Information Seeking in Electronic Environments Gary Marchionini, 1995 Significant amounts of our time and energy are devoted to creating managing and avoiding information Computers and telecommunications technology have extended our regard for information and are driving changes in how we learn work and play One result of these developments is that skills and strategies for storing and retrieving information have become more essential and more pervasive in our culture This book considers how electronic technologies have changed these skills and strategies and augmented the fundamental human activity of information seeking The author makes a case for creating new interface designs that allow the information seeker to choose what strategy to apply according to their immediate needs Such systems may be designed by providing information seekers with alternative interface mechanisms for displaying and manipulating multiple levels of representation for information objects Information Seeking in Electronic Environments is essential reading for researchers and graduate students in information science human computer interaction and education as well as for designers of information retrieval systems and interfaces for digital libraries and archives

Kegler, 2016-12-19 From 1960 1980 both eastern and western Europe experienced a construction boom of new dimensions Cybernetics the science of planning and sociology as well as the new possibilities offered by technology and production paved the way to large scale processes and systems in architecture and urban design which favored technocratic and utopian concepts Increasingly architects and planners saw themselves as

designers of comprehensive infrastructure and mega structures in a technology focused world The authors assesses these developments on the back of a knowledge transfer between East and West It confirms a change in attitude that can still be felt today recession social changes and environmental problems led to criticism of the then contemporary concepts of modernity
