El Croquis, 2006 *The New Spanish Architecture* Anatxu Zabalbeascoa, 1992 Traces the history of architecture in Spain since World War II and examines the work of thirteen architects and firms **Croquis** Toyoo Itō, 2005 X. D. G. A. Xaveer de Geyter, 1992-2005, 2005 Image, Text, Architecture Robin Wilson, 2016-03-09 Image Text Architecture brings a radical and detailed analysis of the modern and contemporary architectural media addressing issues of architectural criticism architectural photography and the role of journal editors It covers examples as diverse as an article by British artist Paul Nash in *The Architectural Review* 1940 an early project by French architects Lacaton Vassal published in the journal 2G 2001 and recent photography by Hisao Suzuki for the Spanish journal *El Croquis* At the intersection of image and text the book also reveals the role of the utopian impulse within the architectural media drawing on theories of utopian discourse from the work of the French semiotician and art theorist Louis Marin and the American Marxist critic Fredric Jameson Through this it builds a fresh theoretical approach to journal studies revealing a hitherto unexplored dimension of latent or unconscious discourse within the media portrait of architecture The purpose of this enquiry is to highlight moments where a different type of critical voice emerges on the architectural journal page indicating the possibility of a more progressive engagement with the media as a platform for critical and speculative thinking about architecture and to rethink the journals role within architectural history Croquis Stéphane Beel, 2005 **Hablan los arquitectos** Arturo Franco, 2021-07-01

Material Imagination in Architecture David Dernie, Jacopo Gaspari, 2016-07-07 Material Imagination in Architecture draws on history and the visual arts and contemporary architecture to explore this popular theme in architectural practice and education In the context of a discipline increasingly driven by digital production this text explores architecture and making and the diverse influences on the material reality of architectural form it argues that the crafts fabrication and assemblage of its making remain vital elements of contemporary architectural language This broad ranging text bridges the gap between a technical or otherwise fragmentary knowledge of materials of the specialist and the tacit or instinctive understanding of materials that the artist sculptor or architect may have It identifies key material themes pertinent to contemporary architectural debate and develops a discourse about future practice that is framed by environmental imperatives and grounded in a historical understanding of the meaning and use of materials Material iconology in architecture is a well established tradition and this book draws on that background to investigate the possibilities and limits of using materials in contemporary design to communicate the themes and contexts of an architectural project a material s relationship to context and to the history of practices that belong to the traditions of making buildings Each theme is explored in case studies from twelve countries around the world including the UK USA Spain Italy Germany Australia and China
