Industrial Buildings and Factories Oswald W. Grube, 1971

Historical Industrial Buildings and their Real Estate

Utilisation Robin Groer, Patrick J. Morrissey, Thomas Glatte, 2025-07-10 Both Germany and the United Kingdom have economically vital cities and peripheral locations that contain historic industrial structures or districts. This prompts the question of how to manage historic industrial buildings and how they can be preserved to maintain their value while simultaneously benefiting future generations. This book focuses on the potential and redevelopment opportunities of historical industrial buildings. While on the one hand these historical industrial buildings reflect culturally significant buildings and sites deserving of appreciation and hence preservation, on the other hand they are frequently situated in promising and fascinating locations that could represent significant possibilities for urban development and neighborhood planning. This publication is part of the series *Studien zum nachhaltigen Bauen und Wirtschaften*. **Die Freie Universität Berlin (1967-1973) / The Free University Berlin (1967 - 1973)** Karl Kiem, 2008-06-25 Das Gebäude der Freien Universität Berlin Candilis Josic Woods Schiedhelm 1963/73 ist ein bahnbrechendes Werk in der Tradition der heroischen Moderne. Dieses wird in der vorliegenden Untersuchung anhand einer Fülle bisher unpublizierten Quellenmaterials zum ersten Mal umfassend untersucht. So werden nicht nur die bei diesem Gebäude umgesetzten technischen Innovationen, sein utopischer Charakter und sein Einfluss auf die internationale Entwicklung im Hochschulbau der sechziger Jahre des zwanzigsten Jahrhunderts untersucht, sondern auch die personellen, politischen und mentalen Ursachen für die Vielzahl der technischen Probleme, die die Ausführung des Gebäudes kompromittierten und schließlich einen dunklen Schatten auf seine Reputation legten. Das in jüngster Zeit wiedererwachte Interesse an der FU Berlin und den Architekten Candilis Josic Woods und Schiedhelm zeigt wie die Relevanz dieses Gebäudes mit seiner kompakten Synthese von komplexer Konzeption und tektonischer Innovation in Verbindung mit differenzierten baugeschichtlichen Bezügen jenseits von nostalgischen Formen für Architekten, Lehrende, Studenten und Theoretiker fort dauert. *Industrial Heritage in the Nordic and Baltic Countries* Henrik Wager, 2000 **The Works** Betsy H. Bradley, 1999 While tracing the important developments in industrial architecture over a one hundred year period, she demonstrates that as the United States became an industrialized nation, the goals pursued in industrial architecture remained straightforward and constant, even as the means to achieve them changed. *Industrial Architecture* John Anthony Winter, 1970 **Industrial Heritage in Denmark** Caspar Jørgensen, Morten Pedersen, 2013-01-24 In presenting 25 industrial sites of national significance in the context of changing techno-economic paradigms, this book considers the development of Danish industrial landscapes and built-up environments in the period 1840-1970. Three case studies of ports, sugar mills, and cement plants are also presented. The book concludes with two chapters that discuss perceptions and strategies for the conversion of industrial sites, and an overview is given covering the preservation of industrial heritage in Denmark historically. Although Denmark is often perceived as an agricultural country, industry is a very

important sector in the Danish economy employing a large number of people and having considerable influence on Danish society and culture in general The appreciation of industrial history as well as the tangible and intangible remains of industry is an important heritage Anne Mette Rahbek General Director of the Danish Agency of Culture

Architectures of Bureaucracy Jens van de Maele, 2025-01-27 This monograph examines the interrelationship between politics and modernist architecture in interwar Belgium focusing on political architectural and administrative elites as propagators of new ideas of governance. While Belgium was strongly influenced by neighbouring France and Germany it also developed its own avant garde approaches to socio political problems. In the second half of the 1930s the country was the scene of a remarkable political and architectural experiment involving an ambitious plan for the large scale construction of modernist government office buildings. These buildings were seen as essential to the development of a technocratic model of governance aimed at strengthening the role of the executive and minimising the influence of parliament. More specifically the efficient new office architecture was supposed to create a new type of perfect civil servant whose loyalties would no longer lie with political parties but with scientists and management experts. Such experts and scientists constituted a rising elite of *homines novi* with strong though often veiled political ambitions. As such this book contributes to our understanding of political culture in the age of extremes.
