Extreme Births Planets Most Extreme:

The Nine-Banded Armadillo W. J. Loughry, Colleen M. McDonough, 2024-02-19 The word armadillo is Spanish for little armored one This midsize mammal that looks like a walking tank is a source of fascination for many people but a mystery to almost all Dating back at least eleven million years the nocturnal burrowing insectivore was for centuries mistaken for a cross between a hedgehog and a turtle but it actually belongs to the mammalian superorder Xenarthra that includes sloths and anteaters Biologists W J Loughry and Colleen M McDonough have studied the nine banded armadillo *Dasypus novemcinctus* for more than twenty years Their richly illustrated book offers the first comprehensive review of everything scientists know about this unique animal Engaging both scientists and a broader public Loughry and McDonough describe the armadillo's anatomy and physiology and all aspects of its ecology behavior and evolution They also compare the nine banded armadillo with twenty or so other related species The authors pay special attention to three key features of armadillo biology reproduction disease and habitat expansion and why they matter Armadillos reproduce in a unique and puzzling manner females always give birth to litters of genetically identical quadruplets a strategy not found in any other vertebrates Nine banded armadillos are also the only vertebrates except for humans known to contract leprosy naturally And what about habitat expansion The authors suggest that the armadillo's remarkable spread across the southeastern United States may be the consequence of its most notable feature a tough protective carapace Biologists evolutionists students and all those interested in this curious creature will find *The Nine Banded Armadillo* rich in information and insight This comprehensive analysis will stand as the definitive scientific reference for years to come and a source of pleasure for the general public

The Birth of Stars and Planets John Bally, Bo Reipurth, 2006-08-24 Publisher description [Planets and People](#), 1897

A COSMIC BIRTH... STARTING BEFORE ZERO PSJ (Peet) Schutte, 2013-07-12 I explain Genesis 1 v 1 the beginning or birth of the Universe in terms of the Bible using not theology but mathematics I prove Genesis 1 verse 1 to be correct by using mathematics The Bible says IN THE BEGINNING OF CREATION 1 when God made heaven and earth 2 the earth was without form and void 3 with darkness over the face of the abyss Yes this I do explain mathematically and I manage this because I prove and explain four cosmic keys that build the Universe namely The Titius Bode Law The Lagrangian Points The Roche limit and Coanda Effect Everything in nature in the Universe applies these phenomena in how space forms The Titius Bode Law The Lagrangian Points The Roche Coanda Effect forms the Universe in as much as forming stars in spheres and forming galactica in circles These principles form space and materials This is a process that produces space and that is how the Universe began before the Universe began in space I take the cosmic birth back to before space came about as the Big Bang **Origins of Life Volume II** Vladivoj Valkovic, 2024-09-27 In *Origins of Life Volume II* life and its origin are inspected from traditional and unexpected points of view The book takes an interdisciplinary approach discussing astrobiology chemical evolution and how the Universe accommodates life molecular biology and philosophy It is an open

minded approach fully referenced throughout and each chapter includes a further reading section for anyone wishing to learn more about that perspective on the origins of life First everything started with the Big Bang from nothing It appears now that everything was aiming toward our existence some 13 75 109 years later being capable of understanding it all We did it using powerful tools science philosophy and religion Although we appreciate the contributions made by philosophy and religion our contemplations and doubts are based on the plentiful scientific evidence provided The reader will be guided from make up of the life stage Universe tools and materials needed for the living matter to be formed in the small part of the Universe which one could call Human Neighborhood or the Local Universe It contains galaxies galaxy clusters and voids and the Milky Way and its satellites influencing each other during this time span The book is easy to read accompanied by numerous references it could be of use to the expert in the field as well as for curious minds with a scientific philosophical or religious background

Extreme States of Matter Vladimir E. Fortov, 2015-12-26 With its many beautiful colour pictures this book gives fascinating insights into the unusual forms and behaviour of matter under extremely high pressures and temperatures These extreme states are generated among other things by strong shock detonation and electric explosion waves dense laser beams electron and ion beams hypersonic entry of spacecraft into dense atmospheres of planets and in many other situations characterized by extremely high pressures and temperatures Written by one of the world's foremost experts on the topic this book will inform and fascinate all scientists dealing with materials properties and physics and also serve as an excellent introduction to plasma shock wave and high energy density physics for students and newcomers seeking an overview This second edition is thoroughly revised and expanded in particular with new material on high energy density physics nuclear explosions and other nuclear transformation processes
