Pappas,Liliana Barro Zecker,Liliana Zecker,2001-01-01 This book consists of the reports of 13 urban elementary teacher researchers year long inquiries around literacy topics conducted as part of a collaborative school university action research project The focus is on how they attempted to transform their teaching practices to meet the needs of students from diverse ethnic and linguistic backgrounds and how their inquiry efforts resulted in developing more collaborative styles of teaching These teachers explore how collaborative classroom interactions occur when teachers move away from teaching as transmission approaches to ones in which they share power and authority with their students viewing them not as at risk but instead as at promise Because the everyday interactions between teachers and students are realized by social talk in the classroom classroom discourse was analyzed to study and document the teacher researchers efforts to make changes in the locus of power in literacy teaching and learning Their chapters are filled with classroom discourse examples to illustrate their points The volume includes teacher inquiries conducted in elementary classrooms from kindergarten through eighth grade Three took place in bilingual classrooms one in a special education class These inquiries cover a range of literacy topics including reading aloud language richness writing literature discussion groups drama and pretend reading The background and theoretical underpinnings of the project are discussed in an introduction written by the editors in the conclusion they pull together the major themes in the teacher researchers chapters and discuss the political implications of their efforts to change literacy teaching and learning in their urban classrooms     **Maple V Language**

**Reference Manual** Bruce W. Char,Keith O. Geddes,Gaston H. Gonnet,Benton L. Leong,Michael B. Monagan,Stephen M. Watt,2012-12-06 The design and implementation of the Maple system is an on going project of the Symbolic Com putation Group at the University of Waterloo in Ontario Canada This manual corresponds with version V roman numeral five of the Maple system The on line help subsystem can be invoked from within a Maple session to view documentation on specific topics In particular the command updates points the user to documentation updates for each new version of Maple The Maple project was first conceived in the autumn of 1980 growing out of discussions on the state of symbolic computation at the University of Waterloo The authors wish to acknowledge many fruitful discussions with colleagues at the University of

Waterloo particularly Morven Gentleman Michael Malcolm and Frank Tompa It was recognized in these discussions that none of the locally available systems for symbolic computation provided the facilities that should be expected for symbolic computation in modern computing environments We concluded that since the basic design decisions for the then current symbolic systems such as ALTRAN CAMAL REDUCE and to design a new system MACSYMA were based on 1960 s computing technology it would be wise from scratch taking advantage of the software engineering technology which had become available since then as well as drawing from the lessons of experience Maple s basic features e g elementary data structures input output arithmetic with numbers and elementary simplification are coded in a systems programming language for efficiency
