Zhang,2011-04-11 An exploration of the role of the news media in the development of EU China relations after the end of the Cold War this book provides empirical evidence to support what Nye and Anholt have argued that branding a country s image is soft power The author examines the nature of European Union and China coverage in Chinese and European news media respectively and explores how the economics politics and journalistic practice interplay in shaping the coverage Based on this analysis the author delves into the relationship between the news media and their foreign policy toward each other in terms of both the general direction of policy making and the policy in a specific issue area Including not only content analysis of media coverage but also has first hand interview materials with the officials involved in the decision making process and the journalists involved in reporting the EU and China the book sheds light on the way in which the media construct the post Cold War world and therefore play a role in transforming international relations Lochguard Highland Dragons Collection:

Genetic Criticism Dirk Van Hulle, 2022-02-24 In *Genetic Criticism* Dirk Van Hulle introduces the study of creative processes to an Anglophone audience As a method in the study of literary writing processes genetic criticism is also a reading strategy The idea behind this book is to introduce this strategy to a broader audience from interested readers and graduate students to early career researchers and literary critics In literary studies it is often obvious that a particular work somehow seems to hit a nerve but more challenging to pinpoint exactly why it works This book therefore starts from a clear basic assumption knowing how something was made can help us understand how and why it works This strategy is at the basis of many disciplines including art history By means of X ray technology or hyperspectral imaging it is possible to look at a painting as a multilayered object with not only spatial dimensions but also a temporal one This temporal dimension is the core of the reading strategy introduced in this book Note books marginalia manuscripts and typescripts even if one works with scans give a concrete dimension to literature which is a helpful reading strategy for many students On the one hand this involves concrete transferrable skills such as aspects of transcription and digital scholarly editing On the other hand it also involves more abstract theoretical issues relating to matters of authorship collaboration authority agency intention and intertextuality
