Frontiers of Human-Centered Computing, Online Communities and Virtual Environments Rae Earnshaw, Richard Guedj, Andries Van Dam, John Vince, 2012-12-06 Rae Earnshaw and John A Vince __ 1 Introduction The US President's Information Technology Advisory Committee PITAC recently advised the US Senate of the strategic importance of investing in IT for the 21st century particularly in the areas of software human computer interaction scalable information infrastructure high end computing and socioeconomic issues

1 Research frontiers of human computer interaction include the desire that interaction be more centered around human needs and capabilities and that the human environment be considered in virtual environments and in other contextual information processing activities The overall goal is to make users more effective in their information or communication tasks by reducing learning times speeding performance lowering error rates facilitating retention and increasing subjective satisfaction Improved designs can dramatically increase effectiveness for users who range from novices to experts and who have diverse cultures with varying educational backgrounds Their lives could be made more satisfying their work safer their learning easier and their health better

Universal Access in Human-Computer Interaction. Addressing Diversity Constantine Stephanidis, 2009-07-15 This three volume set LNCS 5614 5616 constitutes the refereed proceedings of the 5th International Conference on Universal Access in Human Computer Interaction Addressing Diversity UAHCI 2009 held as Part of HCI International 2009 in San Diego CA USA in July 2009 jointly with 8 other thematically similar conferences The revised papers presented were carefully reviewed and selected from numerous submissions The papers accepted for presentation thoroughly cover the entire field of Human Computer Interaction addressing major advances in universal access namely interaction and support for people with sensory impairments older users and technology interaction and support for people with cognitive impairments design knowledge and approaches for accessibility and universal access

Human-Computer Interaction Andrew Sears, Julie A. Jacko, 2009-03-02 Hailed on first publication as a compendium of foundational principles and cutting edge research The Human Computer Interaction Handbook has become the gold standard reference in this field While human computer interaction may have emerged from within computing significant contributions have come from a variety of fields including industrial engineering psychology education and graphic design No where is this more apparent than when designing solutions for users as diverse as children older adults and individuals with physical cognitive visual or hearing impairments Derived from select chapters in The Human Computer Interaction Handbook this volume emphasizes design for these groups

and also discusses HCI in the context of specific domains including healthcare games and the aerospace industry **Design and the Digital Divide** Alan F. Newell, 2022-06-01 Demographic trends and increasing support costs means that good design for older and disabled people is an economic necessity as well as a moral imperative Alan Newell has been described as a visionary who stretches the imagination of all of us and truly ahead of his time This monograph describes research ranging from developing communication systems for non speaking and hearing impaired people to technology to support older people and addresses the particular challenges older people have with much modern technology Alan recounts the insights gained from this research journey and recommends a philosophy and design practices to reduce the Digital Divide between users of information technology and those who are excluded by the poor design of many current systems How to create and lead interdisciplinary teams and the practical and ethical challenges of working in clinically related fields are discussed The concepts of Ordinary and Extra ordinary HCI User Sensitive Inclusive Design and Design for Dynamic Diversity and the use of Creative Design techniques are suggested as extensions of User Centered and Universal Design Also described are the use of professional theatre and other methods for raising designers awareness of the challenges faced by older and disabled people ways of engaging with these groups and of ascertaining what they want rather than just what they need This monograph will give all Human Computer Interaction HCI practitioners and designers of both mainstream and specialized IT equipment much food for thought Table of Contents 40 years Highlights and a Brief Review Communication Systems for Non Speaking and Hearing Impaired People TV Subtitling for Hearing Impaired People Word Prediction for Non Speaking People and Systems for those with Dyslexia Providing Reusable Conversation for Non Speaking People Story Telling and Emotion in Synthetic Speech Lessons Learned from Designing AAC Devices IT Systems for Older People Designing IT Systems for Older People Ordinary and Extra Ordinary Human Computer Interaction User Sensitive Inclusive Design The Use of Professional Theatre Attacking the Digital Divide **Inclusive Designing** P. M. Langdon, J. Lazar, A. Heylighen, H.
