Eject Eject:

Eject! Eject! John Nichol, 2023-05-25 Eject Eject When the call is made to abandon an aircraft it's only the beginning of the story From the Sunday Times bestselling writer John Nichol author of Spitfire Lancaster and Tornado comes a brilliant new book that reveals the astonishing story of an invention that has saved many thousands of lives around the world including his own the ejection seat Nichol tells the remarkable tale of how the ejection seat was first conceived during the Second World War as countless lives were lost in accidents and in battle In the wake of the war that technological race to save aircrew lives using explosive seats continued at an incredible pace Nichol tells the story of the brave men who risked their lives testing those early devices and interviewed the first British pilot to eject back in 1949 when ejection from pulling the handle to being under the parachute took thirty seconds Today that figure is down to around one second Packed with interviews with aircrew who know exactly how it feels to Bang Out from an aircraft at high speed both in peace and in war the book gives the reader a vivid sense of what that life saving experience feels like but also features the moving accounts of what happens next from the viewpoint of both the crews and their families who often have little or no information about whether or not their loved ones have survived Because ejecting is just the start of a journey Packed with dramatic action incredible science and moving recollections Eject Eject is an essential read *Eject! Eject!* John Nichol, 2024-11-05

Catapults you into the heart of the most epic experiences of ejection escape and survival Andy McNab I thought the ejection seat was a rather dangerous somewhat curious contraption But that I would never need it When Jo Lancaster the first British pilot to eject in an emergency triggered his ejection seat in 1949 it took thirty seconds before he was safely away from the aircraft and under his parachute Since those first post Second World War ejections many tens of thousands of lives have been saved by increasingly sophisticated escape systems When John Nichol's Tornado was blasted out of the sky during the 1991 Gulf War a mere 2.5 seconds elapsed between pulling the ejection handle and his parachute opening Today the newest seats can automatically initiate ejection if the system decides the pilot faces mortal danger and cannot react quickly enough Now Nichol tells the incredible story of the ejection seat in war and in peace of the pioneers who risked everything during the early days of development in the 1940s and 50s of the designers who went head to head with the authorities in order to realise their vision and of the extraordinary men and women who were given a second chance at life after facing disaster We see how the technology was adapted when the prospect of crashing in North Vietnam was sometimes preferable to ejecting and risking capture what happens to the body when it is catapulted from an aircraft under great force how an ejectee can be rescued from enemy territory Packed with gripping action and cutting edge science Eject Eject is fuelled by dramatic deeply moving and previously unheard first hand accounts by ejectees and their families Because pulling the yellow and black ejection handle is just the start of the story Federal Register, 2013-11 **Eject!
