Extreme Export:

Export of Alaskan Crude Oil United States. Congress. Senate. Committee on Foreign Relations. Subcommittee on East Asian and Pacific Affairs, 1983 **St. Lucia** International Monetary Fund, 2011-09-09 St Lucia faces significant policy challenges in the aftermath of Hurricane Tomas It is experiencing an urgent balance of payments need that would result in a severe economic disruption The government is focused on achieving medium term debt sustainability The policies outlined tackle urgent rebuilding needs and appropriately aim to maintain macroeconomic stability Executive Directors support the request for funds based on the extent of the damage caused the associated urgent balance of payments need and the government's commitment to limit the increase in capital spending Regional Integration, Trade and Industry in Africa Helmut Asche, 2021-06-14 This book examines the past present and prospects of regional economic integration in Africa The empirical analysis ranges from unions formed during the years following independence to the proposed African Continental Free Trade Area AfCFTA which aims to remove trade barriers between all 55 African states In addition the book explores to what extent Africa's Regional Economic Communities RECs have advanced in accordance with a linear integration model of goods labor and capital markets The book subsequently evaluates the suitability of the European model of deep integration with costly institutions for the conditions specific to Africa considering for example the role of informal and non recorded trade Stylized cases of regional division of labour with increasing returns and imperfect competition are introduced to support the economic integration logic Past and current economic policies in Africa are scrutinized to answer the question how can African regions best foster new manufacturing industries and value chains across the continent In conclusion the book outlines content and processes of Common Industrial Policy in the African regions The book also addresses the controversial issue of international trade agreements between developing countries and the European Union or the USA and investigates whether these agreements impede or promote economic development in Africa The book includes a detailed roadmap describing how to improve key clauses of agreements for economic partnership in the interest of African countries In closing it outlines a new vision of joint sustainable development for Africa and Europe Assessing Prospective Trade Policy Oliver Morrissey, 2010-09-30 The European Union EU has provided trade preferences to the African Caribbean and Pacific ACP countries since 1975 To maintain these preferences a series of economic partnership agreements EPAs between the EU and regional groupings of ACP countries are being agreed negotiations started around 2003 and many framework agreements have been signed As multilateral negotiations within the World Trade Organisation have stalled EPAs are currently the single most important policy issue for ACP trade This volume assesses EPAs and the potential impact on ACP countries provides guidance for ACP negotiators in future negotiations and introduces methods to analyse the impact of future trade reforms The essential features are that ACP countries commit to remove tariffs on substantially all imports from the EU and the EU offers improved market access to ACP exporters For ACP countries the major impacts will be increased

imports from the EU hence a loss of tariff revenue and increased competition from imports in domestic and regional markets implying significant adjustment costs which may be offset by some increases in exports to the EU This collection excellently outlines a variety of analytical methods that can be used to assess the potential economic effects of trade policy reforms shows how these can be applied to EPAs and derives implications for the issues that should be addressed in negotiating the details of agreements This valuable contribution offers a balanced assessment of the issues and should be essential reading for postgraduates and researchers focussing on Development Economics Furthermore the book is written in an accessible style and should be an excellent resource for trade negotiators and government officials concerned with trade relations as well as officials in the European Commission individual countries ACP Commonwealth EU and in multilateral organizations WTO UNECA World Bank UNCTAD

The Financial Crisis Reconsidered Daniel Aronoff, 2016-04-08 In *The Financial Crisis Reconsidered* Aronoff challenges the conventional view that reckless credit produced the US housing boom and the financial crisis explaining how the large current account deficit and its mercantilist origin was a more fundamental cause He also demonstrates that the decision to provide relief for bank creditors rather than underwater homeowners was responsible for the prolonged recession that followed the crisis Aronoff proposes a novel theory to account for the ultimate origins of secular stagnation and economic volatility He shows how accumulation which occurs when a person or country earns more than it ever plans to spend generates both an excess of saving and a deficiency in demand While savings provide the funds to promote booms under consumption ensures that these booms will turn bust and that the economy will fall short of its potential growth rate Aronoff argues that mercantilists and top income earners engage in accumulation and that the influence of both types has grown in recent decades Combining economic theory and historical narrative this book offers a new perspective of the housing boom and the financial crisis concluding with innovative policy proposals to reduce accumulation without compromising the benefits of a market economy

Commerce Monthly, 1924 *The impact of information and communication technology (ICT) on international trade in agri-food products* Franziska Thiemann, 2013-11-13 The rapid diffusion of information and communication technologies ICT is believed to be one of several important drivers of international trade and globalisation The purpose of this dissertation was to analyse whether the three ICT fixed telephone lines mobile phones and the internet has encouraged international trade in important agri food products Gravity models of bilateral trade between countries were chosen to explain international trade We used panel data of the values of bilateral trade between pairs of countries for the period 1995 to 2009 The empirical results from OLS and negative binomial regression estimation suggest that ICT has an effect on international trade in agri food products The impact is however not always strong and contrary to expectations it is often negative For the products wine and fruit and vegetable juice we found no effect of ICT on trade at all Although there is great variation in the estimated impacts of individual ICT on international trade the impact of mobile phones is somewhat stronger than that of fixed telephone lines and of the internet

Die rasante Verbreitung von Informations und Kommunikationstechnologien IKT gilt als einer von vielen treibenden Krften des internationalen Handels und der Globalisierung Ziel dieser Dissertation war es herauszufinden ob die drei IKT Festnetztelefone Mobiltelefone und Internet den internationalen Handel von wichtigen Agrar und Ern hrungsg tern f rdert Gravitationsmodelle des bilateralen Handels wurden ausgew hlt um den internationalen Handel zu erkl ren Paneldaten wurden genutzt um den bilateralen Handel zweier L nder zwischen den Jahren 1995 und 2009 zu analysieren Die empirischen Ergebnisse der OLS Sch tzung und der negativ binominalen Regression zeigen dass IKT einen Effekt auf das Handelsvolumen von Agri food Produkten aus bt Der Einfluss ist nicht immer stark und entgegengesetzt der Erwartungen ist der gesch tzte Einfluss h ufig negativ Lediglich bei Wein und bei Obst und Gem ses ften konnte kein Einfluss von einem speziellen IKT auf den Handel nachgewiesen werden Obwohl es gro e Variationen bei den gesch tzten Effekten von einzelnen IKT auf den internationalen Handel gibt ist der Einfluss von Mobiltelefonen gr er als der von Festnetztelefonen und dem Internet

Second Image IPE Andreas Nölke,2023-07-17 This book argues that the lack of adequate theories of contemporary capitalism is due to the increasing separation of the sub disciplines of Comparative and International Political Economy Theorizing only takes place in one of the two over specialized sub disciplines of Political Economy thereby leading to a neglect of the interplay between national and international dimensions of capitalism The author seeks to rectify this gap by developing a theory of Second Image IPE Based on the second image notion developed by Kenneth Waltz he furthers the classical theoretical approaches as developed by Peter Gourevitch and Peter Katzenstein For this purpose he incorporates recent analytical developments in Comparative Capitalism and Growth Model analysis The book demonstrates the usefulness of Second Image IPE theory by studying the major empirical topics of Global Political Economy including security finance regional integration trade production and global
