interconnectedness and an insatiable thirst for knowledge, the captivating potential of verbal expression has emerged as a formidable force. Its power to evoke sentiments, stimulate introspection, and incite profound transformations is genuinely awe-inspiring. Within the pages of "**Extracellular Matrix Factsbook**," a mesmerizing literary creation penned by a celebrated wordsmith, readers attempt an enlightening odyssey, unraveling the intricate significance of language and its enduring impact on our lives. In this appraisal, we shall explore the book's central themes, evaluate its distinctive writing style, and gauge its pervasive influence on the hearts and minds of its readership.
