F. K. Koerner,1973-01-01 Techmer s Internationale Zeitschrift f r Allgemeine Sprachwissenschaft 1884 1890 served at a time of neogrammarian domination in the linguistic scene of the late 19th century as an international forum for the discussion of general linguistics topics the Humboldtian philosophy of language and the promotion of non Indo European linguistic research This essay starts with information on the founder and sole editor of the journal Friedrich Techmer then analyzes the most significant contributions to the journal surveying in the same part the range of publications as well as the international character of both the Advisory Board and the contributors and in the concluding chapter shows how IZAS is of relevance even for the linguistic pursuits of today

   Einleitung in die Allgemeine Sprachwissenschaft (1884⏠1890) together withZur Literatur der Sprachenkunde Europas (Leipzig, 1887) August Friedrich Pott,1974-01-01 This volume contains August Friedrich Pott s Einleitung in de Allgemeine Sprachwissenschaft which appeared between 1884 and 1890 in F Techmer s Internationale Zeitschrift f r Allgemeine Sprachwissenschaft Leipzig In addition the volume contains Pott s Zur Literatur der Sprachenkunde Europas Leipzig 1887 the obituary by Paul Horn G ttingen 1888 and a preface to this new edition by E F K Koerner   **History of Linguistics, Volume IV** Anna Morpurgo Davies,Giulio C. Lepschy,2016-04-15 The History of Linguistics to be published in five volumes aims to provide the reader with an authoritative and comprehensive account of the attitudes to language prevailing in different civilizations and in different periods by examining the very varied development of linguistic thought in the specific social cultural and religious contexts involved Issues discussed include the place of language in education variation and prestige and approaches to lexical and grammatical description The authors of the individual chapters are specialists who have analysed the primary sources and produced original syntheses by exploring the linguistic interests and

assumptions of particular cultures in their own terms without seeking to reinterpret them as contributions towards the development of contemporary western conceptions of linguistic science In Volume IV Nineteenth Century Linguistics Anna Morpurgo Davies shows how linguistics came into its own as an independent discipline separated from philosophical and literary studies and enjoyed a unique intellectual and institutional success tied to the research ethos of the new universities until it became a model for other humanistic subjects which aimed at scientific status The linguistics of the nineteenth century abandons earlier theoretical discussions in favour of a more empirical and historical approach using new methods to compare languages and to investigate their history The great achievement of this period is the demonstration that languages such as Sanskrit Latin and English are related and derive from a parent language which is not attested but can be reconstructed This book discusses in detail the theories developed and the individual findings obtained In contrast with earlier historiographical trends it denies that the new approach originated entirely from German Romanticism and highlights a form of continuity with the eighteenth century while stressing that a deliberate break took place round the 1830s By the end of the century the results of comparative and historical linguistics had been generally accepted but it soon became clear that a historical approach could not by itself solve all questions that it raised At this point the new interest in description and theory which characterizes the twentieth century began to gain prominence   Encyclopedia of Language and Linguistics ,2005-11-24 The first edition of ELL 1993 Ron Asher Editor was hailed as the field s standard reference work for a generation Now the all new second edition matches ELL s comprehensiveness and high quality expanded for a new generation while being the first encyclopedia to really exploit the multimedia potential of linguistics The most authoritative up to date comprehensive and international reference source in its field An entirely new work with new editors new authors new topics and newly commissioned articles with a handful of classic articles The first Encyclopedia to exploit the multimedia potential of linguistics through the online edition Ground breaking and International in scope and approach Alphabetically arranged with extensive cross referencing Available in print and online priced separately The online version will include updates as subjects develop ELL2 includes c 7 500 000 words c 11 000 pages c 3 000 articles c 1 500 figures 130 halftones and 150 colour Supplementary audio video and text files online c 3 500 glossary definitions c 39 000 references Extensive list of commonly used abbreviations List of languages of the world including information on no of speakers language family etc Approximately 700 biographical entries now includes contemporary linguists 200 language maps in print and online Also available online via ScienceDirect featuring extensive browsing searching and internal cross referencing between articles in the work plus dynamic linking to journal articles and abstract databases making navigation flexible and easy For more information pricing options and availability visit www info sciencedirect com The first Encyclopedia to exploit the multimedia potential of linguistics Ground breaking in scope wider than any predecessor An invaluable resource for researchers academics students and professionals in the fields of linguistics anthropology education psychology language acquisition

should enable the linguist of today to obtain a fairly rounded picture of this important 19th century scholar who together with Bopp and Grimm has justly been ranked among the founding fathers of the comparative historical study of Indo European languages Rasmus Kristian Rask 1787 1832 did not occupy himself with historical linguistics alone as a comparativist but also with language as a system based on a notion of structure comprised of three key ideas the idea of wholeness the idea of transformation derivation and composition and the idea of self regulation He formulated theoretical and practical premises for the composition of grammars and in this he was far ahead of his time and in closer proximity to the linguistic concerns and problems of our era From both theoretical and pedagogical points of view Rask s grammar of Icelandic remains a most remarkable work   The Letter Liveth Joan Leopold,1983 Recently there has been increased appreciation of the fact that August Friedrich Pott 1802 1887 possessed valuable insights and articulated uncommon positions in Indo European comparative linguistics general linguistics and linguistic ethnology This introduction and accompanying bibliography and catalogue aim to provide additional access routes to Pott s career by chronicling his life works and library collection
