A Student's Guide to Einstein's Major Papers Robert E Kennedy, 2012-01-19 In 1905 Albert Einstein produced breakthrough work in three major areas of physics atoms and Brownian motion quanta and the special theory of relativity followed in 1916 by the general theory of relativity This book develops the detail of the papers including the mathematics to guide the reader in working through them

Einstein's Annalen Papers Jürgen Renn, 2005-05-06 Ein spannender Einblick in ein Stück Wissenschaftsgeschichte Borsenblatt 3 2005 1905 in seinem Annus Mirabilis machte Albert Einstein drei Entdeckungen über die Grundlagen der Natur die die Basis für seinen Ruhm als Physiker bildeten Diese drei revolutionären Artikel über die Lichtquantenhypothese die Brownsche Molekularbewegung sowie die Spezielle Relativität wurden in der Zeitschrift Annalen der Physik veröffentlicht Alle drei gelten heute als Säulen der modernen Wissenschaft und ihrer Anwendungen in der Technologie und sind aus der modernen Welt nicht mehr wegzudenken Der vorliegende Band präsentiert sämtliche von Albert Einstein in der Zeitschrift Annalen der Physik veröffentlichten Beiträge darunter einige der wichtigsten Artikel die er jemals schrieb Enthalten sind ebenso die drei revolutionären Artikel des Jahres 1905 als Faksimileabdruck Darüber hinaus enthält der Band Beiträge welche die Folgen der bahnbrechenden Ideen dieser Artikel von $E=mc^2$ bis zur Quantentheorie der spezifischen Wärme aufzeigen Die Wissenschaftshistoriker Jürgen Renn MPI für Wissenschaftsgeschichte Berlin David C Cassidy Hofstra Universität Hempstead USA Michel Janssen Universität von Minnesota USA und Robert Rynasiewicz John Hopkins Universität USA haben die vorliegende Sammlung durch aktuelle Artikel ergänzt und kommentiert

Einstein's Masterwork John Gribbin, 2016-09-06 In 1915 Albert Einstein presented his masterwork to the Prussian Academy of Sciences a theory of gravity matter space and time the General Theory of Relativity Einstein himself said it was the most valuable theory of my life and of incomparable beauty It describes the evolution of the universe black holes the behavior of orbiting neutron stars and why clocks run slower on the surface of the earth than in space It even suggests the possibility of time travel And yet when we think of Einstein's breakthrough year we think instead of 1905 the year of Einstein's Special Theory of Relativity and his equation $E=mc^2$ as his annus mirabilis even though the Special Theory has a narrower focus Today the General Theory is overshadowed by these achievements regarded as too difficult for ordinary mortals to comprehend In Einstein's Masterwork John Gribbin puts Einstein's astonishing breakthrough in the context of his life and work and makes it clear why his greatest year was indeed 1915 and his General Theory his true masterpiece

Einstein from 'B' to 'Z' John Stachel, 2001-12-10 John Stachel the author of this collection of 37 published and unpublished articles on Albert Einstein has written about Einstein and his work for over 40 years Trained as a theoretical physicist specializing in the theory of relativity he was chosen as the founding editor of The Collected papers of Albert

Einstein 25 years ago and is currently Director of the Boston University Center for Einstein Studies Based on a detailed study of documentary evidence much of which was newly discovered in the course of his work Stachel debunks many of the old and some new myths about Einstein and offers novel insight into his life and work Throughout the volume a new more human picture of Einstein is offered to replace the plaster saint of popular legend In particular a youthful Einstein emerges from the obscurity that previously shrouded his early years and much new light is shed on the origins of the special and general theories of relativity Also discussed in some detail are Einstein's troubled relationship with his first wife his friendships with other physicists such as Eddington Bose and Pauli and his Jewish identity The essays are grouped thematically into the following areas The Human Side Editing the Einstein Papers Surveys of Einstein's Work Special Relativity General Relativity Quantum Theory Einstein and Other Scientists Book Reviews Because the essays are independent of one another readers will be able to dip into this collection to satisfy varying interests It will be of particular interest to historians of 20th century science working physicists and students as well as to the many members of the general reading public who continue to be fascinated by aspects of Einstein's life and work

Einstein's Miraculous Year Albert Einstein, 2021-05-11 Five extraordinary papers by Albert Einstein that transformed physics edited and introduced by John Stachel and with a foreword by Nobel laureate Roger Penrose After 1905 Einstein's miraculous year physics would never be the same again In those twelve months Einstein shattered many cherished scientific beliefs with five extraordinary papers that would establish him as the world's leading physicist This book brings those papers together in an accessible format The best known papers are the two that founded special relativity On the Electrodynamics of Moving Bodies and Does the Inertia of a Body Depend on Its Energy Content In the former Einstein showed that absolute time had to be replaced by a new absolute the speed of light In the second he asserted the equivalence of mass and energy which would lead to the famous formula $E = mc^2$ The book also includes On a Heuristic Point of View Concerning the Production and Transformation of Light in which Einstein challenged the wave theory of light suggesting that light could also be regarded as a collection of particles This helped to open the door to a whole new world that of quantum physics For ideas in this paper he won the Nobel Prize in 1921 The fourth paper also led to a Nobel Prize although for another scientist Jean Perrin On the Movement of Small Particles Suspended in Stationary Liquids Required by the Molecular Kinetic Theory of Heat concerns the Brownian motion of such particles With profound insight Einstein blended ideas from kinetic theory and classical hydrodynamics to derive an equation for the mean free path of such particles as a function of the time which Perrin confirmed experimentally The fifth paper A New Determination of Molecular Dimensions was Einstein's doctoral dissertation and remains among his most cited articles It shows how to calculate Avogadro's number and the size of molecules These papers presented in a modern English translation are essential reading for any physicist mathematician or astrophysicist Far more than just a collection of scientific articles this book presents work that is among the high points of human achievement and marks a watershed in the history of science

Coinciding with the 100th anniversary of the miraculous year this new paperback edition includes an introduction by John Stachel which focuses on the personal aspects of Einstein's youth that facilitated and led up to the miraculous year **The collected papers of Albert Einstein** Albert Einstein, 2004

How Einstein Created Relativity out of Physics and Astronomy David Topper, 2012-09-25 This book tracks the history of the theory of relativity through Einstein's life with in depth studies of its background as built upon by ideas from earlier scientists The focus points of Einstein's theory of relativity include its development throughout his life the origins of his ideas and his indebtedness to the earlier works of Galileo Newton Faraday Mach and others the application of the theory to the birth of modern cosmology and his quest for a unified field theory Treading a fine line between the popular and technical but not shying away from the occasional equation this book explains the entire range of relativity and weaves an up to date biography of Einstein throughout The result is an explanation of the world of relativity based on an extensive journey into earlier physics and a simultaneous voyage into the mind of Einstein written for the curious and intelligent reader *Einstein: What is the Theory of Relativity?* Albert Einstein, Harry Yoon, 2024-04-08

What is the Theory of Relativity According to the Man Himself This short article was originally written by Albert Einstein at the request of The London Times in 1919 and it was intended for the general audience If you are interested in getting a general overview and the historical context regarding Einstein's relativity then this is the best introduction 10 pages Despite the somewhat ambiguous title however this article will not teach you the theory of relativity For that you will need to consult a slightly more advanced reference Einstein published his two seminal papers on special relativity in 1905 and he published his field equations for gravity now known as Einstein's field equations in 1915 which was viewed as the completion of the theory of general relativity One of the most important predictions of his theory was bending of light in a strong gravitational field This was confirmed by the English expedition led by Sir Arthur Eddington in 1919 during the solar eclipse which made Einstein an instant celebrity This newspaper article was published after Eddington's public announcement of this rather exciting and historical event It was right after the end of WWI It was originally written by Einstein in German and both the German and English translated versions are now in public domain This short booklet attempts at a new translation to give a somewhat clearer account of what Einstein wanted to convey in his original writing It is the BEST high level account of the development of relativity by Einstein himself A completely new English translation 2024 *Einstein: A Brief History of the Theory of Relativity* Albert Einstein, Harry Yoon, 2024-06-01

How Did the Theory of Relativity Come to Be This short booklet is based on Einstein's 1921 manuscript A Brief Outline of the Development of the Theory of Relativity in German This article was written by the request of the scientific journal Nature and it was published translated into English as the first article of the special issue dedicated to relativity in February 1921 This special issue of Nature also included other papers by various experts in the field such as H A Lorentz Sir Arthur Eddington and Hermann Weyl and Einstein's paper served as an introduction providing a historical overview of the development of the

theory of relativity If you are interested in learning how Einstein came up with the theory of relativity then this short booklet 10 pages will be a great investment of your time A completely new English translation 2024 *Einstein's Seven Essays on Relativity, Geometry, and Scientific Methods* Albert Einstein, 2025-03-14 A Compilation of 7 Articles by Einstein from 1914 to 1921 New modern English translation 2024 2025 A collection of Einstein's writings on special relativity and general relativity geometry and scientific methods written for the general public and scientists On the Principle of Relativity 1914 On Principles in Theoretical Physics 1914 What is the Theory of Relativity 1919 A Brief Account of the Development of Relativity 1921 Induction and Deduction in Physics 1919 Aether and the Theory of Relativity 1920 Geometry and Experience 1921 These essays are mainly newspaper articles and scientific papers published in general science journals as opposed to physics journals They are all must reads for the Einstein enthusiasts and serious scientists and especially aspiring theoretical physicists Note All of these articles were previously published as separate books or as part of collections
