Eisenman Architects:

Eisenman Architects Peter Eisenman, 1995 In both these respects Peter Eisenman differs not only from other architects of his own generation but from nearly all other architects working today **Architectural Possibilities in the Work of Eisenman** Michael Jasper, 2022-11-11 This book examines the central decades of Peter Eisenman's work through a formal and thematic analysis of key architectural projects and writings revealing underlying characteristics and arguing for their productive continuity and transformative role The book explores Eisenman's approach to architectural form generation and thinking It does this through a thematic and formal analysis of projects and writings from the mid 1970s to the mid 1990s Following an introductory chapter addressing the theme of potentialities the book is organised in two parts The first part focuses on key period writings of Eisenman framing the close reading around a practice of resistance the architect's approach to history as analysis and the transformative conceptualisation of time In the second part the book undertakes an analysis of select projects from the 1980s and 1990s Three formal preoccupations and conceptual orientations ground manipulations figuration and spatial events organise this part of the book Previously unpublished material from the Peter Eisenman fonds Canadian Centre for Architecture Montréal provides primary source material A concluding chapter addresses Eisenman's teaching its relation to his larger project and possible legacies for educators practitioners scholars and theorists

Architecture and Spectacle: A Critique Gevork Hartoonian, 2016-12-05 Focusing on six leading contemporary architects Peter Eisenman Frank Gehry Bernard Tschumi Zaha Hadid Rem Koolhaas and Steven Holl this book puts forward a unique and insightful analysis of neo avant garde architecture It discusses the spectacle and excess which permeates contemporary architecture in reference to the present aesthetic tendency for image making but does so by applying the tectonic of theatricality discussed by the 19th century German architect Gottfried Semper In doing so it breaks new ground by opening up a dialogue between the study of the past and the design of the present The work of each discussed architect is seen as addressing a historiographical problem To this end and this is the second important aspect of this book the chosen buildings are discussed in terms of the thematic of the culture of building the tectonic of column and wall for example rather the formal and this through a discussion that is informed by the latest available theories Having set the aesthetic implication of the processes of the digitalization of architecture the book's conclusion highlights strategies by which architecture might postpone the full consequences of digitalization and thus the becoming of architecture as ornament on its own right **2000 Architects** Aisha Hasanovic, 2006 Doctor Haydock the resident GP of St Mary Mead hopes to cheer up Miss Marple as she recovers from the flu with a little story The tale revolves around the return of the prodigal son of Major Laxton the devilishly handsome Harry Laxton Harry after leading a life of childish indiscretions and falling head over heels for the village tobacconist's daughter has made good and returned to lay claim to his tumbling childhood home and introduce the village to his beautiful new wife But the villagers are prone to gossip about young Harry's past and one person in particular cannot

forgive him for tearing down the old house Will Miss Marple's acumen be up to the task of solving the story **By Other Means** Global Art Affairs, 2017-02-20 Peter Eisenman is an internationally recognized architect and educator For more than a half century he has profoundly influenced generations of academics and practitioners with his buildings writing and teaching By developing formal and linguistic critiques of architecture's bourgeois conventions his activism seeks to undermine authority by creating architecture demanding close attention By Other Means traces Eisenman's evolution from his formative years to his well known Houses series and beyond Unpublished work from his undergraduate master's and doctoral studies reveal an Eisenman before Eisenman This material is printed along with correspondence from Colin Rowe ephemera from the Institute for Architecture and Urban Studies and previously unseen sketches diagrams for Houses I II VI and X Featuring drawings and ephemera relating to various projects and proposals in the United States e g Princeton and New York and Europe e g Liverpool and Venice This book is published on the occasion of the exhibition By Other Means curated by Mathew Ford with Jeffrey Kipnis as part of Time Space Existence organized by GAA Foundation at the Palazzo Bembo in Venice Italy for the 15th International Architecture Exhibition May 28 November 27 2016 Eisenman is most well known for his iconic and controversial design of the Memorial to the Murdered Jews of Europe Holocaust Memorial in Berlin 2003 04 Eisenman Architects Todd Gannon, 2008-01-03 The basic form of the American sports stadium has not changed much in the last century But in an unexpected and controversial act of daring the Arizona Cardinals football team selected awarding winning architect and intellectual provocateur Peter Eisenman to design their stadium in Glendale Arizona Opened in the summer of 2006 Eisenman's latest work rejects all traditional and staid notions of the sports stadium Inspired by and sectioned like a barrel cactus its shell is composed of huge steel paraboloid sections The domed stadium boasts a steel and fabric retractable roof that allows light to penetrate when closed while maintaining an airy feel inside The most ground breaking feature of the design is its grass roll out field which remains outside the stadium until game time when it is rolled in on steel wheel sets powered by small electric motors Eisenman Architects the eighth volume in the Source Books in Architecture series provides a comprehensive look at a contemporary masterpiece and a landmark of excellence in civic and sports architecture Giuseppe Terragni: Transformations, Decompositions Critiques Peter Eisenman, Giuseppe Terragni, Manfredo Tafuri, 2003-09-15 This book documents and investigates two of Italian rationalist architect Terragni's masterworks the Casa del Fascio 1933 1936 and the Casa Giuliani Frigerio 1939 1940 This is a far reaching study which gives what Eisenmann calls a critical and textual reading of the buildings Crisis of the Object Gevork Hartoonian, 2006-09-21 Looking back over the twentieth century Hartoonian discusses the work of three major architects Peter Eisenman Frank Gehry and Bernard Tschumi in reference to their theoretical positions and historicizes present architecture in the context of the ongoing secularization of the myths surrounding the traditions of nineteenth century architecture in general and in particular Gottfried Semper's discourse on the tectonic Providing a valuable contribution to the current debates surrounding

architectural history and theory this passionately written book makes valuable reading for any architect Shoah Presence: Architectural Representations of the Holocaust Eran Neuman, 2016-04-01 Through the analysis of several commemorative acts in space matter and image namely museums and memorials this book reflects on the ways in which architecture as a discipline a practice and a discourse represents the Holocaust In doing so it problematises how one presents an extreme historical case in a contemporary context and integrates the historical into actuality By examining several cases the book defines the issues faced by various architects who dealt with this topic and discusses their separate and distinctive approaches In each case it analyses the ways in which the cultural and political contexts of commemoration led to a different interpretation of the condition Focusing on the Ghetto Fighters House the world's first Holocaust museum Yad Vashem Israel's national Holocaust memorial in Jerusalem the US Holocaust Memorial Museum in Washington and the Holocaust Memorial in Berlin the book discusses how the representation of history by architecture creates a dialectic process in which architecture mediates the past to the present while at the same time creating a present saturated with historical contexts It shows how together they are incorporated into one another and create a new reality past and present intertwined **Freud for Architects** John Abell, 2020-11-22 Freud for Architects explains what Freud offers to the understanding of architectural creativity and architectural experience with case examples from early modern architecture to the present Freud's observations on the human psyche and its influence on culture and social behavior have generated a great deal of discussion since the 19th century Yet what Freud's key ideas offer to the understanding of architectural creativity and experience has received little direct attention That is partly because Freud opened the door to a place where conventional research in architecture has little traction the unconscious Adding to the difficulties Freud's collection of work is vast and daunting Freud for Architects navigates Freud's key ideas and bridges a chasm between architecture and psychoanalytic theory The book highlights Freud's ideas on the foundational developments of childhood developments on which the adult psyche is based It explains why and how the developmental stages could influence adult architectural preferences and preoccupations spatial intuition and beliefs about what is proper and right for architectural design As such Freud for Architects will be of great interest to students practitioners and scholars in a range of disciplines including architecture psychoanalysis and philosophy *The Seeds of Time* Fredric Jameson, 1994 Long considered the foremost American Marxist theorist Fredric Jameson continues his investigation of postmodernism under late capitalism in *The Seeds of Time* In three parts Jameson presents the problem of Utopia attempting to diagnose the cultural present and to open a perspective on the future of a world that is all but impossible to predict with any certainty a telling of the future as Jameson calls it with an imperfect deck *The Antinomies of Postmodernity* highlights the seemingly unresolvable paradoxes of intellectual debate in the age of postmodernity Jameson suggests that these paradoxes revolve around the idea of nature the terms of antifoundationalism and antiessentialism and contemporary society's inability or refusal to consider the idea of Utopia The chapter attempts to

sketch the unrepresentable exterior of these debates which is the locus of the future according to Jameson In Utopia
 Modernism and Death Jameson meditates on the fascinating and terrifying Utopian fiction Chevengur written in the 1920s by
 the Soviet author Andrei Platonov He discusses the unique character of Utopian visions in the Second World of communism
 where commodity fetishism has not had as profound an effect on social relations as we have seen in the First World under
 late capitalism The Seeds of Time continues in The Constraints of Postmodernism with an examination of contemporary
 architectural trends in an attempt to suggest the limits of the postmodern By delineating these limits Jameson stakes out a
 prediction of the boundaries of postmodernity the unrepresentable exterior approached in Part One which we need to

 Lee, 2024-10-31 This book offers a novel perspective on contemporary architecture exploring its position in mediatization
 attained through technological apparatuses It introduces the novel concepts of apparatus centricity and mediatization of
 architecture which have significant disciplinary and cultural ramifications Highlighting key technological and theoretical
 developments the book's narrative traces the transformation of architecture from the modernist era to the present digital age
 En route it reflects on how architecture becomes a crucial element of shifting dispositives through its confluence with
 technologies of aestheticization and virtualization and by emblemizing ecological ideals It also illuminates the
 reconfiguring of architectural practice through examining surprising interactions and analogies between architecture and
 music whose developments in notation and codification continually change the relationship between composer and performer
 The book explores how architecture is reshaped by broader theory and practice in media and ultimately serves as a cognitive
 agent It underscores that architecture profoundly influences our phantasmagoric image driven affective world through its
 increasingly apparatus centric approach to conception design production and mediatization Architecture in the Age of
