Fabricated Man The Ethics Of Genetic Control:

Fabricated Man Paul Ramsey, 1974 **Human Cloning and Human Dignity: An Ethical Inquiry**, Examines the moral social and political aspects to human cloning **A Christian Response to the New Genetics** David H. Smith, Cynthia B. Cohen, 2003 Life is a gift that includes powers to be used and celebrated but that doesn't necessarily justify the use of every new power that comes along This volume appeals to both secular and religious readers in the centre of the great debate over our new genetic powers These essays affirm many traditional Christian perspectives and virtues while also introducing new insights transfer genetic manipulation patenting health insurance and the moral status of embryos They conclude that it is naive to either to reject outright or wholeheartedly embrace the new genetic powers In fact sometimes the best we can expect is to learn how to cope with moral uncertainty *The Prohibition of Federal Government Funding of Human Cloning Research* United States. Congress. House. Committee on Science. Subcommittee on Technology, 1998

Science, Theology, and Ethics Ted Peters, 2017-03-02 Science challenges faith to seek fuller understanding and faith challenges science to be socially and ethically responsible This book begins with faith in God the Creator of the world and then expands our understanding of creation in light of Big Bang cosmology and new discoveries in physics Examining the expanding frontier of genetic research Ted Peters draws out implications for theological understandings of human nature and human freedom Issues discussed include methodology in science and theology eschatology in cosmology and theology freedom and responsibility in evolution and theology and genetic determinism genetic engineering and cloning in relation to freedom the commodification of human life and equitable distribution of the fruits of genetic technology The dialogue model of relationship between science and religion proposed in this book provides a common ground for the disparate voices among theologians scientists and world religions This common ground has the potential to breathe new life into current debates about the world in which we live move and have our being *Manipulated Man* Charles Robert, Dikran Hadidian, 1977-01-01 Pittsburgh Theological Monograph Series General Editor Dikran Y Hadidian *The Secular Revolution* Christian Smith, 2003-06-04 This collection presents a radical rethinking of the secularization of American public life **Some Choice** George J. Annas, 1998 This book is a passionate critique of the shallowness of choice rhetoric used to camouflage critical personal and public policy issues in contemporary debates in American medicine Our public discourse on life and death from health care to medical research and from risky behavior to assisted suicide is dominated by the market model of consumerism augmented by appeals to individual freedom In fact however in most cases there is no real choice left for individuals to make the important choices have been made by others and the illusion of choice fosters complacency Knee jerk libertarianism leads to a superficial consumer culture and life choices valued only by their monetary value Some Choice uses the cases of cloning drive through deliveries emergency medicine genetic privacy human experimentation tobacco control and physician assisted suicide among others to suggest ways in which we can break through our vapid and superficial public

discourse on life and death issues and begin to engage in a public dialogue that enriches our lives and society rather than cheapens them George Annas is one of the most widely recognized names in current bioethics debates His goal in this new book is to help open a national and international dialogue that sees the search for universal human rights as valuable and international cooperation to define protect and promote them as central to life

The Story of Bioethics Jennifer K. Walter, Eran P. Klein, 2003-10-08 This literally refreshing collection is based on the notion that the future of bioethics is inseparable from its past Seminal works provide a unique and relatively unexplored vehicle for investigating not only where bioethics began but where it may be going as well In this volume a number of the pioneers in bioethics Tom Beauchamp Lisa Sowle Cahill James Childress Charles E Curran Patricia King H Tristram Engelhardt William F May Edmund D Pellegrino Warren Reich Robert Veatch and LeRoy Walters reflect on their early work and how they fit into the past and future of bioethics Coming from many disciplines generations and perspectives these trailblazing authors provide a broad overview of the history and current state of the field Invaluable to anyone with a serious interest in the development and future of bioethics at a time when new paths into medical questions are made almost daily The Story of Bioethics is a Baedeker beyond compare

Fertility Preservation Jacques Donne, S. Samuel Kim, 2021-04-08 A synthesis of the most up to date research and technologies in fertility preservation written by leading experts in the field

Birth Rights and Wrongs Dov Fox, 2019-06-06 This book lifts the curtain on reproductive negligence gives voice to the lives it upends and vindicates the interests that advances in medicine and technology bring to full expression It charts the legal universe of errors that deprive pregnancy or parenthood of people who set out to pursue them impose pregnancy or parenthood on those who tried to avoid these roles or confound efforts to have a child with or without certain genetic traits

Place of Science in a World of Values and Facts Loucas G. Christophorou, 2005-12-27 This is an engrossing book It is also an unusual book it is written by a scientist who is quite willing to talk about the softer side of life about things such as love and respect and responsibility and to try and position them in the context of his science He is also willing to talk about religion the manner in which it relates to science and science to it and to attempt reconciliation of both He sets himself a tough task to tread the narrow path between the maudlin and the severely sober In this he is eminently successful He is successful not because he aims at any grand synthesis but because he has chosen the more modest path of simply laying out the cards on the table This work is also unusual for another reason The majority of books that attempt to explain science to a lay public that try to describe its workings its raison d'être its hidden contents its societal impact its implications for our future etc are written by theorists This is hardly surprising The theoretician after all is expected to think deeply to be the great unifier to be concerned with meaning Very few books about science are written by scientists ones who spend their time in a working experimental laboratory This is such a book And because it is it is also a very different book

W. Daly, 2021-02-04 The quest to live much longer has moved from legend to the laboratory Recent breakthroughs in genetics and pharmacology have put humanity on the precipice of slowing down human aging to extend the healthy life span The promise of longer healthier life is enormously attractive and poses several challenging questions for Christians Who wouldn't want to live 120 years or more before dying quickly How do we make sense of human aging in light of Jesus' invitation to daily take up our crosses with the promise of the resurrection to come Is there anything wrong with manipulating our bodies technologically to live longer If so how long is too long Should aging itself be treated as a disease In *Chasing Methuselah* Todd Daly examines the modern biomedical anti aging project from a Christian perspective drawing on the ancient wisdom of the Desert Fathers who believed that the incarnation opened a way for human life to regain the longevity of Adam and the biblical patriarchs through prayer and fasting Daly balances these insights with the christological anthropology of Karl Barth discussing the implications for human finitude fear of death and the use of anti aging technology weaving a path between outright condemnation and uncritical enthusiasm *Genomics and Bioethics: Interdisciplinary Perspectives, Technologies and Advancements*

Hongladarom, Soraj, 2010-09-30 This book focuses on ethical social cultural and legal implications of genetics genomics and genetic databanking as they relate to concrete cultural and historical traditions Provided by publisher **Redefining Human Life** Robert H Blank, 2019-08-16 This book examines critical social policy issues emerging from recent developments in human reproductive technology Although considerable attention has been focused on the ethical dimensions of these developments the policy dimension has largely been obscured Dr Blank now provides a far ranging overview of the cumulative impact on society of a wide array of new reproductive technologies and the social patterns that accompany or precede their application The book begins with a description of the current context of reproductive decision making Dr Blank demonstrates how emerging technologies are producing complex and intense social policy concerns then reviews in detail human reproductive technologies and illustrates the significant consequences of technological innovations for political and legal concepts of rights and obligations Examples include recent cases involving torts for wrongful life He analyzes possible alterations in the moral and legal status of the fetus in light of apparent technological and social policy trends and presents a paradigm of fetal rights that reflects these changes A final case is made for a comprehensive assessment of reproductive technologies as well as for the urgent need to refine concepts of human life that in the past have been taken for granted but that now are being challenged *Human Cloning and Human Dignity* President's Council on Bioethics (Etats-Unis), 2002
